

Season 1 (1999)

The crew of the mining space ship *Red Dwarf* are wiped out by a radiation leak. Dave Lister, who was conceived in suspended animation during the accident, awakes 3 million years later to discover that he's the last human being alive.

Season 2 (1999)

The crew meet Kryten for the first time. Holly's new invention of the 'Holly Hop Drive' promises to take *Red Dwarf* back home to Earth in a mere instant. What it manages, however, is to flip the ship across the fifth dimension and land in a parallel universe.

Season 3 (1999)

The team go back in time, get marooned, fight a shape-changing mutant, swap bodies, experience different lives and battle a new, more advanced android trying to replace Kryten. Oh, and Holly like ship computer is now a female.

Season 4 (1999)

The *Dwarfers* try and date a green blob, cause trouble with a CPA playing machine, play a game of pool with some planets, meet Arnold 'Ace' Rimmer and end up fighting a warlock war.

Season 5 (1999)

Rimmer visits a Holship, tries to seduce his resistance to a bloody guy called The Implosion, visits a planet made up of fat, mind controls a hole-drill and comes face to face with bloody horror versions of himself.

Season 6 (1999)

The *Dwarfers* adventure through time, through space, through a computer hell, but finally, now guaranteed Lister, Rimmer, Kryten and the ship computer will meet their glorious, glorious end. Or will they? <http://www.bbc.co.uk/reddwarf/>

Season 7 (1999)

The crew used to face such dangers as the ship running out of curry, a badly wounded Ace Rimmer and the Spaxone bug. Plus Christine Kochanski. It's time for a trip in the space-time continuum.

Season 8 (1999)

The entire crew of *Red Dwarf* had been re-created by the Nanobots and so Lister, Cat, Rimmer and Kryten had a whole host of people to try and avoid, including Captain Holister and the Space Corps. Trouble is, they're in

Season 9: Subversion (2000)

British satellite channel Channel 4's *Red Dwarf: Back to Earth* - a short, three episode series - marked the return to *Red Dwarf*. And the first series since the millennium. It was filmed using a single-camera, and without a studio audience giving it a cinematic feel, but perhaps losing the feeling of being a sitcom in the process.

Season 10 (2012)

After a long wait, the return of *Red Dwarf* to the small screen is finally here. The shootback to the 1990s is intended to be a nostalgic nod to the original series, but also a chance to explore the problems of the *Red Dwarf* franchise in the 21st century.

Transfer in Crop Plants, Volume 2 Aditya Pratap, Jitendra Kumar, 2014-02-03 Genetic engineering and biotechnology along with conventional breeding have played an important role in developing superior cultivars by transferring economically important traits from distant wild and even unrelated species to the cultivated varieties which otherwise could not have been possible with conventional breeding. There is a vast amount of literature pertaining to the genetic improvement of crops over last few decades. However, the wonderful results achieved by crop scientists in food legumes research and development over the years are scattered in different journals of the world. The two volumes in the series *Alien Gene Transfer in Crop Plants* address this issue and offer a comprehensive reference on the developments made in major food crops of the world. These volumes aim at bringing the contributions from globally renowned scientists at one platform in a reader friendly manner. The second volume entitled *Alien Gene Transfer in Crop Plants: Achievements and Impact* will deal more with the practical aspects. This volume will cover achievements of alien gene transfer in major food crops of the world and their impact on development of newer genetic variability and additional avenues for selection development of superior cultivars for increased yield, resistance to biotic and abiotic stresses, improved nutritional and industrial quality, innovation of new techniques and positive as well as negative environmental implications. This volume has been divided into four groups with an aim to cover all major cereals, pulses, oilseeds and other crops, vegetable and horticultural crops which are of economic importance.

Prison Journal, Volume 2 Cardinal George Pell, 2021-05-20 Innocent. That final verdict came after George Cardinal Pell endured a grueling four years of accusations, investigations, trials, public humiliations and more than a year of imprisonment after being convicted by an Australian court of a crime he did not commit. Led off to jail in handcuffs following his sentencing on March 13, 2019, the 78-year-old Australian prelate began what was meant to be six years in jail for historical sexual assault offenses. Cardinal Pell endured more than thirteen months in solitary confinement before the Australian High Court voted 7-0 to overturn his original convictions. His victory over injustice was not just personal but one for the entire Catholic Church. Bearing no ill will toward his accusers, judges, prison workers, journalists and those harboring and expressing hatred for him, the cardinal used his time in prison as a kind of extended retreat. He eloquently filled notebook pages with his spiritual insights, prison experiences and personal reflections on current events both inside and outside the Church as well as moving prayers. In this second of three volumes, Cardinal Pell receives the terrible news that his first appeal is rejected. With the same grace, wisdom and calm perseverance we see on display in Volume 1, he continues his quest for justice by appealing to the Australian High Court. Glimmers of hope emerge as more legal experts, including non-Catholics, join the chorus of those demanding that this miscarriage of justice be reversed.
