

Semantics-Directed Compiler Generation*

Michael J A Smith, University of Cambridge
<msmith@lanther.co.uk>

July 21, 2005

Abstract

This dissertation concerns the design and implementation of SEMCOM, an interpreter generator for arbitrary languages, which compiles a two-level operational semantics (in either big- or small-step style). Input to SEMCOM is expressed in a purpose-designed Semantic Description Language (SDL). An SDL file contains the definition of an evaluation and typing relation, and can express type systems up to polymorphism. The SEMCOM compiler performs a sequence of analyses on this input, and generates a lexer, parser, and interpreter (in both OCaml and F#) for the user's language. SDL itself is typed, and a number of consistency checks are performed, producing comprehensive debugging output and useful error messages. Non-deterministic semantics are supported.

1 Introduction

In essence, computation has always been concerned with automation, and this takes place at many different levels. Rather than building systems directly in hardware, we have a processor that provides a convenient *abstraction* – that is to say, we can concern ourselves with the movement and processing of binary data, rather than the control of electrical signals. Furthermore, we do not write general purpose programs in assembler, but use an *abstracted* language in which we can talk about more meaningful concepts, such as objects, functions, and so forth.

The concept of abstraction does not end here, however. A programming language is not just a shorthand for sequences of assembler instructions – it has an underlying meaning, which is in some sense separate from the implementation. Over the course of time, our concept of the *semantics* of a language has developed, so that we now have an underlying mathematical framework with which to describe the execution of a program. In particular, an *operational* semantics is a specification of an abstract machine (an inductively defined transition relation), that explains the execution of a program as a sequence of syntactic transformations. Given this formal description of a programming language, is it not natural to ask whether a compiler could be generated automatically?

This is not as far-fetched as it sounds. Consider the humble parser. Before the theory of formal context-free grammars was understood, the programmer had to code their lexing and parsing routines by hand. Now, we have tools such as yacc, which will generate an efficient parser from a BNF-style description of a grammar. Although this is a considerably more constrained problem than the one just posed, it shows that useful tools can arise from the

*In this document, the term *compiler generator* is used to refer more generally to the automated generation of compilers, interpreters and abstract machines.

Semantics Directed Compiler Generation

Semantics Directed Compiler Generation:

Semantics-Directed Compiler Generation N. D. Jones, 2014-01-15 **Semantics-Directed Compiler Generation** ,

Semantics-directed Compiler Generation Neil D. Jones, 1980 Semantics and Algebraic Specification Jens

Palsberg, 2009-08-28 This Festschrift volume published to honor Peter D Mosses on the occasion of his 60th birthday includes 17 invited chapters by many of Peter's coauthors, collaborators, close colleagues and former students. Peter D Mosses is known for his many contributions in the area of formal program semantics. In particular, he developed action semantics, a combination of denotational, operational and algebraic semantics. The presentations given on a symposium in his honor in Udine, Italy, on September 10, 2009, were on subjects related to Peter's many technical contributions and they were a tribute to his lasting impact on the field. Topics addressed by the papers are: action semantics, security, policy design, colored Petri nets, order sorted parameterization and induction, object oriented action semantics, structural operational semantics, model transformations, the scheme programming language, type checking, action algebras and denotational semantics. Partial Evaluation and Automatic Program Generation Neil D. Jones, Carsten K. Gomard, Peter Sestoft, 1993 Partial evaluation reconciles generality with efficiency by providing automatic specialization and optimization of programs. This book covers the entire field of partial evaluation, provides simple and complete algorithms and demonstrates that specialization can increase efficiency.

Compiler Generators Mads Tofte, 2012-12-06 The Origin of this monograph is a course entitled Semantics directed Compiler Generation which Professor Neil D Jones gave in 1982 at Copenhagen University where I was a student at the time. In this course he described a compiler generator called CERES which he was developing. I immediately felt attracted to the unusual combination of mathematical reasoning about compilers and the small intricate building blocks that made up the running system. As I came to understand the system I discovered that within the existing mathematical framework one could express compiler generation as a special case of compilation. This led to a specification of a compiler generator which was bootstrapped on itself, resulting in a machine generated compiler generator. The purpose of this monograph is to describe the CERES system we produced in 1983-84 and compare it with other systems including more recent ones. Also, it is as relevant today as it was then to discuss the role of compiler generators as an aid in the design and implementation of programming languages. This I do in Chap 5. This monograph is a strongly revised version of the candid scientist.

Mathematical Foundations of Programming Language Semantics Michael Main, Austin Melton, Michael Mislove, David Schmidt, 1988-03-09 This volume is the proceedings of the 3rd Workshop on the Mathematical Foundations of Programming Language Semantics held at Tulane University, New Orleans, Louisiana, April 8-10, 1987. The 1st Workshop was at Kansas State University, Manhattan, Kansas, in April 1985 (see LNCS 239) and the 2nd Workshop with a limited number of participants was at Kansas State in April 1986. It was the intention of the organizers that the 3rd Workshop survey as many areas of the Mathematical Foundations of Programming Language Semantics as reasonably possible. The Workshop attracted 49

submitted papers from which 28 papers were chosen for presentation The papers ranged in subject from category theory and Lambda calculus to the structure theory of domains and power domains to implementation issues surrounding semantics

Conference Record of the Eighteenth Annual ACM Symposium on Principles of Programming Languages ,1991

Methods and Tools for Compiler Construction B. Lorho,1984 For a long time compiler construction was considered an operation to be carried out by only a few skilled specialists However over the past decade numerous theoretical advances have led to a methodology of compiler writing as well as to tools for automatic and semi automatic compiler construction This book is the result of an advanced course sponsored by the Commission of the European Communities and the Institut National de Recherche en Informatique et en Automatique The course Methods and Tools for Compiler Construction was held in Rocquencourt in December 1983 The volume places its emphasis on specific areas where significant improvements have been made including attribute grammars compilation from semantic definitions code generation and optimization and Ada compiling

Algol-like Languages Peter O'Hearn,Robert Tennent,1997 In recent years there has been a remarkable convergence of interest in programming languages based on ALGOL 60 Researchers interested in the theory of procedural and object oriented languages discovered that ALGOL 60 shows how to add procedures and object classes to simple imperative languages in a general and clean way And on the other hand researchers interested in purely functional languages discovered that ALGOL 60 shows how to add imperative mechanisms to functional languages in a way that does not compromise their desirable properties Unfortunately many of the key works in this field have been rather hard to obtain The primary purpose of this collection is to make the most significant material on ALGoL like languages conveniently available to graduate students and researchers

Functional Programming Languages and Computer Architecture John Hughes,1991-08-07 This book offers a comprehensive view of the best and the latest work in functional programming It is the proceedings of a major international conference and contains 30 papers selected from 126 submitted A number of themes emerge One is a growing interest in types powerful type systems or type checkers supporting overloading coercion dynamic types and incremental inference linear types to optimize storage and polymorphic types to optimize semantic analysis The hot topic of partial evaluation is well represented techniques for higher order binding time analysis assuring termination of partial evaluation and improving the residual programs a partial evaluator generates The thorny problem of manipulating state in functional languages is addressed one paper even argues that parallel programs with side effects can be more declarative than purely functional ones Theoretical work covers a new model of types based on projections parametricity a connection between strictness analysis and logic and a discussion of efficient implementations of the lambda calculus The connection with computer architecture and a variety of other topics are also addressed

Programming Language Implementation and Logic Programming Jan Małuszyński,Martin Wirsing,1991-08-14 This volume contains the papers which have been accepted for presentation atthe Third International Symposium on Programming Language

Implementation and Logic Programming PLILP 91 held in Passau Germany August 26-28 1991 The aim of the symposium was to explore new declarative concepts methods and techniques relevant for the implementation of all kinds of programming languages whether algorithmic or declarative ones The intention was to gather researchers from the fields of algorithmic programming languages as well as logic functional and object oriented programming This volume contains the two invited talks given at the symposium by H Ait Kaci and D B MacQueen 32 selected papers and abstracts of several system demonstrations The proceedings of PLILP 88 and PLILP 90 are available as Lecture Notes in Computer Science Volumes 348 and 456

Formalization of Programming Concepts J. Diaz, I. Ramos, 1981-04

Attribute Grammars Pierre Deransart, Martin Jourdan, Bernard Lorho, 1988-08-10 This book treats the problem of formulating models in mathematical programming and thereafter solving the resulting model Particular emphasis is placed on the interaction between the two The topic is viewed from different angles namely linear programming Walter Murray integer programming Ellis Johnson network flows John Mulvey and stochastic programming Roger J B Wets The book will be very useful for any mathematics programmer or operations researcher who works in the field of real world modelling The book is an important part of any university course in modelling particularly in operations research economics and business The book also contains an article on the origins of mathematical programming Alexander Rinnooy Kan This is important reading for anyone interested in the history of the field

Formal Methods: State of the Art and New Directions Paul Boca, Jonathan P. Bowen, Jawed Siddiqi, 2009-12-04 Through fundamental contributions from leading researchers this volume describes the use of formal modeling methods in the areas of requirements design and validation The self contained chapters provide readers with rich background information and a diverse breadth of specialist material

Semantic Methods for Knowledge Management and Communication Radosław Katarzyniak Katarzyniak, Tzu-Fu Chiu, Chao-Fu Hong, Ngoc-Thanh Nguyen, 2011-08-04 The book consists of 31 chapters in which the authors deal with multiple aspects of modeling utilization and implementation of semantic methods for knowledge management and communication in the context of human centered computing It is assumed that the modern human centered computing requires the intensive application of these methods as well as effective integration with multiple techniques of computational collective intelligence The book is organized in four parts devoted to the presentation of utilization of knowledge processing in agent and multiagent systems application of computational collective intelligence to knowledge management models for collectives of intelligent agents and models and environments tailored directly to human centered computing All chapters in the book discuss theoretical and practical issues related to various models and aspects of computational techniques for semantic methods which are currently studied and developed in many academic and industry centers over the world The editors hope that the book can be useful for graduate and PhD students of computer science as well as for mature academics researchers and practitioners interested in developing of modern methods for representation processing and distribution of knowledge in the context of human centered computing

and by means of computer based information systems It is the hope of the editors that readers of this volume can find in all chosen chapters many inspiring ideas and influential practical examples as well as use them in their current and future work

Intelligent Agents Michael J. Wooldridge, 1995-01-26 This volume coherently presents 24 thoroughly revised full papers accepted for the ECAI 94 Workshop on Agent Theories Architectures and Languages There is currently considerable interest from both the AI and the mainstream CS communities in conceptualizing and building complex computer systems as collections of intelligent agents This book is devoted to theoretical and practical aspects of architectural and language related design and implementation issues of software agents Particularly interesting is the comprehensive survey by the volume editors which outlines the key issues and indicates via a comprehensive bibliography topics for further reading In addition a glossary of key terms in this emerging field and a comprehensive subject index is included **Programming**

Logics Andrei Voronkov, Christoph Weidenbach, 2013-04-05 This Festschrift volume published in memory of Harald Ganzinger contains 17 papers from colleagues all over the world and covers all the fields to which Harald Ganzinger dedicated his work during his academic career The volume begins with a complete account of Harald Ganzinger's work and then turns its focus to the research of his former colleagues students and friends who pay tribute to him through their writing Their individual papers span a broad range of topics including programming language semantics analysis and verification first order and higher order theorem proving unification theory non classical logics reasoning modulo theories and applications of automated reasoning in biology **Compiler Compilers and High Speed Compilation** Dieter

Hammer, 1989 Advances and problems in the field of compiler compilers are the subject of the 2nd CCHSC Workshop which took place in Berlin GDR in October 1988 The 18 papers which were selected for the workshop are now included in this volume among them three invited papers They discuss the requirements properties and theoretical aspects of compiler compilers as well as tools and metatools for software engineering The papers cover a wide spectrum in the field of compiler compilers ranging from overviews of existing compiler compilers and engineering of compiler compilers to special problems of attribute evaluation generation and code generation In connection with compiler compiler projects means of supporting high speed compilation are pointed out Special attention is given to problems of incremental compilation **ESOP 86**

Bernard Robinet, 1986-03

Immerse yourself in heartwarming tales of love and emotion with is touching creation, Tender Moments: **Semantics Directed Compiler Generation** . This emotionally charged ebook, available for download in a PDF format (PDF Size: *), is a celebration of love in all its forms. Download now and let the warmth of these stories envelop your heart.

Semantics Directed Compiler Generation Introduction

Semantics Directed Compiler Generation Offers over 60,000 free eBooks, including many classics that are in the public domain. Open Library: Provides access to over 1 million free eBooks, including classic literature and contemporary works. Semantics Directed Compiler Generation Offers a vast collection of books, some of which are available for free as PDF downloads, particularly older books in the public domain. Semantics Directed Compiler Generation : This website hosts a vast collection of scientific articles, books, and textbooks. While it operates in a legal gray area due to copyright issues, its a popular resource for finding various publications. Internet Archive for Semantics Directed Compiler Generation : Has an extensive collection of digital content, including books, articles, videos, and more. It has a massive library of free downloadable books. Free-eBooks Semantics Directed Compiler Generation Offers a diverse range of free eBooks across various genres. Semantics Directed Compiler Generation Focuses mainly on educational books, textbooks, and business books. It offers free PDF downloads for educational purposes. Semantics Directed Compiler Generation Provides a large selection of free eBooks in different genres, which are available for download in various formats, including PDF. Finding specific Semantics Directed Compiler Generation, especially related to Semantics Directed Compiler Generation, might be challenging as theyre often artistic creations rather than practical blueprints. However, you can explore the following steps to search for or create your own Online Searches: Look for websites, forums, or blogs dedicated to Semantics Directed Compiler Generation, Sometimes enthusiasts share their designs or concepts in PDF format. Books and Magazines Some Semantics Directed Compiler Generation books or magazines might include. Look for these in online stores or libraries. Remember that while Semantics Directed Compiler Generation, sharing copyrighted material without permission is not legal. Always ensure youre either creating your own or obtaining them from legitimate sources that allow sharing and downloading. Library Check if your local library offers eBook lending services. Many libraries have digital catalogs where you can borrow Semantics Directed Compiler Generation eBooks for free, including popular titles. Online Retailers: Websites like Amazon, Google Books, or Apple Books often sell eBooks. Sometimes, authors or publishers offer promotions or free periods for certain books. Authors Website Occasionally, authors provide excerpts or short stories for free on their websites. While this might not be the Semantics Directed Compiler Generation full book , it can give you a taste of the authors writing style. Subscription Services Platforms like Kindle Unlimited or Scribd offer subscription-based access to a wide range of Semantics Directed Compiler Generation eBooks, including some popular titles.

FAQs About Semantics Directed Compiler Generation Books

1. Where can I buy Semantics Directed Compiler Generation books? Bookstores: Physical bookstores like Barnes & Noble, Waterstones, and independent local stores. Online Retailers: Amazon, Book Depository, and various online bookstores offer a wide range of books in physical and digital formats.
2. What are the different book formats available? Hardcover: Sturdy and durable, usually more expensive. Paperback: Cheaper, lighter, and more portable than hardcovers. E-books: Digital books available for e-readers like Kindle or software like Apple Books, Kindle, and Google Play Books.
3. How do I choose a Semantics Directed Compiler Generation book to read? Genres: Consider the genre you enjoy (fiction, non-fiction, mystery, sci-fi, etc.). Recommendations: Ask friends, join book clubs, or explore online reviews and recommendations. Author: If you like a particular author, you might enjoy more of their work.
4. How do I take care of Semantics Directed Compiler Generation books? Storage: Keep them away from direct sunlight and in a dry environment. Handling: Avoid folding pages, use bookmarks, and handle them with clean hands. Cleaning: Gently dust the covers and pages occasionally.
5. Can I borrow books without buying them? Public Libraries: Local libraries offer a wide range of books for borrowing. Book Swaps: Community book exchanges or online platforms where people exchange books.
6. How can I track my reading progress or manage my book collection? Book Tracking Apps: Goodreads, LibraryThing, and Book Catalogue are popular apps for tracking your reading progress and managing book collections. Spreadsheets: You can create your own spreadsheet to track books read, ratings, and other details.
7. What are Semantics Directed Compiler Generation audiobooks, and where can I find them? Audiobooks: Audio recordings of books, perfect for listening while commuting or multitasking. Platforms: Audible, LibriVox, and Google Play Books offer a wide selection of audiobooks.
8. How do I support authors or the book industry? Buy Books: Purchase books from authors or independent bookstores. Reviews: Leave reviews on platforms like Goodreads or Amazon. Promotion: Share your favorite books on social media or recommend them to friends.
9. Are there book clubs or reading communities I can join? Local Clubs: Check for local book clubs in libraries or community centers. Online Communities: Platforms like Goodreads have virtual book clubs and discussion groups.
10. Can I read Semantics Directed Compiler Generation books for free? Public Domain Books: Many classic books are available for free as they're in the public domain. Free E-books: Some websites offer free e-books legally, like Project Gutenberg or Open Library.
