self and society **Fashion Meets Socialism** Jukka Gronow, Sergey Zhuravlev, 2015-08-19 This book presents above all a study of the establishment and development of the Soviet organization and system of fashion industry and design as it gradually evolved in the years after the Second World War in the Soviet Union which was in the understanding of its leaders reaching the mature or last stage of socialism when the country was firmly set on the straight trajectory to its final goal Communism What was typical of this complex and extensive system of fashion was that it was always loyally subservient to the principles of the planned socialist economy This did not by any means indicate that everything the designers and other fashion professionals did was dictated entirely from above by the central planning agencies Neither did it mean that their professional judgment would have been only secondary to ideological and political standards set by the Communist Party and the government of the Soviet Union On the contrary as our study shows the Soviet fashion professionals had a lot of autonomy They were eager and willing to exercise their own judgment in matters of taste and to set the agenda of beauty and style for Soviet citizens The present book is the first comprehensive and systematic history of the development of fashion and fashion institutions in the Soviet Union after the Second World War Our study makes use of rich empirical and historical material that has been made available for the first time for scientific analysis and discussion The main sources for our study came from the state party and departmental archives of the former Soviet Union We also make extensive use of oral history and the writings published in Soviet popular and professional press Fashion and Materiality Heike Jenss, Viola Hofmann, 2019-10-17 Fashion is intimately tied to the material world With a focus on diverse cultural practices this book offers new insights into the dynamic relationships between fashion bodies and material culture In a series of original case studies both historical and contemporary the collection explores how fashion and clothing affect articulations of body and self experiences of time and place and the shaping of social and local global relationships With chapters from leading international scholars Fashion and Materiality takes the reader from the study of clothing and biography and an early modern foreign dress collection to Chinoiserie clothing in 18th century Europe and fast fashion production in today's China The book also examines fashion's role in nation building and entanglements between fashion and migration across clothing donations for Syrian refugees in Germany and the circulation of refugee chic on international fashion runways Scrutinizing the dense connections between fashion clothing materiality and humanity the book shows how the material interacts forcefully with the personal and political **Leather Craft Manual** Ivy Evelyn Norman, 2016-09-06 Detailed in this text are a variety of leatherworking techniques and guides that will instruct the reader on how to make plethora of serviceable and decorative items Accessible and detailed this compendium comes complete with helpful illustrations and photographs which will enable even the amateur to create a range of attractive and useful items out of leather Chapters contained within this text include History of Tanning The Sources of Hides and Skins Preparation of Hides and Skins for Tanning Tanning or Making into Leather Dyeing Leathers Staining and Finishing Leathers and General Notes on Leathers This text has been
