intelligence systems The involvement of the artificial intelligence systems in these offenses may be as perpetrators accomplices or mere instruments The general legal theory proposed in this book is based on the current criminal law in most modern legal systems In most modern countries unmanned vehicles sophisticated surgical systems industrial computing systems trading algorithms and other artificial intelligence systems are commonly used for both industrial and personal purposes The question of legal liability arises when something goes wrong e g the unmanned vehicle is involved in a car accident the surgical system is involved in a surgical error or the trading algorithm is involved in fraud etc Who is to be held liable for these offenses the manufacturer the programmer the user or perhaps the artificial intelligence system itself The concept of liability for crimes involving artificial intelligence systems has not yet been widely researched Advanced technologies are forcing society to face new challenges both technical and legal The idea of liability in the specific context of artificial intelligence systems is one such challenge that should be thoroughly explored

**The Criminalization of European Cartel Enforcement** Peter Whelan, 2014-08-07 Cartel activity is prohibited under EU law by virtue of Article 101 1 of the Treaty on the Functioning of the European Union Firms that violate this provision face severe punishment from those entities responsible for enforcing EU competition law the European Commission the national competition authorities and the national courts Stiff fines are regularly imposed on firms by these entities such firm focused punishment is an established feature of the antitrust enforcement landscape within the EU In recent years however focus has also been placed on the individuals within the firms responsible for the cartel activity It is increasingly recognized that punishment for cartel activity should be individual focused as well as firm focused Accordingly a growing tendency to criminalize cartel activity can be observed in the EU Member States The existence of such criminal sanctions within the EU presents a number of crucial challenges that need to be met if the underlying enforcement objectives are to be achieved in practice without violating prevailing legal norms For a start given the severe consequences of a custodial sentence the employment of criminal antitrust punishment must be justifiable in principle one must have a robust normative framework rationalizing the existence of criminal cartel sanctions Second for it to be legitimate antitrust criminalization should only occur in a manner that respects the mandatory legalities applicable to the European jurisdiction in question These include the due process rights of the accused and the principle of legal certainty Finally the correct practical measures such as a criminal leniency policy and a correctly defined criminal cartel offence need to be in place in order to ensure that the employment of criminal antitrust punishment actually achieves its aims while maintaining its legitimacy These three particular challenges can be conceptualized respectively as the theoretical legal and practical challenges of European antitrust criminalization This book analyses these three crucial challenges so that the complexity of the process of European antitrust criminalization can be understood more accurately In doing so this book acknowledges that the three challenges should not be considered in isolation In fact there is a dynamic relationship between the theoretical legal and practical challenges of European antitrust

criminalization and an effective antitrust criminalization policy is one which recognizes and respects this complex interaction

*Crime and Justice in Contemporary Japan* Jianhong Liu, Setsuo Miyazawa, 2017-12-15 This book provides an important overview of key criminology and criminal justice concerns in Japan It highlights similarities between the practice of criminology research in Japan as well as important differences with other areas of Asia and with the West In previous decades Japan attracted international attention as the only industrialized country where the crime rate declined along with a rise in urbanization and economic development Currently Japan still enjoys a declining crime rate the lowest among major industrialized countries and a study of criminal justice practices in Japan may provide important insights for other regions Japan also experiences important contemporary challenges which are shared by other regions 1 Japan has the highest proportion of people over the age of 60 in the world For criminology this means key challenges in the victimization of older people as well as the challenges of an aging prison population 2 Besides the United States Japan is the only developed country that still practices capital punishment and its rate has been on the rise in the past 20 years 3 Japan has also introduced new reforms in its law practice including the introduction of new trial formats The research in this book provides a helpful overview for scholars interested in criminology and criminal justice in Japan to understand the key issues of concern and present a framework for future research needs It will be of interest to researchers in criminology and criminal justice international studies Asian Studies sociology and political science

**Enforcing Pollution Control Regulation** Carolyn Abbot, 2009-05-18 Monitoring and enforcement issues must be analysed when determining the effectiveness of pollution control regulation and clearly influence choices about how to regulate This book demonstrates how an economic analysis of law enforcement can generate important insights into how best to enforce pollution control regulation It seeks to provide a clear and accessible way into the law and economics literature on enforcement More specifically it uses Gary Becker's deterrence model which by differentiating between two enforcement variables namely the probability of apprehension and

conviction and the severity of sanction facilitates a comparison of the effectiveness of different enforcement tools in inducing desirable behaviour. As such it provides a valuable analytical tool in considering how best to pursue cost effective enforcement. Major themes to be addressed include Becker's deterrence model and expansions thereof, reasons for compliance, environmental enforcement strategies and the importance of a deterrence threat and formal pollution control law enforcement mechanisms such as prosecution and criminal sanctions, administrative mechanisms and civil liability. The book argues that in pursuing cost effective enforcement much can be learned from examining enforcement practices in different jurisdictions and to this end the author examines pollution control laws, enforcement strategies and sanctions in Australia, Canada and England and Wales. The book makes an important contribution to existing literature on environmental law enforcement but its value extends beyond this. The theoretical framework adopted and the range of issues discussed make it of interest to regulatory and public law scholars more generally.

Criminal Law for Criminologists Noel

Cross, 2020-03-09 Criminal Law for Criminologists uses theoretical and practical research to bridge the gap between the law in the books, criminal law doctrine and the law in action, criminal justice process. It introduces the key policies and principles that drive criminal law in England and then explains the law itself in terms of relevant statute and case law. Starting with an outline of the basic principles and theories of criminal law and criminal justice, the author goes on to discuss Criminal law and criminal justice in historical perspective. General principles of criminal law including actus reus and mens rea. Specific types of criminal offence including property, homicide, sexual, public order and drug offences. An overview of defences to crime. An appendix outlining essential legal skills. In examining the links between the worlds of criminal law and criminal justice, Criminal Law for Criminologists brings a fresh perspective to this field of research. Written in a clear and direct style, this book will be essential reading for students of criminology, criminal justice, law, cultural studies, social theory and those interested in gaining an introduction to criminal law.

**Contemporary Challenges to Criminal Justice** Paul

Behrens, 2023-12-28 This study provides a critical examination of seminal issues within the main areas of criminal justice: its theoretical framework, domestic and comparative criminal justice, transnational and international criminal law. Exploring some of the most interesting challenges arising in these fields, it examines the impact of public morality on sentencing policy, murder and the mandatory life sentence, genocide and the notion of magnitude and incitement to terrorism. Taking an approach that is fully integrated in contemporary criminal justice scholarship, it offers a diverse and expert perspective. With a comprehensive introduction and conclusion drawing the various strands together, it offers a rigorous, coherent overview of the key issues in play in contemporary international criminal justice. This diversity and expertise ensures its appeal to a large
