Marxist Ethical Theory In The Soviet Union:

Marxist Ethical Theory in the Soviet Union P.T. Grier, 2012-12-06 A survey of the intellectual history of Marxism through its several phases and various national adaptations suggests for any of at least three reasons that the attempt to provide a widely acceptable summary of Marxist ethics must be an enterprise with little prospect of success First a number of prominent Marxists have insisted that Marxism can have no ethics because its status as a science precludes bias toward or the assumption of any particular ethical standpoint On this view it would be no more reasonable to expect an ethics of Marxism than of any other form of social science Second basing themselves on the opposite assumption an equally prominent assortment of Marxist intellectuals have lamented the absence of a coherently developed Marxist ethics as a deficiency which must be remedied Third less commonly Marxism is sometimes alleged to possess no developed ethical theory because it is exclusively committed to advocacy of class egoism on behalf of the proletariat and is thus rooted in a prudential not a moral standpoint The advocacy of proletarian class egoism or revolutionary morality may strictly speaking constitute an ethical standpoint but it might be regarded as a peculiar waste of time for a convinced and consistent class egoist to develop precise formulations of his ethical views for the sake of convincing an abstract audience of classless and impartial rational observers which does not happen to exist at present **Marxist Ethical Theory in the Soviet Union** P. T. Grier, 1978-11-30

Marx and Ethics Philip J. Kain, 1988 This book traces the development of Marx's ethics as they underwent various shifts and changes during different periods of his thought In his early writings his ethics are based on a concept of essence much like Aristotle's which Marx tries to link to a principle of universalization similar to Kant's categorical imperative In the period 1845-6 Marx abandoned this view holding morality to be incompatible with his historical materialism In the later writings Marx is less of a determinist and he no longer wants to reject morality However he does want to transcend a morality of burdensome obligation and constraint so as to realize a community built upon spontaneous bonds of solidarity

Conscience, Dissent and Reform in Soviet Russia Philip Boobbyer, 2008-08-05 Embracing the political intellectual social and cultural history of Soviet Russia this book provides a useful perspective of Putin's Russia Focusing on the ethics in Soviet Russia it explores the history of moral thinking amongst dissidents and examines the ethical assumptions of the perestroika era

Marx's Scientific Dialectics Paul B. Paolucci, 2007-06-30 While Karl Marx's ideas remain influential in the social sciences there is considerable disagreement and debate on the methodological principles that inform his work Marx often aligned himself with both scientific and dialectical principles at least once referring to his method as a scientific dialectic suggesting he believed dialectical reason could be incorporated into scientific method By debunking several misconceptions about Marx's work and examining how he brought scientific methods to bear on his general sociological thinking his materialist historical perspective and within his political economy this book brings new insight to the methodological principles that animate Marx's writings What emerges from such a perspective is an approach to sociological inquiry that

remains vital and useful for contemporary research on capitalist society and its possible futures **Philosophical Thought in Russia in the Second Half of the Twentieth Century** Vladislav Lektorsky, Marina F. Bykova, 2019-01-10 Philosophical Thought in Russia in the Second Half of the 20th Century is the first book of its kind that offers a systematic overview of an often misrepresented period in Russia's philosophy. Focusing on philosophical ideas produced during the late 1950s early 1990s it reconstructs the development of genuine philosophical thought in the Soviet period and introduces those non-dogmatic Russian thinkers who saw in philosophy a means of reforming social and intellectual life. Covering such areas of philosophical inquiry as philosophy of science philosophical anthropology the history of philosophy activity approach as well as communication and dialogue studies the volume presents and thoroughly discusses central topics and concepts developed by Soviet thinkers in that particular fields. Written by a team of internationally recognized scholars from Russia and abroad it examines the work of well-known Soviet philosophers such as Mikhail Bakhtin Evald Ilyenkov and Merab Mamardashvili as well as those important figures such as Vladimir Bibler Alexander Zinoviev Yury Lotman Georgy Shchedrovitsky Genrich Batishchev Sergey Rubinstein and others who have often been overlooked. By introducing and examining original philosophical ideas that evolved in the Soviet period the book confirms that not all Soviet philosophy was dogmatic and tied to orthodox Marxism and the ideology of Marxism-Leninism. It shows Russian philosophical development of the Soviet period in a new light as a philosophy defined by a genuine discourse of exploration and intellectual progress rather than stagnation and dogmatism. In addition to providing the historical and cultural background that explains the development of the 20th century Russian philosophy the book also puts the discussed ideas and theories in the context of contemporary philosophical discussions showing their relevance to nowadays debates in Western philosophy. With short biographies of key thinkers an extensive current bibliography and a detailed chronology of Soviet philosophy this research resource provides a new understanding of the Soviet period and its intellectual legacy 100 years after the Russian Revolution Marxism and the Open Mind John Lewis, 2017-07-12 In Marxism and the Open Mind John Lewis seeks to explain Marxism as a system of thought. In doing so he addresses the studied neglect or grotesque misrepresentation that he feels characterizes Western attitudes toward Marxism. Lewis also aims to stimulate what he believes to be a long overdue re-evaluation of Marxism in the light of what was contemporary thought in 1957 the year of the book's original publication and the height of the Cold War era. The essays include chapters on human rights and a discussion on Marxism and liberty. Marxist ethics a much neglected theme is the subject of an essay that deals with some of the most deeply felt criticisms of Marxism in the 1950s. The ethical aspects of Marxism are examined once again in a contribution to the debate on Marxism and religion. The volume concludes with essays on Berdyaev and Sartre which strike a note on the Marxist estimation of these thinkers and with an essay on Marxist humanism. The essays cover a wide field of thought uniting a close and sympathetic study of Marxism with a critical judgment rooted in academic training at three universities and experience in the Christian ministry **A History of**
