The Case Against Theism Raphael Lataster, 2018-06-14 This monograph offers a critique of arguments for the existence of a specifically Christian God advanced by prominent scholar William Lane Craig The discussion incorporates philosophical mathematical scientific historical and sociological approaches The author does not seek to criticize religion in general or Christianity specifically Rather he examines the modern and relatively sophisticated evidential case for Christian theism Scholars have been arguing for theism or naturalism for centuries and there seems little to add to the discussion especially from the theistic side However to assume that either theism or naturalism obtains is a false dichotomy There are alternatives to both that merit consideration Employing a probabilistic approach the author advances this discussion His work uniquely utilizes not only naturalistic hypotheses to argue against theism It also presents supernaturalistic hypotheses This leaves no question that theism is almost certainly false even if some form of divine reality exists This project seeks not to argue that Christianity or any other faith or religion is undesirable but only to critically examine evidentialist claims posited by Christianity's learned apologists In fact a major secondary aim is to consider alternative god conceptions such as polytheism and pantheism This work aims to highlight that Christian theism is often granted special privileges by theistic philosophers of religion which seems doubly inappropriate when certain alternative god conceptions may even prove to be more plausible

Knowledge, Creativity and Failure Chris Hay, 2016-09-17 This book offers a new framework for the analysis of teaching and learning in the creative arts It provides teachers with a vocabulary to describe what they teach and how they do this within the creative arts Teaching and learning in this field with its focus on the personal characteristics of the student and its insistence on intangible qualities like talent and creativity has long resisted traditional models of pedagogy In the brave new world of high stakes assessment and examination driven outcomes across the education system this resistance has proven to be a severe weakness and driven creative arts teachers further into the margins Instead of accepting this relegation teachers of creative arts must set out to capture the distinctiveness of their pedagogy This book will allow teachers to transcend the opaque metaphors that proliferate in the creative arts and instead to argue for the robustness and rigour of their practice
