Red Stars Patrick L. McGuire, 1985 **Red Stars** Patrick L. McGuire, 1977 **Red Stars** Patrick Llewellyn McGuire, 1979 The New Routledge Companion to Science Fiction Mark Bould, Andrew M. Butler, Sherryl Vint, 2024-06-13

The New Routledge Companion to Science Fiction provides an overview of the study of science fiction across multiple academic fields. It offers a new conceptualisation of the field today, marking the significant changes that have taken place in sf studies over the past 15 years. Building on the pioneering research in the first edition, the collection reorganises historical coverage of the genre to emphasise new geographical areas of cultural production and the growing importance of media beyond print. It also updates and expands the range of frameworks that are relevant to the study of science fiction. The periodisation has been reframed to include new chapters focusing on science fiction produced outside the Anglophone context, including South Asian, Latin American, Chinese, and African diasporic science fiction. The contributors use both well-established critical and theoretical approaches and embrace a range of new ones, including biopolitics, climate crisis, critical ethnic studies, disability studies, energy humanities, game studies, medical humanities, new materialisms, and sonic studies. This book is an invaluable resource for students and established scholars seeking to understand the vast range of engagements with science fiction in scholarship today.

The Cambridge Companion to Science Fiction Edward James, Farah Mendlesohn, 2003-11-20 Table of contents *The Post-Soviet Politics of Utopia* Mikhail Suslov, Per-Arne Bodin, 2019-09-19

More than 700 utopian novels are published in Russia every year. These utopias, meaning here fantasy fiction, science fiction, space operas, or alternative history, do not set out merely to titillate; instead, they express very real Russian anxieties: be they territorial, right-sizing loss of imperial status, or turning into a colony of the West. Contributors to this innovative collection use these narratives to re-examine post-Soviet Russian political culture and identity. Interrogating the intersections of politics, ideologies, and fantasies, chapters draw together the highbrow literary mainstream authors such as Vladimir Sorokin, mass literature for entertainment, and individuals who bridge the gap between fiction writers and intellectuals or ideologists. Aleksandr Prokhanov, for example, the editor in chief of Russia's far-right newspaper *Zavtra*. In the process, *The Post-Soviet Politics of Utopia* sheds crucial light onto a variety of debates, including the rise of nationalism, right-wing populism, imperial revanchism, the complicated presence of religion in the public sphere, the function of language, and is important reading for anyone interested in the heightened importance of ideas, myths, alternative histories, and conspiracy theories in Russia today.

The Utopian Fantastic Martha A. Four-Color Communism Sean Eedy, 2021-02-03 As with all other forms of popular culture, comics in East Germany were tightly controlled by the state. Comics were employed as extensions of the regime's educational system, delivering official ideology so as to develop the socialist personality of young people and generate enthusiasm for state socialism. The East German children who avidly read these comics, however, found their own meanings in and projected their own desires upon them. Four-Color Communism gives a lively account of East German comics from both perspectives, showing how the perceived freedoms they embodied created expectations that ultimately limited the regime's efforts to bring readers into the fold

I Want to Believe A.M. Gittlitz, 2020-04-20 Advocating nuclear war, attempting communication with dolphins, and taking an interest in the paranormal and UFOs, there is perhaps no greater or stranger cautionary tale for the Left than that of Posadism. Named after the Argentine Trotskyist J. Posadas, the movement's journey through the fractious and sectarian world of mid-20th-century revolutionary socialism was unique. Although at times significant, Posadas' movement was ultimately a failure. As it disintegrated, it increasingly grew to resemble a bizarre cult detached from the working class it sought to liberate. The renewed interest in Posadism today, especially for its more outlandish fixations, speaks to both a cynicism towards the past and nostalgia for the earnest belief that a better world is possible. Drawing on considerable archival research and numerous interviews with ex- and current Posadists, I Want to Believe tells the fascinating story of this most unusual socialist movement and considers why it continues to capture the imaginations of leftists today

Science Fiction and the Dismal Science Gary Westfahl, Gregory Benford, Howard V. Hendrix, 2019-12-10 Despite the growing importance of economics in our lives, literary scholars have long been reluctant to consider economic issues as they examine key texts. This volume seeks to fill one of these conspicuous gaps in the critical literature by focusing on various connections between science fiction and economics, with some attention to related fields such as politics and government. Its seventeen contributors include five award-winning scholars, five science fiction writers, and a widely published economist. Three topics are covered: what noted science fiction writers like Robert A. Heinlein, Frank Herbert, and Kim Stanley Robinson have had to say about our economic and political future; how the competitive and ever-changing publishing marketplace has affected the growth and development of science fiction from the nineteenth century to today; and how the scholars who examine science fiction have themselves been influenced by the economics of academia. Although the essays focus primarily on American science fiction, the traditions of Russian and Chinese science fiction are also examined. A comprehensive bibliography of works related to science fiction and

economics will assist other readers and critics who are interested in this subject The Red Rockets' Glare Asif A. Siddiqi, 2010-02-26 An academic study on the birth of the Soviet space program situating the birth of cosmic enthusiasm within Russian and Soviet history Passion and Perception Richard Stites, 2010 This collection of Stitesiana includes 29 essays on Russian culture representing the bulk of 20 years of scholarship in addition to well known monographs and diverse pieces in popular magazines
