

# 1. Sensation vs. Perception p. 132

**Figure 4.1**

**The distinction between sensation and perception.**

Sensation involves the stimulation of sensory organs, whereas perception involves the interpretation of sensory input. The two processes merge at the point where sensory receptors convert physical energy into neural impulses.

## Sensation

Sensory organs absorb energy from physical stimuli in the environment.

Sensory receptors detect stimulus energies and convert them into neural impulses, which are sent to the brain.

## Perception

The brain organizes this input and translates it into something meaningful.
