The Educated Person Donal G. Mulcahy, 2008 Liberal education has long been a fascination for scholars in a variety of disciplines and is closely associated with the idea of the educated person Seen at one time as a matter for colleges and universities over the years it has become central to the debate surrounding general education in high school and even the earlier grades Yet so many and varied are the uses of the term liberal education that the question arises of whether and how the idea is any longer a useful or helpful construct In what way might it speak helpfully to educational challenges we face today In what ways does it still speak helpfully to educational challenges we face today In what ways might it be a guide as we search for a better way forward These are the central questions that are addressed in this book In doing so the positions of three theorists John Henry Newman Mortimer J Adler and Jane Roland Martin who have written about liberal education in a compelling way and from different perspectives are selected for close analysis The analysis is built upon to fashion a new ideal of the educated person and a new theory of liberal education

Education and

the Limits of Reason Peter Roberts, Herner Saeverot, 2017-07-06 In recent decades a growing body of educational scholarship has called into question deeply embedded assumptions about the nature value and consequences of reason Education and the Limits of Reason extends this critical conversation arguing that in seeking to investigate the meaning and significance of reason in human lives sources other than non fiction educational or philosophical texts can be helpful Drawing on the work of Dostoevsky Tolstoy and Nabokov the authors demonstrate that literature can allow us to see how reason is understood and expressed contested and compromised by distinctive individuals under particular circumstances in complex and varied relations with others Novels plays and short stories can take us into the workings of a rational or irrational mind and show how the inner world of cognitive activity is shaped by external events Perhaps most importantly literature can prompt us to ask searching questions of ourselves it can unsettle and disturb and in so doing can make an important contribution to our educational formation An original and thought provoking work Education and the Limits of Reason offers a fresh perspective on classic texts by Dostoevsky Tolstoy and Nabokov and encourages readers to reconsider conventional views of teaching and learning This book will appeal to a wide range of academics researchers and postgraduate students in the fields of education literature and philosophy

Women in Ancient Greece Sue Blundell, 1995 Largely excluded from any public role the women of ancient Greece nonetheless appear in various guises in the art and writing of the period and in legal documents These representations in Sue Blundell's analysis reveal a great deal about women's day to day experience as well as their legal and economic position and how they were regarded by men

A History of Feminist and Gender Economics Giandomenica Becchio, 2019-10-30 This book offers a historical exploration of the genesis of feminist economics and gender economics as well as their theoretical and methodological differences Its narrative also serves to embed both within a broader cultural context Although both feminist economics and gender neoclassical economics belong to the cultural process related to the central role of the political economy in promoting women's emancipation and empowerment they differ in many aspects Feminist economics mainly influenced by women's studies and feminism rejected neoclassical economics while gender neoclassical economics mainly influenced by home economics and the new home economics adopted the neoclassical economics approach to gender issues The book includes diverse case studies which also highlight the continuity between the story of women's emancipation and the more recent developments of feminist and gender studies This volume will be of great interest to researchers and academia in the fields of feminist economics gender studies and the history of economic thought

University Women Sara Z. MacDonald, 2021-11-15 Bessie Scott nearing the end of her first year at university in the spring of 1890 recorded in her diary Wore my gown for first time It didn't seem at all strange to do so Often deemed a cumbersome tradition by men the cap and gown were dearly prized by women as an outward sign of their hard won admission to the rank of undergraduates For the first generations of university women higher education was an exhilarating and transformative experience but these opportunities would narrow in the decades that followed In *University Women* Sara

MacDonald explores the processes of integration and separation that marked women's contested entrance into higher education. Examining the period between 1870 and 1930, this book is the first to provide a comparative study of women at universities across Canada. MacDonald concludes that women's higher education cannot be seen as a progressive narrative, a triumphant story of trailblazers and firsts of doors being thrown open and staying open. The early promise of equal education was not fulfilled in the longer term as a backlash against the growing presence of women on campuses resulted in separate academic programs, closer moral regulation, and barriers that restricted their admission into the burgeoning fields of science, technology, engineering, and mathematics. The modernization of higher education ultimately marginalized women students, researchers, and faculty within the diversified universities of the twentieth century.

University Women uncovers the systemic inequalities based on gender, race, and class that have shaped Canadian higher education. It is indispensable reading for those concerned with the underrepresentation of girls and women in STEM and current initiatives to address issues of access and equity within our academic institutions.

The Less Noble Sex M. Jeanne Peterson, 1989-05-22

Physically frail, badly educated girls brought up to lead useless lives as idle gentlewomen married to dominant husbands and relegated to separate spheres of life: these phrases have often been used to describe Victorian upper middle class women. M. Jeanne Peterson rejects such formulations and the received wisdom they embody in favor of a careful examination of Victorian ladies and their lives. Focusing on a network of urban professional families over three generations, this book examines the scope and quality of gentlewomen's education, their physical lives, their relationship to money, their experience of family illness and death, and their relationships to men, brothers, and friends, as well as fathers and husbands. Peterson also examines the prominent place of work in the lives of these leisured Victorian ladies, both single and married. Far from idle, the mothers, wives, and daughters of Victorian clergymen, doctors, lawyers, university dons, and others were accomplished and productive members of society who made substantial public and private contributions to virtually every sphere of Victorian life.

Subsequently, the cultural construction of science as a male subject limited access and opportunity for girls.

Mary Wollstonecraft Susan Laird, 2014-10-23. Best known as author of *A Vindication of the Rights of Woman* (1792) if not also as mother of Frankenstein's author Mary Shelley, Mary Wollstonecraft survived domestic violence and unusual independent womanhood to write engaging letters, fiction, history, critical reviews, handbooks, and treatises. Her work on coeducational thought was a major early modern influence upon the development of a post-Enlightenment tradition and continues to have vital relevance today. Celebrated as an early modern feminist, abolitionist, and socialist philosopher, Wollstonecraft had little formal schooling but still worked as a governess, school teacher, and educational writer. This succinct critical account of that prolific research begins by recounting her revolutionary self-education. Susan Laird explains how Wollstonecraft came to criticize moral flaws in both men's and women's private education based on irrational assumptions about sexual character under the Divine Right of Kings. It was to remedy those moral flaws of monarchist education that Wollstonecraft theorized her influential but incomplete concept of publicly financed universal egalitarian coeducation.
