Cutler, 2000-06-15 Who holds ultimate authority for the education of America s children teachers or parents Although the relationship between home and school has changed dramatically over the decades William Cutler s fascinating history argues that it has always been a political one and his book uncovers for the first time how and why the balance of power has shifted over time Starting with parental dominance in the mid nineteenth century Cutler chronicles how schools growing bureaucratization and professionalization allowed educators to gain increasing control over the schooling and lives of the children they taught Central to his story is the role of parent teacher associations which helped transform an adversarial relationship into a collaborative one Yet parents have also been controlled by educators through PTAs leading to the perception that they are company unions Cutler shows how in the 1920s and 1930s schools expanded their responsibility for children s well being outside the classroom These efforts sowed the seeds for later conflict as schools came to be held accountable for solving society s problems Finally he brings the reader into recent decades in which a breakdown of trust racial tension and parents rights have taken the story full circle with parents and schools once again at odds Cutler s book is an invaluable guide to understanding how parent teacher cooperation which is essential for our children s educational success might be achieved **Educational Technology** Greg Kearsley, 1994 Educational Management Harry Tomlinson, 2013-10-30 Education management and leadership is a key area of study in education Educational Management Major Themes in Education brings together the most important literature in the field exploring the historical context the training and development of leaders and their roles in leading people and managing resources in education The collection provides a focus on the major issues which are current in educational management throughout the world The four volumes are arranged thematically as follows Volume 1 Educational Values Values and Religion Emotions and Gender Politics and Micropolitics Volume 2 Educational Theory Theory School of Effectiveness and School Improvement Financial Management and LSM Further Education Volume 3 Educational Leadership Leadership and Headteachers Learning Leadership Middle Leadership Volume 4 Educational Change History and Research Strategy Marketing Change and Culture A new introduction by the editor provides an overview of the field and guides the reader through this wealth of material Titles also available in this series include *Literacy* June 2004 4 Volumes 495 *Special Educational Needs and Inclusive Education* August 2004 4 Volumes 495 and the forthcoming *Early Years Education* 2005 c 4 Volumes c 475 Handbook of Research on Creative Problem-Solving Skill Development in Higher Education Zhou, Chunfang, 2016-09-21 Developing students creative problem

During this century, Froebel's philosophy has had a deep and enduring impact on British education. **Resources in Education**, 2001-04. *Pedagogy, Education, and Praxis in Critical Times* Kathleen Mahon, Christine Edwards-Groves, Susanne Francisco, Mervi Kaukko, Stephen Kemmis, Kirsten Petrie, 2020-10-22. This book critically explores urgent questions that researchers, educators, and policy makers need to consider and address in order to better our understanding and capacity to transform education. Focusing on areas that underpin the empirical, theoretical, and strategic research of the Pedagogy Education and Praxis PEP International Research Network, it discusses the following topics: the nature of educational praxis; research approaches that facilitate praxis and praxis development; changing cultural, social, political, and material conditions affecting the educational practices of teachers; and how good professional practice in teaching, leading, and professional learning are understood and experienced. Presenting findings emerging from the Pedagogy Education and Praxis research, the book raises new questions and offers new ways of thinking about the identified issues and themes in light of current educational concerns and the prevalence of neoliberal conditions being experienced in educational settings around the globe. It provides supporting evidence and illustrative examples to help readers understand important concepts, situations, and concerns and brings together intellectual and cultural/historical traditions that when considered in relation to each other open up critical opportunities and ideas orienting readers towards future educational transformation.
