## **Recreating Motherhood Ideology And Technology In A Patriarchal Society:**

**Recreating Motherhood** Barbara Katz Rothman, 2000 Selling genetically gifted human eggs on the free market for a hefty price In vitro fertilization Fetal rights Prenatal diagnosis Surrogacy All are instances of biomedical and social advancements with which we have become familiar in recent years Yet these issues are often regarded as distinct or only loosely related under the rubric of reproduction Barbara Katz Rothman demonstrates how they form a complex whole that demands of us in response a woman centered class sensitive way of understanding motherhood We need a social policy for dealing with mothers and motherhood that is consistent with feminist politics and feminist theory Her book show how we as a society must first recognize that the real needs of mother father and children have been swept aside in an attempt to reduce the complex process of human reproduction to a clinical event that can be controlled by medical technology Rothman suggests ways to accomplish social and legal change that would allow technological advances to affirm motherhood and the mother child relationship without cost to women s identity This new edition of *Recreating Motherhood* contains exciting updates Rothman shows how this material is key in understanding the family not just motherhood And a new chapter *Reflections on a Decade* explores how new reproductive technologies combine with new marketing and new genetics to pose troubling social questions

**The Politics of Motherhood** Alexis Jetter, Annelise Orleck, Diana Taylor, 1997 Essays and interviews explode the myth of apolitical motherhood by showing how 20th century women have politicized their role as mothers in a wide range of social contexts

***Adoptive Families in a Diverse Society*** Katarina Wegar, 2006 *Adoptive Families in a Diverse Society* brings together twenty one prominent scholars to explore the experience practice and policy of adoption in North America While much existing literature tends to stress the potential problems inherent in non biological kinship the essays in this volume consider adoptive family life in a broad and balanced context Bringing new perspectives to the topics of kinship identity and belonging this path breaking book expands more than our understandings of adoptive family life it urges us to rethink the limits and possibilities of diversity and assimilation in American society

**Motherhood and Representation** E. Ann Kaplan, 2013-07-23 From novels of the nineteenth century to films of the 1990s American culture abounds with images of white middle class mothers In *Motherhood and Representation* E Ann Kaplan considers how the mother appears in three related spheres the historical in which she charts changing representations of the mother from 1830 to the postmodernist present the psychoanalytic which discusses theories of the mother from Freud to Lacan and the French Feminists and the mother as she is figured in cultural representations in literary and film texts such as *East Lynne* *Marnie* and *The Handmaid s Tale* as well as in journalism and popular manuals on motherhood Kaplan s analysis identifies two dominant paradigms of the mother as Angel and Witch and charts the contesting and often contradictory discourses of the mother in present day America

***Essays on Women, Medicine & Health*** Ann Oakley, 2019-08-06 In this collection of essays Ann Oakley one of the most influential social scientists of the last twenty years brings together the best of her work on

the sociology of women's health. She focuses on four main themes: divisions of labour, motherhood, technology, and methodology, and in her own inimitable style combines serious academic discourse from a feminist sociological perspective with a practical understanding of what it is to be a woman facing the often impersonal world of twentieth-century medicine. Updating and substantially expanding on her earlier work *Telling the Truth About Jerusalem*, this new collection bridges the medical-social divide in an accessible and personable way. Women and Social Policy Mary Kember, Clare

Ungerson, 1997-09-19 It is ten years since the first edition of this well-established text was published. The second edition contains an almost entirely new selection of readings to bring the publication up to date and to develop themes that are likely to remain topical into the late 1990s and beyond. Where possible and relevant, much of the material has a comparative, particularly European, perspective. The book is an essential text for students and teachers of social policy and women's studies. **BAD MOTHERS** Molly Ladd-Taylor, Lauri Umansky, 1998 There really are women who are less than good

mothers. However, during the past quarter-century, the definition of bad mother has changed with changing lifestyles and changes to the family structure. Mothers today are blamed for a host of problems. Drawing together the work of prominent scholars and journalists and individual cases, **BAD MOTHERS** marks an important contribution to the literature on

motherhood. **Pregnancy and Birth** Keisha L. Goode, Barbara Katz Rothman, 2021-06-18 *Pregnancy and Birth: A Reference Handbook* provides students with information too often ignored in sex education on what pregnancy and birth have been and can be as transformative personal and social events. *Pregnancy and Birth: A Reference Handbook* is a person-centered reference book on pregnancy and childbirth in the United States. The medicalization of pregnancy and childbirth is a theme; however, primary emphasis is on the historical and contemporary significance of the Midwifery Model of Care and how that can improve outcomes for all. The volume opens with a background and history of the topic, followed by a chapter on related problems, controversies, and solutions. A Perspectives chapter contains essays from a variety of individuals who are invested in the topic of pregnancy and birth. The remaining chapters provide students with additional information such as profiles, data, and documents, resources, a chronology, and a glossary. This book is accessible to high school and college-level researchers as well as general interest readers curious about the topic. *Making Babies: Biomedical Technologies, Reproductive Ethics, and Public Policy* Inmaculada de Melo-Martín, 2013-03-09 Each year, roughly a million new cases of cancer appear in the US, and more than 500,000 Americans die annually of premature death. Although medical progress has slowed cancer mortality, its incidence is increasing roughly six times faster than cancer mortality is decreasing. Breast cancer, in particular, has been increasing about one percent each year since 1973. At least two of the factors responsible for this surge in breast cancer are women's use of medically prescribed synthetic hormones and the exposure of the entire population to chemicals such as dioxin. Both exposures increase the likelihood of breast cancer. Although many ethicists worry about involuntary societal imposition of chemicals such as dioxin through industrial and agricultural processes, allegedly voluntary exposures also

constitute both a public health problem and a biomedical ethics difficulty Physicians recommend synthetic hormones for example to women who apparently take them voluntarily In the case of in vitro fertilization doctors prescribe hormones to induce egg production and to increase the chances of reproduction for couples who are unable to have children Despite the benefits of medical technologies such as hormone stimulation and in vitro fertilization they also carry great risks The price that childless women pay for their opportunity to have children through in vitro fertilization may be their own increased risk of diseases such as breast cancer that are hormone dependent

**The Political Geographies of Pregnancy** Laura R.

Woliver,2002-09-25 As reproductive power finds its way into the hands of medical professionals lobbyists and policymakers the geographies of pregnancy are shifting and the boundaries need to be redrawn argues Laura R Woliver in this study of how modern reproductive politics shapes women s bodily agency

**Without Apology** Shannon Stettner,2016-08-26

Until the late 1960s the authorities on abortion were for the most part men politicians clergy lawyers physicians all of whom had an interest in regulating women s bodies Even today when we hear women speak publicly about abortion the voices are usually those of the leaders of women s and abortion rights organizations women who hold political office and on occasion female physicians We also hear quite frequently from spokeswomen for anti abortion groups Rarely however do we hear the voices of ordinary women women whose lives have been in some way touched by abortion Their thoughts typically owe more to human circumstance than to ideology and without them we run the risk of thinking and talking about the issue of abortion only in the abstract Without Apology seeks to address this issue by gathering the voices of activists feminists and scholars as well as abortion providers and clinic support staff alongside the stories of women whose experience with abortion is more personal With the particular aim of moving beyond the polarizing rhetoric that has characterized the issue of abortion and reproductive justice for so long Without Apology is an engrossing and arresting account that will promote both reflection and discussion

**Playing Dolly** E. Ann Kaplan,Susan Merrill Squier,1999

A collection of essays that explore changing attitudes about reproductive technology They reflect the shift in public perception of topics which range from the biomedical to the sociocultural including fiction

**The Politics of Pregnancy** Janna C. Merrick,2014-05-01

Here is a comprehensive overview and analysis of issues concerning the maternal fetal relationship from abortion to surrogate motherhood Unlike many books which cover reproductive issues in general this book focuses in depth on one aspect of reproduction the maternal fetal relationship to give readers a detailed study of the many issues involved The Politics of Pregnancy discusses public policy dimensions of this relationship and posits new critical political dilemmas Many chapters in this unique book also provide significant clinical information as well as conceptual analysis The Politics of Pregnancy offers great diversity in terms of the disciplinary backgrounds of the authors and their ideological perspectives Authors come from many fields including sociology political science pediatrics ethics and psychiatry and provide diverse sometimes opposing analytical positions Some of the topics they debate include maternal substance use during pregnancy prenatal technology pregnancy and workplace

hazards court ordered obstetrical intervention fetal experimentation Readers interested in public and health care policy nursing feminism pediatrics or ethics will find *The Politics of Pregnancy* to be a stimulating and thought provoking book This volume also makes an excellent discussion tool for graduate courses in these areas *Women, Power, and Childbirth* Kathleen D. Turkel, 1995-11-06 Based on her 12 year study of a free standing birth center Turkel analyzes the medical model of childbirth in contrast to the midwifery model In the medical model of birth women are defined as patients and birth takes place in hospitals where women have little if any control over their experience The midwifery model views birth as a healthy process where midwives act as teachers and guides for women during pregnancy and birth helping women and their families to shape and define their experience to meet their needs and expectations Under existing legal and cultural circumstances free standing birth centers face a dilemma They must continually accomodate the medical model while trying to maintain the midwifery model and give women an option to home birth or to hospital birth **Babies for Sale?** Miranda Davies, 2017-03-15 Transnational surrogacy the creation of babies across borders has become big business Globalization reproductive technologies new family formations and rising infertility are combining to produce a quiet revolution in social and medical ethics and the nature of parenthood Whereas much of the current scholarship has focused on the US and India this groundbreaking anthology offers a far wider perspective Featuring contributions from over thirty activists and scholars from a range of countries and disciplines this collection offers the first genuinely international study of transnational surrogacy Its innovative bottom up approach rooted in feminist perspectives gives due prominence to the voices of those most affected by the global surrogacy chain namely the surrogate mothers donors prospective parents and the children themselves Through case studies ranging from Israel to Mexico the book outlines the forces that are driving the growth of transnational surrogacy as well as its implications for feminism human rights motherhood and masculinity A Transnational Feminist View of Surrogacy Biomarkets in India Sheela Saravanan, 2018-03-26 This book takes a reproductive justice approach to argue that surrogacy as practised in the contemporary neoliberal biomarkets crosses the humanitarian thresholds of feminism Drawing on her ethnographic work with surrogate mothers intended parents and medical practitioners in India the author shows the dark connections between poverty gender human rights violations and indignity in the surrogacy market In a developing country like India bio technologies therefore create reproductive objects of certain female bodies while promoting an image of reproductive liberation for others India is a classic example for how far these biomarkets can exploit vulnerabilities for individual requirements in the garb of reproductive liberty This critical book refers to a range of liberal radical and postcolonial feminist frameworks on surrogacy and questions the individual reproductive rights perspective as an approach to examine global surrogacy It introduces humanitarian feminism as an alternative concept to bridge feminist factions divided on contextual and ideological grounds It hopes to build a global feminist solidarity drawing on a reproductive justice approach by recognizing the histories of race class gender sexuality ability age and immigration

oppression in all communities This work is of interest to researchers and students of medical sociology and anthropology gender studies bioethics and development studies      Reproductive Issues in America Janna Merrick, Robert H.

Blank, 2003-08-06 A balanced and thoughtful analysis of human reproduction issues in the United States with emphasis on the ethical and policy implications of cutting edge reproductive technologies Few subjects are as divisive and partisan as the issues surrounding the propagation of the human species This thorough examination covers the full scope of the debates and offers an up to the minute survey of the controversial technologies that are at the heart of reproductive rights in the United States The areas explored range from abortion and sterilization to fetal research and human cloning The moral societal and public policy implications of each subject are examined thoroughly with emphasis on those areas where cutting edge technology has raced ahead of public policy thereby creating new concerns for ethicists and policy makers Legislative oversight or the freedom to pursue reproductive technologies at any cost this debate is far from over      **Consuming**

**Bodies** Jackie Hogan, Sarah Whetstone, 2024-12-24 Our bodies reveal the values priorities anxieties and material realities of the society in which we are situated and in contemporary consumer societies human bodies both reflect the defining characteristics of our time and carry the markers of social hierarchies based on categories such as gender race and class Consuming Bodies Body Commodification and Embodiment in Late Capitalist Societies explores the ways our bodies are increasingly commodified from before birth to after death through both long standing forms of commodification captive labor sex work and spectator sports and newer forms commercial surrogacy the thriving trade in human biomaterials female genital rejuvenation surgery global romance tourism and green burial practices among others As this diverse range of topics demonstrates body commodification reaches increasingly into every realm of our lives from our most intimate experiences to encounters with pop culture the beauty industries the medical industrial complex and the state This volume takes a critical perspective on body commodification and embodiment both in the US and across the globe making an important contribution to social scientific understandings of the body both by going beyond the Eurocentric approach that typifies much of the extant scholarly literature and by addressing newly emerging practices that are growing out of techno scientific and social changes      Ordinary Genomes Karen-Sue Taussig, 2009-09-23 Explores the mutually constructive relationship between

increasing scientific knowledge of human genetics and cultural identity through a case study of the development and reception of genomics in the Netherlands      **Disability, Gender and the Trajectories of Power** Asha Hans, 2024-09-30

This book explores the gendered experience of disability It investigates how women with disabilities fare in society focusing on the experiences of women and their interactions with family society and medical and legal institutions Women with disabilities face unprecedented levels of violence oppression and marginalisation in their daily lives as well as a lack of visibility proper care and opportunities for socio economic development This book examines the reasons and consequences of the stigmatisation of disabilities and neurodivergence denial of proper care and various forms of exclusion and violence

women with disabilities face both within and outside of their homes It brings together the perspectives of academicians and activists that try and understand the various challenges faced by women with disabilities and highlights the fight for their right to autonomy respect equality and justice Filling the gap in the existing feminist research this revised edition seeks to influence the way in which society treats women with disabilities and will be of interest to scholars and researchers in the field of women s rights disability rights rehabilitation social policy and the body
