Theoretical Issues in Psychology John R. Morss, Niamh Stephenson, Hans van Rappard, 2013-06-29

Theoretical Issues in Psychology is published as the discipline of psychology enters its at least third century. The year 2001 brings with it millennial reflections as well as the strange sense of déjà vu that we derive from the Kubrick movie *As to the former*. A glance at the contents list of this volume will demonstrate both the maturity and the vigour of theoretical debate within psychology. There is a level of sophistication here that should be the cause of quiet celebration. Recent ideas about discursive practice and subjectivity, chaos theory and autopoiesis are effortlessly entrained with classical issues. Canonical texts are looked at with fresh eyes. Unresolved social and political questions are doggedly persisted with and new perspectives on the human experience are pioneered. We are not afraid of long words even if French in origin but nor are we afraid to recognise that we are physical beings who touch other beings who hold desire and remember and who talk talk talk. For surely it is theoretically sensitive work in psychology whether critical or not that best represents what the discipline has to offer the wider community.

Introduction to Gender Jennifer Marchbank, Gayle Letherby, 2014-06-30

Thoroughly updated in this second edition, *Introduction to Gender* offers an interdisciplinary approach to the main themes and debates in gender studies. This comprehensive and contemporary text explores the idea of gender from the perspectives of history, sociology, social policy, anthropology, psychology, politics, pedagogy and geography and considers issues such as health and illness, work, family, crime and violence and culture and media. Throughout the text, studies on masculinity are highlighted alongside essential feminist work, producing an integrated investigation of the field. Key features: A thematic structure provides a clear exploration of each debate without losing sight of the interconnections between disciplines. World in focus boxes and international case studies offer a broad global perspective on gender studies. In-text features and student exercises including Controversy, A critical look and Stop and think boxes allow the reader to engage in the debates and revise the material covered. Hotlinks throughout the text make connections between chapters, allowing the reader to follow the path of particular issues and debates between topics and disciplines. New to the second edition: A new chapter explores gender through the discipline of philosophy. A new section on international relations brings this relevant topic into focus. Current discussion on the language of gender across Europe is brought in to Chapter 1. A focus on Europe and Scandinavia as well as the UK gives the text a broader scope. Examples are updated throughout to ensure the text is cutting edge and relevant. *Introduction to Gender* second edition is highly relevant to today's students across the social sciences and is an essential introduction for students of sociology, women's studies and men's studies.

Psychology of Liberation Maritza Montero, Christopher C. Sonn, 2009-04-28

Since the mid 1980s the psychology of liberation movement has been a catalyst for collective and individual change in communities throughout Latin America and beyond and recent political developments are making its powerful transformative ideas more relevant than ever before. *Psychology of Liberation: Theory and Applications* updates the activist frameworks developed by

Ignacio Martin Baro and Paulo Freire with compelling stories from the frontlines of conflict in the developing and developed worlds as social science and psychological practice are allied with struggles for peace justice and equality In these chapters liberation is presented as both an ongoing process and a core dimension of wellbeing entailing the reconstruction of social identity and the transformation of all parties involved both oppressed and oppressors It also expands the social consciousness of professionals bringing more profound meaning to practice and enhancing related areas such as peace psychology as shown in articles such as these Philippines the role of liberation movements in the transition to democracy Venezuela liberation psychology as a therapeutic intervention with street youth South Africa the movement for representational knowledge Muslim world religion the state and the gendering of human rights Ireland linking personal and political development Australia addressing issues of racism identity and immigration Colombia building cultures of peace from the devastation of war Psychology of Liberation demonstrates the commitment to overcome social injustices and oppression The book is a critical resource for social and community psychologists as well as policy analysts It can also be used as a text for graduate courses in psychology sociology social work and community studies Joint Action Tim Corcoran, John

Cromby, 2016-06-10 Joint Action Essays in honour of John Shotter brings together a cross disciplinary group of fifteen respected international scholars to explain the relevance of John Shotter's work to emerging concerns in twenty first century social science Shotter's work extends over forty years and continues to challenge conventional scientific thinking across a range of topics The disciplines and practices that Shotter's work has informed are well established throughout the English speaking world This is the first publication to examine the importance of his influence in contemporary social sciences and it includes authoritative discussions on topics such as social constructionism democratic practice organisational change the affective turn and human relations The geographical diversity and disciplinary breadth of scholarly contributions imbues the book with international scope and reach Joint Action presents a contemporary reflection on Shotter's work that demonstrates its influence across a range of substantive topics and practical endeavours and within disciplines including management studies and philosophy as well as psychology As such it will appeal to researchers and postgraduate students of social sciences and related disciplines as well as to those who have heard of Shotter's work and want to know more about its utility and value in relation to their own research or practice Handbook of Psychology, History of Psychology Donald K. Freedheim, 2003-01-03 Includes established theories and cutting edge developments Presents the work of an international group of experts Presents the nature origin implications and future course of major unresolved issues in the area

Marketing and Social Construction Chris Hackley, 2003-08-29 Marketing is at the centre of the business education boom a million or more people worldwide are studying the subject at any one time Yet despite widespread discontent with the intellectual standards in marketing very little has changed over the past thirty years In this ground breaking new work Chris Hackley presents a social constructionist critique of popular approaches to teaching theorising and writing about marketing

Drawing on a wide range of up to date European and North American studies Dr Hackley presents his argument on two levels First he argues that mainstream marketing s ideologically driven curriculum and research programmes dominated by North American tradition reproduce business school myths about the nature of practically relevant theory and the role of professional education in management fields Second he suggests a broadened theoretical scope and renewed critical agenda for research theory and teaching in marketing Intellectually rigorous yet comprehensible this work will be of vital importance to all those interested in the future of teaching and research in business and management **Social Thinking and History**

Constance De Saint Laurent,2020-09-14 Social Thinking and History demonstrates that our representations of history are constructed through complex psychosocial processes in interaction with multiple others and that they evolve throughout our lifetime playing an important role in our relation to our social environment Building on the literature on social thinking collective memory and sociocultural psychology this book proposes a new perspective on how we understand and use our collective past It focuses on how we actively think about history to construct representations of the world within which we live and how we learn to challenge or appropriate the stories we have heard about the past Through the analysis of three studies of how history is understood and represented in different contexts in political discourses in France by intellectuals and artists in Belgium and when discussing a current event in Poland its aim is to offer a rich picture of our representations of the past and the role they play in everyday life This book will be of great interest to academics researchers and postgraduate students in the fields of psychology memory studies sociology political science and history It will also make an interesting read for psychologists and human and social scientists working on collective memory **A Critical**

Reconstruction of Evidence-based Practice in Psychology Henrik Berg,2024-10-30 Evidence based practice in psychology is the dominant regulatory principle in clinical psychology defining psychological knowledge and its application This book provides a critical analysis and a reconstruction of the policy statement focusing on epistemology and ethics The book shows the ideological and historical background for the development of evidence based practice in psychology It covers the main conceptual and empirical arguments leading to this transition including philosophy and evidence based medicine The book goes on to show some of the defects of evidence based practice in psychology it misconstrues psychological knowledge reduces the number of ethical resources available to regulate psychological practices does not fulfil its ambitions of being a tripartite concept and undertheorises the issue of integration The closing chapters provide a constructive critique preserving the valuable aspects of evidence based practice in psychology while developing it to make it function adequately In that sense the book aims to change the way psychological knowledge is understood and used in practice This text will be engaging and thought provoking for anyone using psychological knowledge with patients or clients It will provide analytic resources to understand psychology better and facilitate the application of psychological knowledge in various settings The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons

Practicing Feminisms, Reconstructing Psychology Jill G Morawski, 2025-10-01 Practicing Feminisms Reconstructing Psychology is a valuable survey of developments to date in feminist psychology and a provocative assessment of its future possibilities For many psychologists engaged with the questions raised by modern feminism the reconciliation of scientific methods and feminist commitments has been a complicated and sometimes perplexing project In her book Jill Morawski attempts to move beyond the apparent impasses toward a constructive feminist psychology The book assesses the substantive advances feminist psychology has made and proposes ways in which those transformations can lead to new research and methodologies These transformative interventions Morawski argues have often consisted of local and partial alterations to established methods rather than a programmatic metatheory or a formulaic methodology She reviews a variety of exemplary studies that demonstrate how such intermittent practices taken together constitute a groundwork for radically new forms of psychological inquiry The study describes feminist challenges to long held conceptions of objectivity subjectivity and validity and examines emergent problems and ongoing debates The feminist innovations discussed reveal the impossibility of a pure and abstract objective stance and demonstrate the feasibility of situated and critical objective practices Morawski also shows how experimental investigative strategies are generating new perspectives on subjectivity which incorporate agency as well as dependence reflection as well as reactivity Feminist inquiry is modifying the procedures through which knowledge is warranted with different evaluations of validation processes Despite the transformations in these areas the pursuit of a feminist psychology remains in transition in a liminal space Among the emerging issues Morawski explores are vicissitudes of reflexivity the investigator's self and the cultural bases of psychological knowledge
