The Oxford Handbook of Job Quality Chris Warhurst, Chris Mathieu, Rachel E. Dwyer, 2022-06-20 The aim of this Handbook is to produce an interdisciplinary and international benchmark text for anyone wanting to understand job quality Job quality matters and has long and continually done so even if the terminology used to describe it has and continues to vary Debate about the future of work and job quality in the twenty first century centres on the impact of the new digital technologies of the putative fourth industrial revolution This debate compounds existing concerns about the restructuring of employment and importantly a worrying proliferation of poor quality jobs often within the context of neo liberal political economic hegemony since the early 1980s or the economic crisis that followed the Global Financial Crisis of the late 2000s Job quality is offered as a solution to challenges such as health welfare productivity innovation economic competitiveness democracy and democratic participation Bildung cultivation societal equality individual and collective quality of life and environmental sustainability As job quality is a key factor in addressing these and the other

challenges it needs to be understood in all its complexity in terms of what it affects as well as what affects it This Handbook draws together into a single volume first an explicit focus on job quality both as a significant factor in and of itself and as producing instrumental effects on a range of other processes and outcomes second a catalogue of the diverse range of multiple contributions and applications related to job quality and third the complexity and multiple interpretations of the concept of job quality Each chapter provides distinct responses to the question of why job quality matters coupled to a contention about for whom or for what job quality matters most As the chapters with their respective answers and arguments attest there are a range of ways in which job quality is relevant to an equally broad range of social economic and political concerns

A Geography of the Lifeworld (Routledge Revivals) David Seamon, 2015-06-11 Within the modern Western lifestyle increasing conflict is becoming apparent between that patchwork of isolated points such as the home or the office which are linked by a mechanical system of transportation and communication devices and a growing sense of homelessness and isolation This work first published in 1979 adopts a phenomenological perspective illustrating that this malaise may have partial roots in the deepening rupture between people and place Whereas the problems of terrestrial space may have been overcome technologically and economically it has been less successful regarding people Experience indicates that people become bound to locality and the quality of their life is thus reduced if these bonds are disrupted or broken in any way The relationship between community and place is investigated as is the opportunity for improving the environment both from a human and an ecological perspective This book will be of interest to students of human geography

General Psychology, The Psychology of Touch Morton A. Heller, 2013-11-12 Designed to make research on touch understandable to those not specifically involved in tactile research this book provides broad coverage of the field It includes material on sensory physiology and psychophysics thermal sensibility pain pattern participation sensory aids and tactile perception in blind people While the volume is important for researchers in the area of touch it should also prove valuable to a broad audience of experimental and educational psychologists and health professionals The book should also be of interest to scientists in perception cognition and cognitive science and can be used as a supplementary reader for courses in sensation and

perception **A Theory of Sentience** Austen Clark, 2000 Austen Clark offers a general account of the forms of mental representation that we call sensory To sense something one must have some capacity to discriminate among sensory qualities but there are other requirements What are they and how can they be put together to yield full blown sensing Drawing on the findings of current neuroscience Clark proposes and defends the hypothesis that the various modalities of sensation share a generic form that he calls feature placing Sensing proceeds by picking out place times in or around the body of the sentient organism and characterizing qualities features that appear at those place times Such feature placing is a primitive kind probably the most primitive kind of mental representation Once its peculiarities have been described many of the puzzles about the intentionality of sensation and the phenomena that lead some to label it pseudo intentional can be resolved The hypothesis casts light on many other troublesome phenomena including the varieties of illusion the problem of projection the notion of a visual field the location of after images the existence of sense data and the role of perceptual demonstratives A Theory of Sentience will interest anyone interested in the topics of sensation representation or phenomenal consciousness **Design for Tomorrow—Volume 1** Amaresh Chakrabarti, Ravi Poovaiah, Prasad Bokil, Vivek

Kant, 2021-04-26 This book showcases cutting edge research papers from the 8th International Conference on Research into Design ICoRD 2021 written by eminent researchers from across the world on design processes technologies methods and tools and their impact on innovation for supporting design for a connected world The theme of ICoRD 21 has been Design for Tomorrow The world as we know it in our times is increasingly becoming connected In this interconnected world design has to address new challenges of merging the cyber and the physical the smart and the mundane the technology and the human As a result there is an increasing need for strategizing and thinking about design for a better tomorrow The theme for ICoRD 21 serves as a provocation for the design community to think about rapid changes in the near future to usher in a better tomorrow The papers in this book explore these themes and their key focus is design for tomorrow how are products and their development be addressed for the immediate pressing needs within a connected world The book will be of interest to researchers professionals and entrepreneurs working in the areas on industrial design manufacturing consumer goods and industrial management who are interested in the new and emerging methods and tools for design of new products systems and services **Problems from Reid** James Van Cleve, 2015-08-03 James Van Cleve here shows why Thomas Reid 1710-96

deserves a place alongside the other canonical figures of modern philosophy He expounds Reid's positions and arguments on a wide range of topics taking interpretive stands on points where his meaning is disputed and assessing the value of his contributions to issues philosophers are discussing today Among the topics Van Cleve explores are Reid's account of perception and its relation to sensation conception and belief his nativist account of the origin of the concepts of space and power his attempt to clear the way for the belief that the things we directly perceive are external things not ideas in our minds his stand on the distinction between primary and secondary qualities his account of acquired perception whereby we

come to stand in a quasi perceptual relation to qualities not originally perceived his claim that visual space is non Euclidean his answers to the questions why we see the world right side up with inverted retinal images and whether a newly sighted person would recognize by sight the shapes he previously knew by touch whether memory like perception is a form of direct awareness and how we manage to conceive of things that are utterly nonexistent Also examined are Reid s account of human knowledge by means of first principles his externalist reply to philosophical skepticism his volitional theory of action his use of the distinction between event causation and agent causation to understand freedom of the will and his criticism of Hume and anticipation of Moore on the analysis of moral judgment The most comprehensive work on Reid in a quarter century this book will be welcomed by students of early modern philosophy epistemology the philosophy of perception and the philosophy of action

Modernist Magazines and the Social Ideal Tim Satterthwaite,2020-09-03 The new photo illustrated magazines of the 1920s traded in images of an ideal modernity promising motorised leisure scientific progress and social and sexual emancipation Modernist Magazines and the Social Ideal is a pioneering history of these periodicals focusing on two of the leading European titles the German monthly UHU and the French news weekly VU taken as representative of the broad class of popular titles launched in the 1920s The book is the first major study of UHU and the first scholarly work on VU in English Modernist Magazines explores in particular the striking use of regularity and repetition in photographs of modernity reading these repetitious images as symbolic of modernist ideals of social order in the aftermath of the First World War Introducing a novel methodology pattern theory the book argues for a critical return to the Gestalt tradition in visual studies Alongside the UHU and VU case studies Modernist Magazines offers an essential primer to interwar magazine culture in Europe Accounts of rival titles are woven into the book s thematic chapters which trace the evolution of the two magazines photography and graphic design in the tumultuous years up to 1933

Asthma E. Sherwood Brown,2003-01-01 The relation between psychiatric disorders and general medical conditions is currently a topic of much interest This volume includes a broad range of papers dealing with psychosocial issues in the morbidity of asthma depressive symptoms which appear to be more common in asthma patients than in the general population the link between asthma and anxiety disorders or side effects of corticosteroid therapy Furthermore one paper looks at problems with adherence to treatment and the interaction between patient and provider and another one presents a model of changing human health behavior Emotional disturbances contributing to several primarily psychogenic illnesses that mimic asthma are also covered Each chapter includes an overview of the field for those with minimal knowledge of the topic This book is written by experts for clinicians general practitioners mental health professionals allergists pulmonologists and primary care practitioners involved in treating asthma patients especially with a view to the psychological aspects and their influence on the disease
