Miller, 2025-06-03 During the early modern period unprecedented migration caused diseases to take hold in new locales  
turning illness and the human body into battlegrounds for competing religious beliefs as well as the colonial agendas in  
which they were often ensnared This interdisciplinary volume follows the contours of illness epidemics and cures in the early  
modern British and Spanish Empires as these were understood in religious terms Each chapter of this volume centers on a  
key moment during this period of remarkable upheaval including Jesuit co optation of Indigenous knowledge in Peru the  
Catholic Church s dissemination of the smallpox vaccine across the Spanish Empire Puritan collective fasting during smallpox  
outbreaks and the practice of eating dirt as Obeah resistance among enslaved people in Jamaica Throughout the contributors  
explore how the porous geographical borders of the transatlantic world meant that medicine and religion were translated  
through and against each other over and over again Residing at the nexus between two largely discrete areas of inquiry this  
collection provides significant insight into the numerous points of juncture between medicine and religion in the Atlantic  
world In addition to the editor the contributors to this volume include Matthew James Crawford Crawford Gribben Rana A
