**Rescue of Sturgeon Species in the Ural River Basin** Viktor Lagutov, 2008-10-22 While almost every aspect of society nature interactions can be treated as an environmental security issue the threats to human societies originating from inadequate freshwater management constitute one of the most widespread and pressing problems For thousands of years rivers and river valleys have been the cradle of human civilizations Rivers have provided not only food and freshwater but also shelter and means of transportation and they are still an essential component in every national and regional economy In turn growing needs of human societies accompanied by growing abilities have caused significant river alterations and ecosystem changes that have resulted in river contamination biodiversity loss and general riverine ecosystem degradation The extinction of sturgeon species is one of the most eloquent examples of the negative and irreversible influence of human society on river ecosystems The sturgeon sometimes called the living fossil or living dinosaur of the fish world is known to have lived since the time of the dinosaurs for at least 250 million years and is currently on the verge of extinction solely due to anthropogenic impacts *Regional Conference on River Habitat Restoration for Inland Fisheries in the Danube River Basin and Adjacent Black Sea Areas* Food and Agriculture Organization of the United Nations, 2019-09-05 Inland waterway management is complex and faces unique challenges as inland waterways have a variety of users The mixture and overlap of local regional national and at times international regulations exacerbate the problem of managing inland waterways In this context the regional conference River habitat restoration for inland fisheries in the Danube River basin and adjacent Black Sea areas was held on 13-15 November 2018 in Bucharest Romania This event was organised by the FAO Regional office for Europe and Central Asia in partnership with the International Organisation for the Development of Fisheries and Aquaculture in Europe EUROFISH and EIFAAC and hosted by the Ministry of Agriculture and Rural Development and the Ministry of Waters and Forests of Romania This event offered a unique opportunity for stakeholders to share their experience of the issues affecting the sustainability of the Danube river and Black Sea regions Over 100 attendees from local community level fisherman and farmers to academics and national and EU level representatives interacted with 27 invited speakers Each speaker focused on one of four session subjects Valuing Inland Fisheries Resources Conservation and Management Regulatory Framework and Shared Country Experiences A round table discussion concluded the conference with all

participants invited to express their thoughts and discuss the issues affecting sustainability and inland fisheries in the Danube river basin and the Black Sea The key findings from this concluding discussion have been compiled into a list of conference recommendations included in this publication *Serbia and Montenegro* David C. King,Debbie Nevins,2020-07-15 For a long time the national identities of the people of Serbia and Montenegro were shared as they lived under one country However in recent years Serbia and Montenegro have become their own nations Your readers will discover the details behind this split as they examine the similarities and differences between these neighboring nations Using the most current information available this volume takes readers through the complicated history of these two countries and summarizes their unique ethnic groups and cultural backgrounds Vibrant photographs of life in Serbia and Montenegro accompany sidebars maps and recipes to create an engaging learning experience Human Impact on Danube Watershed Biodiversity in the XXI Century Doru Bănăduc,Angela Curtean-Bănăduc,Franco Pedrotti,Kevin Cianfaglion,John R. Akeroyd,2020-04-20 The second longest European river after the Volga the Danube is one of the world s most important rivers in terms of its geographical and historical significance In recent history it has served as a major international waterway and numerous cities including four capitals have been founded on its banks The 2826km long Danube has a watershed measuring 801 093 km<sup>2</sup> that is now shared between 19 countries from its source in the Black Forest to the Black Sea into which it pumps an average of 827 km<sup>3</sup> of water a year This book describes and explains key landscape values interactions geographical cultural and natural heritage It also identifies the threats and various types of human impact affecting this system in all the countries of the Danube River Basin based on the investigations and perspectives of a team of experienced naturalists and in the context of the early 21st century in which the human nature relationship is still far from balanced These studies demonstrate how biodiversity conservation and ecological studies can help us successfully promote mutual cooperation and combine our efforts to address problems as a responsible continent **Ecohydrology & Hydrobiology**,2004 The international journal Ecohydrology target ecological principle necessity of enhancing ecosystem absorbing capacity and ecosystem services and management tool ecological engineering the use of ecosystem properties for regulation the interplay between hydrology and biota The journal encourages the submission of manuscripts which adopt an integrative approach to aquatic sciences explaining ecological and hydrological processes at a river basin scale or propose practical applications of this knowledge It will also consider papers in other hydrobiological fields Especially welcome are papers on regulatory mechanism within biocenosis and the resistance and resilience of freshwater and costal zones ecosystems There is no page charge for published papers All submitted papers written exclusively in English should be original works unpublished and not under consideration for publication elsewhere All papers are peer reviewed The following types of papers are considered for publication in E H original research papers invited or submitted review papers short communications **Environmental Security in Watersheds: The Sea of Azov** Viktor Lagutov,2011-10-23 Watersheds

supplying crucial ecosystem services to humans seem to be a logical territorial unit to integrate societal benefits and environmental needs in order to evaluate the sustainability of natural resource use patterns Based on this belief the book is an attempt to initiate a comprehensive environmental security assessment in the basin of the Azov Sea shared by Russia and Ukraine Though the region provides a variety of essential services and plays a strategic role in national and international development plans it has been excluded from most regional environmental discussions At the same time there is an alarming degradation rate of basin freshwater ecosystems that has occurred due to overutilization of certain prioritized services e g transportation The collapse of neglected services e g fishery and freshwater supply poses serious threats to the national economies as well as the local population and to mitigate these threats priority in water management should be given to securing sustainability of the regional freshwater ecosystems In addition to the review of the current status of Azov ecosystem services the authors analyze likely future availability and challenges The relevant experience derived from basin management of the Black Sea and other similar basins is also discussed

Action Plan for the Conservation of Sturgeons (Acipenseridae) in the Danube River Basin Jürg Bloesch, 2006-01-01 Six species of sturgeons are native to the Danube River Basin The need for conservation action is urgent given that recent observations in the Lower Danube indicate that all sturgeon populations are near extinction Due to the high commercial value of sturgeon products in particular caviar the pressure from poaching and illegal trade remains intense These species will not survive unless fishing practices are greatly addressed and both migration routes and habitats for all life cycle stages are protected Through national action and international co ordination this action plan aims to secure viable populations of all Danube sturgeon species by sustainable management and restoration of their natural habitats and migratory corridors

**Ecological Sustainability of Fish Resources of Inland Waters of the Western Balkans** Vladica Simić, Snežana Simić, Vladimir Pešić, 2023-12-31 This book provides a detailed evaluation of the hydro ecological characteristics of the Western Balkans an area characterized by still preserved inland waters and fish resources important for the European

continent as well as the biodiversity of inland waters important for the planet Earth Freshwater ecosystems cover only 1% of the Earth's surface however they are a habitat for about 40% of fish species At the same time inland fisheries make less than 12% of the world's global fish catch with 43% coming from low income and food deficient countries Africa South America Southeast Asia In Europe the Western Balkans have significant fishing waters and fish resources including the Middle Danube drainage Sava Drina Velika Morava river systems large ancient lakes Skadar Shkodra Ohrid Prespa Dojran and the Adriatic basin characterized by endemic and commercially important species However in contrast to the high fishing potential in a significant part of the Western Balkans diverse and specific political economic and social factors largely had a negative impact on the state of fish resources This volume is multidisciplinary and provides a sound knowledge base for scientific and practical fisheries In addition it may be a valuable guide for managers and conservationists worldwide to adapt methods and procedures for the ecological sustainability of fish resources under specific local natural and socio economic conditions Finally the content is a good reference for natural sciences and agriculture students studying fish fish resources and fisheries sciences It would improve their knowledge and perspectives on the challenges of sustainable use and conservation of inland water resources Sturgeon biodiversity and conservation Vadim J. **Theatre of Conscience 1939-53** Peter Billingham, 2013-12-16 Theatres of Conscience offers an invaluable and essential insight into four touring British theatre companies whose work and contributions to post war British theatre have largely gone unnoticed Combining a rigorous scholarly evaluation of their work and their broadly ideological and ethical contribution to wider post war developments in British theatre Peter Billingham offers the reader a unique insight into four companies which motivated by enthusiasm principles and creative innovation sought to take the theatre of conscience to theatre less

communities in wartime Britain and during the following decade Contemporaries of amongst others Joan Littlewood's Theatre Workshop the Pilgrim Players the Adelphi Players the Compass Players and the Century Theatre represent a significant but rather overlooked phase in the development of twentieth century British theatre

**Serbia and the Balkan Front, 1914** James Lyon, 2015-07-30 Winner of the 2015 Norman B Tomlinson Jr Book Prize Serbia and the Balkan Front 1914 is the first history of the Great War to address in depth the crucial events of 1914 as they played out on the Balkan Front James Lyon demonstrates how blame for the war's outbreak can be placed squarely on Austria Hungary's expansionist plans and internal political tensions Serbian nationalism South Slav aspirations the unresolved Eastern Question and a political assassination sponsored by renegade elements within Serbia's security services In doing so he portrays the background and events of the Sarajevo Assassination and the subsequent military campaigns and diplomacy on the Balkan Front during 1914 The book details the first battle of the First World War the first Allied victory and the massive military humiliations Austria Hungary suffered at the hands of tiny Serbia while discussing the oversized strategic role Serbia played for the Allies during 1914 Lyon challenges existing historiography that contends the Habsburg Army was ill prepared for war and shows that the Dual Monarchy was in fact superior in manpower and technology to the Serbian Army thus laying blame on Austria Hungary's military leadership rather than on its state of readiness Based on archival sources from Belgrade Sarajevo and Vienna and using never before seen material to discuss secret negotiations between Turkey and Belgrade to carve up Albania Serbia's desertion epidemic its near surrender to Austria Hungary in November 1914 and how Serbia became the first belligerent to openly proclaim its war aims Serbia and the Balkan Front 1914 enriches our understanding of the outbreak of the war and Serbia's role in modern Europe It is of great importance to students and scholars of the history of the First World War as well as military diplomatic and modern European history

**The Adelphi Players** Dr Cecil Davies, 2013-12-16 Cecil Davies The Adelphi Players The Theatre of Persons represents a uniquely interesting contribution to our understanding of touring British theatre in the mid twentieth century post war period This book will interest everyone whether student academic or general reader who wants to know more about issues concerning the recent history of British theatre In their values and aims the Adelphi Players pre-empted many of the post war developments that we associate with the non-commercial fringe and community theatre movement In Richard Heron Ward founder of the Adelphi Players we encounter a dramatist novelist essayist and poet who has been unusually neglected in terms of our appreciation of the English literature of the broad left in the 1930s 40s and 50s The Adelphi Players has been edited by Peter Billingham who has also provided an introduction placing Ward and the Adelphi players in the wider social cultural and ideological context
