been developed by the SAC Joint Venture under contract to the Federal Emergency Management Agency FEMA to provide structural engineers with recommended criteria for evaluation of the probable performance of existing steel moment frame buildings in future earthquakes and to provide a basis for updating and revision of evaluation and rehabilitation guidelines and standards. It is one of a series of companion publications addressing the issue of the seismic performance of steel moment frame buildings. The set of companion publications includes FEMA 350 Recommended Seismic Design Criteria for New Steel Moment Frame Buildings. This publication provides recommended criteria supplemental to FEMA 302 1997 NEHRP Recommended Provisions for Seismic Regulations for New Buildings and Other Structures for the design and construction of steel moment frame buildings and provides alternative performance based design criteria. FEMA 351 Recommended Seismic Evaluation and Upgrade Criteria for Existing Welded Steel Moment Frame Buildings. This publication provides recommended methods to evaluate the probable performance of existing steel moment frame buildings in future earthquakes and to retrofit these buildings for improved performance. FEMA 352 Recommended Postearthquake Evaluation and Repair Criteria for Welded Steel Moment Frame Buildings. This publication provides recommendations for performing postearthquake inspections to detect damage in steel moment frame buildings following an earthquake, evaluating the damaged buildings to determine their safety in the postearthquake environment and repairing damaged buildings. FEMA 353 Recommended Specifications and Quality Assurance Guidelines for Steel Moment Frame Construction for Seismic Applications. This publication provides recommended specifications for the fabrication and erection of steel moment frames for seismic applications. The recommended design criteria contained in the other companion documents are based on the material and workmanship standards contained in this document, which also includes discussion of the basis for the quality control and quality assurance criteria contained in the recommended specifications. The information contained in these recommended evaluation and upgrade criteria hereinafter referred to as Recommended Criteria is presented in the form of specific recommendations for design and performance evaluation procedures together with supporting commentary explaining part of the basis for these recommendations.
