Marx Engels Selected Works In 2vol Volume 2:

Lukács: Praxis and the Absolute Daniel Andrés López, 2019-10-14 Georg Lukács's philosophy of praxis penned between 1918 and 1928 remains a revolutionary and apocryphal presence within Marxism. His *History and Class Consciousness* has inspired a century of rapture and reprobation perhaps as Gillian Rose suggested because of its invitation to hermeneutic anarchy. In *Lukács Praxis and the Absolute* Daniel Andrés López radicalises Lukács's famous return to Hegel by reassembling his 1920s philosophy as a conceptual historical totality. This speculative reading defends Lukács while proposing an unprecedented immanent critique. While Lukács's concept of praxis approaches the shape of Hegel's Absolute, it tragically fails to bear its weight. However, as López argues, Lukács's failure was productive: it raises crucial political, methodological, and philosophical questions for Marxism, offering to redeem a lost century. *Literature of Revolution* Norman Geras, 2017-09-19 Essential essays on key Marxist writers from a leading political thinker. *Literature of Revolution* explores the pivotal texts and topics in the Marxist tradition, drawing on the works of Marx, Trotsky, Luxemburg, Lenin, and Althusser. In close dialogue with common themes and arguments in revolutionary Marxist thought, Geras brings some of his persistent preoccupations to the fore: the relationship between Marxism and justice, the debates on political organization and the role of revolutionary mass action and party pluralism, as well as an enthralling exploration into the literary power of Trotsky's writing. *Education and Management* Mark Zhou, 2011-07-22 This four-volume set (CCIS 208, 209, 210, 211) constitutes the refereed proceedings of the International Symposium on Applied Economics, Business, and Development (ISAEBD 2011) held in Dalian, China, in August 2011. The papers address issues related to Applied Economics, Business, and Development and cover various research areas including Economics, Management, Education, and its Applications. **Karl Marx and Friedrich Engels (RLE Marxism)** Cecil L. Eubanks, 2015-04-17 The project to publish the works of Marx and Engels continues, and this book, published in 1984, puts together a comprehensive bibliography of their works, either written in or translated into English, including books, monographs, articles, chapters, and doctoral dissertations, together with the works of their interpreters. The inclusion of the secondary literature makes this a particularly valuable bibliography and contributes greatly to the understanding of the thought of Marx and Engels. **Karl Marx's Social and Political Thought** Bob Jessop, Russell Wheatley, 1999

Endogenous Origins of Economic Reforms in India and China Rajiv G. Maluste, 2011-07 Attitudinal change in the context of economic reforms has been referred to in Rodrik and Subramanian 2005, DeLong 2003, Kohli 1989, and Panagariya 2004, 2008. This dissertation provides empirical support for this literature, establishing an earlier start for India's economic policy liberalisation than presented in stylized accounts. It demonstrates the endogenous nature of the origins of these policy shifts. Attitudinal change literature had directed attention to the need for further research into India's policy changes of the early 1980s and for studying broader comparability issues in other developing countries. This research makes a contribution towards filling these gaps. This dissertation shows that India started its economic liberalisation under the Indira Gandhi

administration from 1980 to 1984 These findings depart from the conventional view that India's economic policy changes were initiated by the Narasimha Rao government in 1991 or by the Rajiv Gandhi administration in the mid to late 1980s The dissertation establishes that policy shifts of the early 1980s had endogenous origins in the political leadership's attitudinal changes The Indira Gandhi administration of the early 1980s revisited the statist policies of its previous tenure from 1966 to 1977 The new approach entailed more openness towards private enterprise scaling back the role of the public sector and starting India's integration into the global economy The dissertation also discusses the comparable role of attitudinal changes at the start of China's policy liberalisation led by Deng Xiaoping from 1978 to 1982 It focuses on the significance and challenges faced by China's political leadership in bringing about societal attitudinal change The dissertation concludes by drawing comparisons between India and China developing a linkage between their endogenous attitudinal changes and economic policy liberalisation

All that is Solid Melts Into Air Marshall Berman, 1983 The experience of modernization the dizzying social changes that swept millions of people

into the capitalist world and modernism in art literature and architecture are brilliantly integrated in this account *The Fascist Revolution in Tuscany, 1919-22* Frank Snowden, 2004-03-11 This 1989 book is a detailed study of the social origins of the fascist reaction in Tuscany which played a key role in the rise of Italian fascism to power Tuscan fascism was second to none in its violence organisational strength intransigence and missionary zeal The central question is who supported fascism and why To what extent did Tuscany a major agricultural region conform to national patterns What are the implications of the pattern of support for fascism in Tuscany for the wider interpretation of the movement Dr Snowden offers a thematic approach discussing in turn agrarian fascism industrial and urban activity and relations between the black shirts and state officials Thus the significance of the fascist militancy of particular social groups and classes can be assessed for the period between the mass strikes in 1919 and the end of labour militancy marked by the beginning of the fascist dictatorship

Heaven on Earth Richard Landes, 2011-08-04 Millennialists through the ages have looked forward to the apocalyptic moment that will radically transform society into heaven on earth They have delivered withering critiques of their own civilizations and promised both the impending annihilation of the forces of evil and the advent of a perfect society And all their promises have invariably failed We tend therefore to dismiss these prophets of doom and salvation as crackpots and madmen and not surprisingly historians of our secular era have tended to underestimate their impact on our modern world Now Richard Landes offers a lucid and ground breaking analysis of this widely misunderstood phenomenon This long awaited study shows that many events typically regarded as secular including the French Revolution Marxism Bolshevism Nazism not only contain key millennialist elements but follow the apocalyptic curve of enthusiastic launch disappointment and often catastrophic re entry into normal time Indeed as Landes examines the explicit millennialism behind such recent events as the emergence of Global Jihad since 1979 he challenges the common notion that modern history is largely driven by secular interests By focusing on ten widely different case studies none of which come from Judaism or Christianity he shows that millennialism is not only a cultural universal but also an extremely adaptive social phenomenon that persists across the modern and post modern divides At the same time he also offers valuable insight into the social and psychological factors that drive such beliefs Ranging from ancient Egypt to modern day UFO cults and global Jihad *Heaven on Earth* both delivers an eye opening revisionist argument for the significance of millennialism throughout history and alerts the reader to the alarming spread of these ideologies in our world today
