Recognizing Spirituality The Interface Between Faith And Social Work:

Recognizing Spirituality Rae Shirley Lindsay, 2002 Education in the helping professions has tended to adopt a secular view of human beings focusing on aspects of human behavior which are empirically measurable and avoiding the more irrational elements The religious beliefs and spiritual values of both students and clients have been ignored Rae Lindsay argues that this prevents students from fully exploring their own attitudes and biases and increases the likelihood that these personal values will be foisted on clients It also reduces the chances that practitioners will explore the spiritual factors influencing clients In a multicultural country such as Australia it is extraordinary that varied religious and spiritual beliefs should not be considered in the relationship between the professional and the client Pretending that these beliefs don't exist or are irrelevant is to ignore an important dimension of human existence and interaction Little has been written on this problem in an Australian cultural context This book presents opinions of social work educators and practitioners and statistics about Australian religious beliefs It also discusses the stages of faith development The persistence and strength of spiritual and religious beliefs is clear from all sources Rae Lindsay challenges the status quo and argues that spirituality and religion should be included in contemporary professional discourses

Spirituality and Social Work Beth R. Crisp, 2016-04-01 For much of the twentieth century professional social work sought to distance itself from its religious origins with the consequence being that the role of spirituality in the lives of service users tended to be sidelined Yet it is clear that many people begin to explore their spirituality precisely at times when they are trying to make sense of difficult life circumstances or experiences and may come into contact with social workers In recent years there has been an increasing understanding that in order to be relevant to the lives of people they work with social workers need to go beyond their material needs but there is little understanding of how spirituality can be sensitively incorporated into practice especially when either practitioners or service users have no religious affiliation or there is no shared religious background In this pathbreaking volume Beth Crisp offers social workers ideas of beginning conversations in which spiritual values and beliefs may surface allowing service users to respond from their own framework and to begin to discuss the specific religious or spiritual practices and beliefs which are important to them She considers spirituality in the context of lived experience a perspective that she argues breaks down any mystique and suspicion of explicitly religious language by focusing on language and experiences with which most people can identify Such a framework allows exploration of issues that emerge at different stages in the lifespan both by persons who are religious and those who do not identify with any formal religion Most literature on spirituality within social work refers to the elderly to those who are sick or have been bereaved yet as Crisp points out spirituality is important for people of all ages and not just at seemingly exceptional moments
