Xenotropism and the Awakening of Literary Expatriatism through Writing Memoirs Christine Velde, 2016-08-03

Although there have been many discussions about challenges faced by individuals going through East to West migrations there are few literary accounts about those moving from the West to the East Yet these migrations are becoming more frequent now due to advances in technology and the fact that a writer's work can now involve an increasingly global audience One way of expressing these challenges is through writing memoirs *Xenotropism and the Awakening of Literary Expatriatism through Writing Memoirs* exemplifies the craft of memoirs written while living in a foreign country and explains how this is different from writing from home The book is a theoretical analysis of xenotropism based on the work of three prominent writers in China's history Emily Hahn Nien Cheng and Qiu Xiaolong The author explores the relationship between xenotropism turning towards foreign ideals and practices its complexities and challenges and the writing of a memoir and its impact on mental health This discourse will contribute to new knowledge in the field of creative writing and Asian studies by illustrating how xenotropism or turning towards foreign ideals and practices results in both personal and artistic development and builds an understanding and acceptance of different cultures within an individual These processes of change and understanding in turn facilitate the writing of a memoir which is a cathartic process having a positive effect on one's mental state Readers interested in creative writing or Asian literary studies will be able to understand the creative process behind writing memoirs from a combination of personal research based literary and theoretical perspectives **The**

How to Write the Global History of Knowledge-Making Johannes Feichtinger, Anil Bhatti, Cornelia Hülmbauer, 2020-03-02 This multidisciplinary collection of essays provides a critical and comprehensive understanding of how knowledge has been made moved and used by whom and for what purpose To explain how new knowledge emerges this volume offers a two fold conceptual move challenging both the premise of insurmountable differences between confined autarkic cultures and the linear nation centered approach to the spread of immutable stocks of knowledge Rather the conceptual focus of the book is on the circulation amalgamation and reconfiguration of locally shaped bodies of knowledge on a broader global scale The authors emphasize that the histories of interaction have been made less transparent through the study of cultural representations thus distorting the view of how knowledge is actually produced Leading scholars from a range of fields including history philosophy social anthropology and comparative culture research have contributed chapters which cover the period from the early modern age to the present day and investigate settings in

Africa Asia and Europe Their particular focus is on areas that have largely been neglected until now In this work readers from many disciplines will find new approaches to writing the global history of knowledge making especially historians scholars of the history and philosophy of science and those in culture studies
