Marxist Political Economy and Marxist Urban Sociology Kieran McKeown, 1987 *Marxist Political Economy and Marxist Urban Sociology* Kieran McKeown, 1987-02-16 **Marxist Political Economy and Marxist Urban Sociology** Kieran McKeown, 1987 *Uneven Real Estate Development in Romania at the Intersection of Deindustrialization and Financialization* Enikő Vincze, Ioana Florea, Manuel B. Aalbers, 2024-07-19 This book examines the progression of real estate development within the deindustrialization financialization nexus. It explores the roles it has in semi peripheral contexts such as Romania where it overlaps with the process of the transformation of state socialism into neoliberal capitalism viewed at the intersection of global national and local forces. The book focuses on real estate development in Romania as a product and a driver of capitalism. It contributes to ongoing debates in critical urban theories and Marxist perspectives in urban sociology. Focusing on the under researched East European region it decenters social research and fine tunes the political economy theory about state and economic restructuring. The book contains methodological and theoretical insights that are useful in other contexts beyond Romania and Central and Eastern Europe especially in other semi peripheral emerging markets. The focus of critical inquiry into capitalist transformations adopted in this book can also support political activism. It uncovers the varieties of the deindustrialization financialization nexus in real estate built on the dismantled pre 1990 socialist industrial plants. The chapters describe the advancement of real estate investments across second and third tier cities displaying uneven development and subordinate financialization at the intersection of local and global processes and political and economic actors. It will be of interest to researchers and students of urban sociology economic sociology political economy human geography and political geography. Chapter 3 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license.

Marxism and the City Ira Katznelson, 1992-03-05 Defeated in the East and discredited in the West Marxism has broken down as an ideology and as a guide to governance. But for all its flaws it remains an important tool for understanding and raising questions about key aspects of modern life. In *Marxism and the City* Ira Katznelson critically assesses the scholarship on cities that has developed within Marxism in the past quarter century to show how some of the most important weaknesses in Marxism as a social theory can be remedied by forcing it to engage seriously with cities and spatial concerns. He argues that such a Marxism still has a significant contribution to make to the discussion of such historical questions as the transition from feudalism to a world composed of capitalist economies and nation states and the acquiescence of the western working classes to capitalism. Professor Katznelson demonstrates how a Marxism that embraces complexity and is open to engagement with other social theoretical traditions can illuminate our understanding of cities and of the patterns of class and group formation that have characterized urban life in the West.

Polite Politics Denny Ho Kwok-leung, 2020-08-26 This title was first published in 2000. This book contributes to social movement theory and to an understanding of Hong Kong

politics through analysis of an urban housing protest movement The theoretical approach adopted is a multi level one and seeks to show the influence of the political context the resources available to the groups concerned the actors interpretations of their situation and their strategy preferences This approach fills a gap in social movement theory because most theoretical frameworks focus on a single level of analysis The book also aims to help researchers in the field to re examine the current development of social movement theories and to learn the specific trajectory of urban social movements in Hong Kong

Understanding Cities Alexander R. Cuthbert, 2011 *Understanding Cities* is richly textured complex and challenging It creates the vital link between urban design theory and praxis and opens the required methodological gateway to a new and unified field of urban design Using spatial political economy as his most important reference point Alexander Cuthbert both interrogates and challenges mainstream urban design and provides an alternative and viable comprehensive framework for a new synthesis He rejects the idea of yet another theory in urban design and chooses instead to construct the necessary intellectual and conceptual scaffolding for what he terms The New Urban Design Building both on Michel de Certeau's concept of heterology thinking about thinking and on the framework of his previous books *Designing Cities* and *The Form of Cities* Cuthbert uses his prior adopted framework history philosophy politics culture gender environment aesthetics typologies and pragmatics to create three integrated texts Overall the trilogy allows a new field of urban design to emerge Pre existing and new knowledge are integrated across all three volumes of which *Understanding Cities* is the culminating text
