Reckoning with Risk Gerd Gigerenzer, 2002 In the beginning of the 20th century the father of modern science fiction H G Wells predicted that statistical thinking would be as necessary for citizenship in a technological world as the ability to read and write Yet a century on most of us from TV weather forecasters to the American President seem to have no idea of how to reason about uncertainties

Smart Risk Andrew Holmes, 2004-08-13 We all know that the future is uncertain but rather than make any attempt to actively manage our futures in a consistent way we tend to make broadbrush assumptions based on common sense and intuition alone Successfully managing risk is a primary ingredient for success in a fast paced environment where we are bombarded by the need to make critical decisions often with little or no solid facts available and little insight into the likely outcomes Smart Things to Know About Risk Management in a step by step approach shows the reader what is risk management and why it matters the categories of risk how to achieve the right balance of risk knowing your risk appetite how to actively manage your risks and develop a risk culture and techniques tools and models for managing risk Case studies are also included Perfect for the SMART treatment this book starts from basics assumes no prior knowledge and gives a step by step approach Step by step approach Covers the background to risk and risk management as well as practical application and techniques tools and models for managing risk Written by a highly experienced practitioner with a formidable working knowledge in this area

Living with Risk and Danger Mikkel Gabriel Christoffersen, 2019-06-17 The contemporary world is marked by a sense of vulnerability not seen since the end of the Cold War Climate change migration and political instability make people feel the inherent vulnerability of human life Concepts of risk and danger are as relevant now as ever before for illuminating contemporary life Yet what changes in human lives if one interprets existence with risk and danger from the perspective of Christian faith Does the Christian symbol system offer orientation for human lives in a time of crisis Exploring the work of leading contemporary thinkers Danish theologian Mikkel Gabriel Christoffersen develops a rich and varied account of Christian doctrine that enables human beings to live with risk and danger in all vulnerability with gratitude courage and care for others Christoffersen develops an interdisciplinary approach that allows him to draw upon sociological and anthropological reflections on life lived whilst facing risks and dangers He brings these findings into conversation with Scandinavian Anglo American and German theologians of risk The result of his endeavor is a Trinitarian theology of risk that explores the extent to which one can consider the cross of Christ a risk of the incarnation rather than its very purpose Focusing on vital existential questions makes Christoffersen s considerations vibrant and relevant to scholars and lay people with an open minded intellectual interest in contemporary Christian theology

It Should Never Happen Again Mike Lauder,2016-05-06 In It Should Never Happen Again Dr Mike Lauder questions the value of public inquiries Every day we hear about another inquiry being set up or why the last one failed to deliver the hoped for outcomes A great deal of time and taxpayers money is spent on inquiries and even more on implementing their recommendations but the author suggests that those conducting inquiries might be considered by their own test criminally negligent in the way they do so and that it is no surprise that they do not lead to the learning they should The focus of Mike Lauder s research is the gaps between what is known what knowledge is used by practitioners and those who judge them He contends that the difference between the judicial perspective and that of practitioners who are judged by the inquiry process creates barriers that impede others from learning Crucially inquiry outcomes do not assist the leadership of organisations to improve risk governance It Should Never Happen Again is based on research into high profile public inquiries and presidential commissions in the UK the USA Continental Europe and elsewhere Embracing issues ranging from terrorist attacks to pollution fire and air disasters criminal cases banking and bribery scandals and the state of public services Mike Lauder contrasts the judicial perspective of those who inquire the academic perspective of those who know and the practical perspective of those who are required to act and offers new models for understanding risk and its governance

It marks the culmination of two decades of research in South Africa, a context that has obvious application in a wider international climate given current globalization and migration trends. The authors draw from a large body of evidence based across different sites and illnesses, scrutinising both the language dynamics of intercultural health interactions and the perceptions and narratives of multiple participants. Including a range of theoretical, methodological and empirical considerations, the volume sheds light upon qualitative research methods and their application in the intercultural context. This book will be a valuable resource for health professionals, medical educators and language practitioners as well as students and scholars of discourse analysis and the medical humanities.

Smart Health Choices Les Irwig, 2008. Every day we make decisions about our health, some big and some small. What we eat, how we live and even where we live can affect our health. Sexual Predators Robert A. Prentky, Howard E. Barbaree, Eric S. Janus, 2015-06-26. Convicted sex offenders released from custody at the end of their criminal sentences pose a risk for re-offense. In many US states, Sexually Violent Predator (SVP) laws have been enacted that allow for the post-prison preventive detention of high risk sex offenders. SVP laws require the courts to make dispositions that protect the public from harm while at the same time respecting the civil rights of the offender. This book describes these SVP laws, their constitutionality and aspects of their operation. Courts hear expert risk testimony based heavily on the results of actuarial risk assessment. Problems associated with this testimony include the lack of a theory of recidivism, risk bias due to human decision making and the insularity of scholarship and practice along developmental lines. The authors propose changes in legal standards as well as a unified developmental model that treats sexual violence as an evolving condition with roots traceable to childhood and paths that extend into adolescence and adulthood.
