## **Reconstruction Of Thinking:**

*Reconstruction of Thinking* Robert Cummings Neville, 1981-06-30 The Renaissance development of science fulfilled the ancient ideal of integrating quantitative and qualitative thinking but failed to recognize valuational thinking and thus deprived moral aesthetic and political thought of cognitive status The task of this book is to reconstruct the concept of thinking in order to exhibit valuation not reason as the foundation for thinking and to integrate valuational with quantitative and qualitative modes Part I explains the broad thesis interpreting the problem of the foundations for thinking and providing a general theory of value Part II explains the role of valuation at the imaginative level of thinking with discussions of synthesis perception form and art The method of reconstruction requires a cosmology that is generated in successive waves

Dorrien, 2006-01-01 In this first of three volumes Dorrien identifies the indigenous roots of American liberal theology and demonstrates a wider longer running tradition than has been thought The tradition took shape in the nineteenth century motivated by a desire to map a modernist third way between orthodoxy and rationalistic deism atheism It is defined by its openness to modern intellectual inquiry its commitment to the authority of individual reason and experience its conception of Christianity as an ethical way of life and its commitment to make Christianity credible and socially relevant to modern people Dorrien takes a narrative approach and provides a biographical reading of important religious thinkers of the time including William E Channing Ralph Waldo Emerson Horace Bushnell Henry Ward Beecher Elizabeth Cady Stanton and Charles Briggs Dorrien notes that although liberal theology moved into elite academic institutions its conceptual foundations were laid in the pulpit rather than the classroom **Think Tank**

*The Gratifications of Whiteness* Ella Myers, 2022 The first book length study of W E B Du Bois s conceptualization of American whiteness W E B Du Bois famously argued that whiteness in the US in the late nineteenth and early twentieth centuries functioned as a public and psychological wage offering valuable social standing to even the poorest of whites Such compensation dependent on the devaluation of Black existence helped secure the US capitalist regime and prevent interracial class solidarity This book argues that Du Bois s influential account of compensatory whiteness is crucially important but also incomplete For Du Bois whiteness was never one thing but many Focusing on Du Bois s middle period

work about 1920 1940 Ella Myers uncovers an overlooked complex analysis that theorizes whiteness as a source of varied gratifications These gratifications include not only the status rewards of racial capitalism but also the enjoyment of gratuitous Black suffering and the conviction that the planet belongs to those marked as white The book shows that Du Bois's analysis developed in response to the pressing political problems of his own day also offers insight into 21st century struggles for racial justice Myers argues that it is important to recognize the extent to which anti Blackness continues to underwrite plural and deeply disturbing forms of white gratification here and now Doing so helps explain the tenacity of America's unequal racial order and also reveals why creative multifaceted strategies of resistance are necessary to end it
