The book is related to the handling of product and service failures in business-to-business markets. The concept of recovery management embraces all activities of seller firms to effectively handle failure situations in order to restore customer satisfaction and attain customer retention. Since prior research on recovery management has been mostly related to business-to-consumer (B2C) markets and business-to-business markets (B2B) reflect significantly different characteristics, a context-specific approach to handle product or service failures in B2B markets is required by researchers and practitioners alike.
