Red star rising at sea Sergej G. Gorškov,1972 The Soviet Navy Bruce W. Watson,Susan M Watson,Calland Carnes,Brian Larson,2020-01-09 Since Admiral Sergei G Gorshkov was appointed to the office of commander in chief of the Soviet Navy in 1956 the Soviet Union has made a massive investment in naval construction training and operations As a result the Soviet Navy has grown from a coastal defense force to one of the world s two strongest navies This book offers a detailed assessment of every major aspect of the Soviet Navy from fleet structure and training facilities to command and control procedures and warfare and intelligence collection capabilities In the Shadow of Giants: The Major Powers and the Security of Southeast Asia Anthony James Gregor,1989 **Red Star Rising at Sea** Sergei Georgievich Gorshkov,1974

Admiral Gorshkov Norman C Polmar,Thomas A Brooks,2019-03-15 Admiral of the Fleet of the Soviet Union Sergei G Gorshkov was the product of a tradition unlike those of his Western contemporaries He had a unique background of revolution civil war world wars and the forceful implementation of an all controlling communist dictatorship Out of this background of violence and overwhelming transformation came a man with a vivid appreciation of the role and value of navies but with his own unique ideas about the kind of navy that the Soviet Union required and the role that navy should play in Soviet military and national strategy Western naval observers have persisted in attempting to define Admiral Gorshkov in Western naval terms Many of these observers have been baffled when they found that the man and his actions simply did not fit conventional narratives This book lays out the tradition background experiences and thinking of the man as they relate to the development of the Soviet Navy that Gorshkov commanded for almost three decades and that was able to directly challenge the maritime dominance of the United States a traditional sea power His influence persists to this day as the Russian Navy that is at sea in the twenty first century is to a significant degree based on the fleet that Admiral Gorshkov built

Towards a New International Marine Order Finn Laursen, 2023-09-20 **Quarterly Review of Military Literature**, 1976 **Military Review**, 1976 [Professional Journal of the United States Army](#), 1976 [The naval war film](#) Jonathan Rayner, 2013-07-19 This book undertakes a unique coherent and comprehensive consideration of the depiction of naval warfare in the cinema The films under discussion encompass all areas of naval operations in war and highlight varying institutional and aesthetic responses to navies and the sea in popular culture The examination of these films centres on their similarities to and differences from the conventions of the war genre and seeks to determine whether the distinctive characteristics of naval film narratives justify their categorisation as a separate genre or sub genre in popular cinema The explicit factual bases and drama documentary style of many key naval films such as *In Which We Serve* *They Were Expendable* and *Das Boot* also requires the consideration of these films as texts for popular historical transmission Their frequent reinforcement of establishment views of the past which derives from their conservative ideological position towards

national and naval culture makes these films key texts for the consideration of national cinemas as purveyors of contemporary history as popularly conceived by filmmakers and received by audiences **World War II** Spencer C. Watson, Peter M Dunn, 2020-01-28 The efforts of the Soviet Union since the mid 1950s to develop naval power have produced one of the strongest navies in the world but this achievement has not been without serious costs The construction of increasingly complex submarines ships and aircraft has required greater investment of resources and manpower This volume addresses whether the Soviet Union will continue naval expansion and what directions technological development will take in the future In particular the contributors consider trends in submarine aircraft carrier and surface combatant systems and examine what implications these developments have for U S defense planning over the next two decades
