Bone and Joint Disorders of the Foot and Ankle Maurice Bouysset, 2013-04-17 This encyclopedia on the pathology of the foot is to some extent a response to the wishes expressed in 1978 by the organizers of the Premieres Journees Europeennes de Podologie in Paris in effect they advocated a close collaboration between the diverse specialities of medicine and orthopedics in the field of the study and treatment of affections of the foot with a view to an ever closer collaboration for the well being of the patients An increasing number of patients seek the help of the rheumatologist or orthopedist for disorders of the feet the clinician is then confronted either with a diagnostic problem when the foot is the organ primarily affected or a therapeutic problem when a sufferer from a well defined rheumatic disease is led to consult him for persistent pain Even if the pathology of the feet has often been neglected by the medical profession whereas the hands have received every attention many European rheumatologists and orthopedic surgeons have for long addressed this problem The names of some of the pioneers in this subject during the 1950S and 60S will be familiar EGL Bywaters and A St Dixon in Great Britain WS Vainio in Finland K Tillmann in Germany AS Denis and S Braun in France Further one should not ignore the considerable contribution to our knowledge of podology provided by the Monographies de podologie published by Masson under the supervision of Lucien Simon and his team at Montpellier some ten volumes in all
