has yet suggested but perhaps for different reasons Surfing the Gnarl Rudy Rucker, 2012-01-25 The original Mad Professor of cyberpunk Rudy Rucker along with fellow outlaws William Gibson and Bruce Sterling transformed modern science fiction tethering the gnarly speculations of quantum physics to the noir sensibilities of a skeptical and disenchanting generation In acclaimed novels like *Wetware* and *The Hacker* and the *Ant* he mapped a neotopian future that belongs not to sober scientists but to drug addled sex crazed youth And won legions of fans doing it In his outrageous new story *The Men in the Back Room* at the Country Club Dr Rucker infiltrates fundamentalist Virginia to witness the apocalyptic clash between Bible thumpers and Saucer Demons at a country club barbecue He shoots erotica into orbit with *Rapture in Space* to explore the future of foreplay in freefall In his gonzo nonfiction masterpiece *Surfing the Gnarl* he documents the role of the Transreal in transforming both the personal and the political distinguishes with mathematical precision between high gnarl and low gnarl in literature and life and argues for remaking popular culture as a revolutionary project And Featuring PM's exclusive Outspoken Interview in which the author explains Infinity deconstructs his own outrageous film career answers one Jeopardy question and finally reveals the truth about Time All under oath You'll never be the same Is that good or bad Your call

The History of the Science-fiction Magazine Michael Ashley, 2000 Fourth volume in Mike Ashley's acclaimed set on the history of science fiction magazines This volume looks at the 1980s **Technologies of the Gendered Body** Anne Marie Balsamo, 1996 This book looks at the representation of the body in culture from a feminist perspective Subjects covered include bodybuilding cosmetic surgery and cyberculture **Transhumanism** David Livingstone, 2015-09-02 Transhumanism is a recent movement that extols man's right to shape his own evolution by maximizing the use of scientific technologies to enhance human physical and intellectual potential While the name is new the idea has long been a popular theme of science fiction featured in such films as 2001 A Space Odyssey *Blade Runner* the *Terminator* series and more recently *The Matrix* *Limitless* *Her* and *Transcendence* However as its adherents hint at in their own publications transhumanism is an occult project rooted in Rosicrucianism and Freemasonry and derived from the Kabbalah which asserts that humanity is evolving intellectually towards a point in time when man will become God Modeled on the medieval legend of the Golem and *Frankenstein* they believe man will be able to create life itself in the form of living machines or artificial intelligence Spearheaded by the Cybernetics Group the project resulted in both the development of the modern computer and MK Ultra the CIA's mind control program MK Ultra promoted the mind expanding potential of psychedelic drugs to shape the counterculture of the 1960s based on the notion that the shamans of ancient times used psychoactive substances equated with the apple of the Tree of Knowledge And as revealed in the movie *Lucy* through the use of smart drugs and what transhumanists call mind uploading man will be able to merge with the Internet which is envisioned as the end point of Kabbalistic evolution the formation of a collective consciousness or Global Brain That awaited moment is what Ray Kurzweil a director of engineering at Google refers to as The Singularity By accumulating the total of human knowledge and providing

access to every aspect of human activity the Internet will supposedly achieve omniscience becoming the God of occultism or the Masonic All Seeing Eye of the reverse side of the American dollar bill Terminal Identity Scott Bukatman,1993 Scott Bukatman's *Terminal Identity* referring to both the site of the termination of the conventional subject and the birth of a new subjectivity constructed at the computer terminal or television screen puts to rest any lingering doubts of the significance of science fiction in contemporary cultural studies Demonstrating a comprehensive knowledge both of the history of science fiction narrative from its earliest origins and of cultural theory and philosophy Bukatman redefines the nature of human identity in the Information Age Drawing on a wide range of contemporary theories of the postmodern including Fredric Jameson Donna Haraway and Jean Baudrillard Bukatman begins with the proposition that Western culture is suffering a crisis brought on by advanced electronic technologies Then in a series of chapters richly supported by analyses of literary texts visual arts film video television comics computer games and graphics Bukatman takes the reader on an odyssey that traces the postmodern subject from its current crisis through its close encounters with technology and finally to new self recognition This new virtual subject as Bukatman defines it situates the human and the technological as coexistent codependent and mutually defining Synthesizing the most provocative theories of postmodern culture with a truly encyclopedic treatment of the relevant media this volume sets a new standard in the study of science fiction a category that itself may be redefined in light of this work Bukatman not only offers the most detailed map to date of the intellectual terrain of postmodern technology studies he arrives at new frontiers providing a propitious launching point for further inquiries into the relationship of electronic technology and culture *Science Fiction Double Feature* J. P. Telotte,Gerald Duchovnay,2015-07-27 Critical discussion of cult cinema has often noted its tendency to straddle or ignore boundaries to pull together different sets of conventions narrative formulas or character types for the almost surreal pleasure to be found in their sudden juxtapositions or narrative combination With its own boundary blurring nature as both science and fiction reality and fantasy science fiction has played a key role in such cinematic cult formation This volume examines that largely unexplored relationship looking at how the sf film's own double nature neatly matches up with a persistent double vision common to the cult film It does so by bringing together an international array of scholars to address key questions about the intersections of sf and cult cinema how different genre elements directors and stars contribute to cult formation what role fan activities including con participation play in cult development and how the occulted or bad sf cult film works The volume pursues these questions by addressing a variety of such sf cult works including *Robot Monster* 1953 *Zardoz* 1974 *A Boy and His Dog* 1975 *Tetsuo* *The Iron Man* 1989 *Space Truckers* 1996 *Ghost in the Shell 2* 2004 and *Iron Sky* 2012 What these essays afford is a revealing vision of both the sf aspects of much cult film activity and the cultish aspects of the whole sf genre **Decoding Gender in Science Fiction** Brian Attebery,2014-01-02 From *Frankenstein* to futuristic feminist utopias *Decoding Gender in Science Fiction* examines the ways science fiction writers have incorporated explored and revised

conventional notions of sexual difference Attebery traces a fascinating history of men's and women's writing that covertly or overtly investigates conceptions of gender suggesting new perspectives on the genre **Science Fiction** David Seed, 2011-06-23 Science Fiction has proved notoriously difficult to define It has been explained as a combination of romance science and prophecy as a genre based on an imagined alternative to the reader's environment and as a form of fantastic fiction and historical literature It has also been argued that science fiction narratives are the most engaged socially relevant and responsive to the modern technological environment This Very Short Introduction doesn't offer a history of science fiction but instead ties examples of science fiction to different historical moments in order to demonstrate how science fiction has evolved over time David Seed looks not only at literature but also at drama and poetry as well as film Examining recurrent themes in science fiction he looks at voyages into space the concept of the alien and alternative social identities the role of technology in science fiction and its relation to time in the past present and future ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable
