## **Reclaiming The American West An Historiography And Guide:**

*Reclaiming the American West* Lawrence Bacon Lee,1980 Provides a comprehensive overview of specialized areas such as irrigation engineering dam construction water law rock problems and methods of allocating costs      *Reclaiming the Arid West* William D. Rowley,1996 Widely noted for his role in the passage of the National Reclamation Act of 1902 Francis G Newlands of Nevada was a champion of the growth of federal power in the modernization of America One of the few liberal national Democrats at the beginning of the twentieth century he is known as a key architect of the modern regulatory state Newlands worked to irrigate the Nevada desert and other arid western states with nationally funded reclamation and dam building projects As a leading western Progressive he supported national planning for the utilization of all the nation s water resources the Progressive conservation cause espoused by Republican Theodore Roosevelt and the supervision of private corporations by an enlarged and more powerful federal government Yet he opposed Progressives on many issues voicing suspicions about centralized banking defending the right of private corporations to fair treatment by public regulatory agencies even advocating the denial of suffrage to African Americans through the repeal of the Fifteenth Amendment William Rowley s biography reveals a complicated and sophisticated man who successfully lived a dual political life under a cloud of personal and public scandal It is a fascinating story of American politics in a time of immense national change      *A Sense of the American West* James E. Sherow,1998-10 An anthology of diverse approaches and issues in the environmental history of the American West      *The World of the American West* Gordon Morris Bakken,2016-12-12 Addressing everything from the details of everyday life to recreation and warfare this two volume work examines the social political intellectual and material culture of the American Old West from the California Gold Rush of 1849 to the end of the 19th century What was life really like for ordinary people in the Old West What did they eat wear and think How did they raise their children How did they interact with government What did they do for fun This encyclopedia provides readers with an engaging and detailed portrayal of the Old West through the examination of social cultural and material history Supported by the most current research the multivolume set explores various aspects of social history family politics religion economics and recreation to illuminate aspects of a society s emotional life interactions opinions views beliefs intimate relationships and connections between the individual and the greater world Readers will be exposed to both objective reality and subjective views of a particular culture as a result they can create a cohesive accurate impression of life in the Old West during the second half of the 1800s      **The Cowboy Encyclopedia** Richard W. Slatta,1996 Over 450 entries provide information on cowboy history culture and myth of both North and South America      *The Legacy of Conquest: The Unbroken Past of the American West* Patricia Nelson Limerick,2011-02-07 Limerick is one of the most engaging historians writing today Richard White The settling of the American West has been perceived throughout the world as a series of quaint violent and romantic adventures But in fact Patricia Nelson Limerick argues the West has a history grounded primarily in economic reality in hardheaded

questions of profit loss competition and consolidation Here she interprets the stories and the characters in a new way the trappers traders Indians farmers oilmen cowboys and sheriffs of the Old West meant business in more ways than one and their descendents mean business today **The History of Large Federal Dams** David P. Billington, Donald C.

Jackson, Martin V. Melosi, 2005 Explores the story of Federal contributions to dam planning design and construction *The Mythical West* Richard W. Slatta, 2001-11-20 This cultural journey down memory lane showcases how major Western figures events and places have been portrayed in folk legends art literature and popular culture Ever since the days of the 49ers and George Armstrong Custer the Old West has been America's most potent source of legend But it is sometimes hard to separate fact from fiction Did you know for example that Annie Oakley was a talented marksman who shot an estimated 40 000 rounds per year while practicing and performing for Buffalo Bill Cody's Wild West Show in the late 1800s Or that many interpreters believe that The Wonderful Wizard of Oz is not just a fairy tale but also a Populist allegory These are just two of the folk legends dissected and examined in this veritable cultural geography The volume covers everything from billionaire Howard Hughes and composer Aaron Copeland to Aztlan the legendary first city of the Aztecs and Area 51 the top secret U S Air Force base at Groom Lake Nevada that has fascinated UFO and conspiracy buffs **William F. Cody's Wyoming**

**Empire** Robert E. Bonner, 2016-01-29 Celebrated showman of the Old West William F Buffalo Bill Cody took on another role unknown to most Americans that of the western land developer and town promoter In this captivating study Robert E Bonner demonstrates that the skills Cody acquired from decades in show business failed to prepare him for the demanding arena of business and finance Bonner examines Cody's efforts as president of the Shoshone Irrigation Company to develop the Big Horn Basin through large scale irrigation and town development This meticulously researched account shows us a Buffalo Bill preoccupied with making a buck and not at all shy about using his fame to do it Cody spent huge sums bullied partners patronized state officials and exercised his charm in pursuit of developing the high plains east of Yellowstone National Park His efforts helped shape the city of Cody and the Big Horn Basin With the famous Irma Hotel as a cornerstone he built the first infrastructure of the Cody Yellowstone tourist trade and connected his little Wyoming town with the wealth of the East through personal hospitality and travel Laced with engaging anecdotes and featuring more than twenty photographs William F Cody's Wyoming Empire is a much needed look at an overly mythologized character There was more to William F Cody than the Wild West show and we cannot construct a full picture of the man without understanding his entrepreneurial activities in Wyoming Reclamation, Managing Water in the West, The Bureau of Reclamation: History Essays from the Centennial Symposium, Volume 2, 2008, \*, 2009 The Bureau of Reclamation: Origins and growth to 1945 William D.

Rowley, 2006 On cover Reclamation Managing Water in the West Tells the history of the Bureau of Reclamation from 1902 1945 *The Law of the Land* John Opie, 1994-01-01 This book provides fascinating insights into how present day American land legislation has evolved In doing so the author identifies the many problems that the family farmer has had to face over

the past two centuries at the hands of the weather unstable product prices and corrupt and venal politicians *Journal of Agricultural Economics* A provocative learned polemical contribution to the debate on the nature of the farm problem and the means to solve it Throughout our history Opie a historian convincingly argues contradictory goals have produced contradictory policies that are the sources of our current problems *Science* This important volume offers a reinterpretation of public lands history as it relates to contemporary farm policy Opie's signal contribution is to examine and evaluate the many policy strands of a twentieth century safety net designed by Congress to sustain the family farm *Journal of American History* Bright passionate and entirely convincing *Journal of Rural Studies* *The Law of the Land* has made a significant contribution to agricultural and public policy history by pointing out that American ideals have shaped policies and assigned roles that have often left farmers and farmland vulnerable *Public Historian* The five years that have passed since this book was first published have been enough to conclude that John Opie can reconstruct the past and predict the future Many of the problems he foresaw have come to pass and some of the solutions he discussed have been adopted Anyone interested in the basic environment will find that this volume gives a clear picture of how we got to where we are today in the use and misuse of natural resources *Environmental History Review* A professor of history at the New Jersey Institute of Technology John Opie is also director of the Center for Technology Studies and founding editor of *Environmental History Review* His other publications include *Ogallala Water for a Dry Land* Nebraska 1993 [Historians and the American West](#) Michael P. Malone, 1983 **Desert Passages** Patricia Nelson Limerick, 1985 Traces the development of American attitudes toward the desert using case studies from many writers over the years **The Bureau of Reclamation** Brit Allan Storey, 2008

[Downsizing the Federal Government](#) Vernon D Jones, 2016-07-01 The main focus of downsizing has shifted from the private to the public sector The cutbacks began in the Department of Defense Now the goal is a federal civilian workforce reduction of 12 percent by the year 2000 This pioneering study looks at the management of workforce reductions in the public sector both in theory and in practice Three case studies of the Defense Logistics Agency the Bureau of Reclamation and the Food and Drug Administration illustrate the organizational managerial and human dimensions of attempting to improve performance with reduced resources The author draws on extensive interviews with senior executives and middle managers in the three agencies at the General Accounting Office the Office of Personnel Management and the National Performance Review the Senior Executives Association and the Federal Managers Association and scholars and researchers In a larger sense this work pushes the boundaries of knowledge concerning organizational change and makes a significant contribution to organization theory It offers important new insights not only for public sector managers but for organization theorists and management specialists whose work on downsizing has been presumed but not shown to be applicable to the public sector **Water, Land, and Law in the West** Donald J. Pisani, 1996 The series presents an interdisciplinary approach to the use and misuse of resources in the American West This volume comprises essays written between 1982 and
