Libricide Rebecca Knuth, 2003-07-30. Where they have burned books they will end in burning human beings declared German poet Heinrich Heine. This book identifies the regime sponsored ideologically driven and systemic destruction of books and libraries in the 20th century that often served as a prelude or accompaniment to the massive human tragedies that have characterized a most violent century. Using case studies of libricide committed by Nazis, Serbs in Bosnia, Iraqis in Kuwait, Maoists during the Cultural Revolution in China, and Chinese Communists in Tibet, Knuth argues that the destruction of books and libraries by authoritarian regimes was sparked by the same impulses toward negation that provoked acts of genocide or ethnocide. Readers will learn why some people even those not subject to authoritarian regimes consider the destruction of books a positive process. Knuth promotes understanding of the reasons behind extremism and patterns of cultural terrorism and concludes that what is at stake with libricide is nothing less than the preservation and continuation of the common cultural heritage of the world. Anyone committed to freedom of expression and humanistic values will embrace this passionate and valuable book. **Historical**

**Injustice and Democratic Transition in Eastern Asia and Northern Europe** Kenneth Christie, Robert Cribb, 2003-08-29. The memory of past atrocity lingers like a ghost at the table of democracy. Injustices carried out in the past from massacres and murder to repression and detention embitter societies and distort their structures so that the process of establishing and running a democracy carries an extra burden. This volume examines societies at various stages of dealing with the memory of the past from China, Mongolia, Indonesia, and the Baltic States where bitter memories of death and persecution still intrude to Finland where the civil war of 1918 has finally been accepted as a distant national tragedy. **Institutional Theory in**

**Political Science** B. Guy Peters, 2005-10-20. At the turn of the millennium there has been a major growth of interest in institutional theory and institutional analysis in political science. This book identifies these approaches to institutions and provides a frame of reference for the different theories. In the past decade there has been a major growth of interest in institutional theory and institutional analysis in political science. There are however a variety of different approaches to the new institutionalism and these approaches rarely address the same issues. This book identifies the various approaches to institutions and then provides a common frame of reference for the different theories. Peters argues that there are at least seven versions of institutionalism beginning with the March and Olsen normative institutionalism and including rational choice, historical, and empirical approaches to institutions and their impact on public policy. For each of the versions of institutionalism there is a set of identical questions including the definition of institutions, the way in which they are formed, how they change, how individuals and institutions interact, and the nature of a good institution. Peters discusses whether there are really so many different approaches to institutionalism or if there is sufficient agreement among them to argue that there

is really one institutional theory      **Institutional Theory in Political Science, Fourth Edition** B. Guy Peters, 2019
