Serendipities Umberto Eco, 1999 Umberto Eco's latest work unlocks the riddles of history in an exploration of the linguistics of the lunatic stories told by scholars scientists poets fanatics and ordinary people in order to make sense of the world Exploring the Force of the False Eco uncovers layers of mistakes that have shaped human history such as Columbus's assumption that the world was much smaller than it is leading him to seek out a quick route to the East via the West and thus fortuitously discovering America In a careful unveiling of the fabulous and the false Eco shows us how serendipities unanticipated truths often spring from mistaken ideas From Leibniz's belief that the I Ching illustrated the principles of calculus to Marco Polo's mistaking a rhinoceros for a unicorn Eco tours the labyrinth of intellectual history illuminating the ways in which we project the familiar onto the strange Serendipities Language And Lunacy Eco Umberto, 2008-04 Best selling author Umberto Eco's latest work unlocks the riddles of history in an exploration of the linguistics of the lunatic stories told by scholars scientists poets fanatics and ordinary people in order to make sense of the world Exploring the Force

of the False Eco uncovers layers of mistakes that have shaped human history such as Columbus's assumption that the world was much smaller than it is leading him to seek out a quick route to the East via the West and thus fortuitously discovering America. The fictions that grew up around the cults of the Rosicrucians and Knights Templar were the result of a letter from a mysterious Prester John undoubtedly a hoax that provided fertile ground for a series of delusions and conspiracy theories based on religious, ethnic and racial prejudices. While some false tales produce new knowledge like Columbus's discovery of America and others create nothing but horror and shame, the Rosicrucian story wound up fueling European anti-Semitism; they are all powerfully persuasive. In a careful unraveling of the fabulous and the false, Eco shows us how serendipities, unanticipated truths often spring from mistaken ideas. From Leibniz's belief that the I Ching illustrated the principles of calculus to Marco Polo's mistaking a rhinoceros for a unicorn, Eco tours the labyrinth of intellectual history illuminating the ways in which we project the familiar onto the strange. Eco uncovers a rich history of linguistic endeavor, much of it ill conceived that sought to heal the wound of Babel. Through the Middle Ages and the Renaissance, Greek, Hebrew, Chinese and Egyptian were alternately proclaimed as the first language that God gave to Adam, while in keeping with the colonial climate of the time, the complex language of the Amerindians in Mexico was viewed as crude and diabolical. In closing, Eco considers the erroneous notion of linguistic perfection and shrewdly observes that the dangers we face lie not in the rules we use to interpret other cultures but in our insistence on making these rules absolute. With the startling combination of erudition and wit, bewildering anecdotes and scholarly rigor that are Eco's hallmarks, *Serendipities* is sure to entertain and enlighten any reader with a passion for the curious history of languages and ideas.

Eco's Chaosmos Cristina Farronato, 2003-01-01

While Umberto Eco's intellectual itinerary was marked by his early studies of post-Crocian aesthetics and his spectacular concentration on linguistics, information theory, structuralism, semiotics, cognitive science and media studies, what constitutes the peculiarity of his critical and fiction writing is the tension between a typically medieval search for a code and the hermeneutic representative of deconstructive tendencies. This tension between cosmos and chaos, order and disorder is reflected in the word *chaosmos*. In this brilliant assessment of the philosophical basis of Eco's critical and fictional writing, Cristina Farronato explores the other distinctive aspect of Eco's thought: the struggle for a composition of opposites, the outcome deriving from his ability to elicit similar contrasts from the past and re-play them in modern terms. Focusing principally on how Eco's scholarly background influenced his study of semiotics, Farronato analyzes *The Name of the Rose* in relation to William of Ockham's epistemology, C. S. Peirce's work on abduction and Wittgenstein's theory of language. She discusses Foucault's *Pendulum* as an explicit comment on the modern debate on interpretation through a direct reference to Early Modern hermetic thought, correlates *The Island of the Day Before* as a postmodern mixture of science and superstition and reviews *Baudolino* as an historical fantastic novel that once again situates the Middle Ages in a postmodern context. Eco's *Chaosmos* demonstrates how Eco's use of semiotic theory is important for an understanding of the postmodern aspects of

today's literature and culture **The Modern Afterlives of Old Irish Travel Narratives** Natalia I. Petrovskaja, 2025-07-24 This book explores the reception of the medieval Irish tradition of fantastic journey tales in Jonathan Swift's *Gulliver's Travels*, C. S. Lewis's *The Voyage of the Dawn Treader*, Umberto Eco's *Baudolino* and the science fiction television franchises *Star Trek* and *Stargate*. In doing so, the book opens the door to a new history of literary reception using Old Irish genre categories to analyse post-medieval texts. It aims to show that there is a family of texts produced in the post-medieval period that are heirs of the medieval Irish literary tradition of fantastic voyage narratives and that using Old Irish genre categories to analyse post-medieval works can open up new perspectives in our understanding of these works.

Poets, Heroes, and their Dragons (2 vols) James R. Russell, 2021-02-08 The present volume is a collection of articles published by Professor James R. Russell of Harvard University in various journals over the past decades. James Russell has been one of the pioneers in the field of Armenian and Iranian Studies where he has demonstrated the importance of Iranian civilization for pre-Christian Armenia. The connection between the two civilizations has been part of the tireless work of Professor Russell, and I hope this publication shows the immense importance of his work for both Armenian and Iranian Studies. I would like to thank Professor Houri Berberian, Director of the UC Irvine Armenian Studies Program, as well as Mr. Mamigonian and the National Association for Armenian Studies and Research (NAASR) for supporting the publication of this book. This volume was previously published by the Jordan Center for Persian Studies, University of California, Irvine.

W.B. Yeats, Ezra Pound, and the Poetry of Paradise Sean Pryor, 2016-02-24 Emphasizing the interplay of aesthetic forms and religious modes, Sean Pryor's ambitious study takes up the endlessly reiterated longing for paradise that features throughout the works of W. B. Yeats and Ezra Pound. Yeats and Pound define poetry in terms of paradise and paradise in terms of poetry, Pryor suggests, and these complex interconnections fundamentally shape the development of their art. Even as he maps the shared influences and intellectual interests of Yeats and Pound and highlights those moments when their poetic theories converge, Pryor's discussion of their poems' profound formal and conceptual differences uncovers the distinctive ways each writer imagines the divine, the good, the beautiful, or the satisfaction of desire. Throughout his study, Pryor argues that Yeats and Pound reconceive the quest for paradise as a quest for a new kind of poetry, a journey that Pryor

traces by analysing unpublished manuscript drafts and newly published drafts that have received little attention For Yeats and Pound the journey towards a paradisaic poetic becomes a never ending quest at once self defeating and self fulfilling a formulation that has implications not only for the work of these two poets but for the study of modernist literature *Play Among Books* Miro Roman,Alice _ch3n81,2021-12-06 How does coding change the way we think about architecture This question opens up an important research perspective In this book Miro Roman and his AI Alice_ch3n81 develop a playful scenario in which they propose coding as the new literacy of information They convey knowledge in the form of a project model that links the fields of architecture and information through two interwoven narrative strands in an infinite flow of real books Focusing on the intersection of information technology and architectural formulation the authors create an evolving intellectual reflection on digital architecture and computer science **The Poetics of Grammar and the Metaphysics of Sound and Sign** ,2007-08-30 This book examines the seemingly universal notion of a grammatical cosmos Individual essays discuss how many of the great civilizations provide cognitive maps that emerge from a metaphysical linguistics in which sounds syllables and other signs form the constructive elements of reality The essays address cross cultural issues such as Why does grammar serve as a template in these cultures How are such templates culturally contoured To what end are they applied i e what can one do with grammar and how does it work upon the world The book is divided into three sections that deal with the metaphysics of linguistic creation practices of encoding and decoding as a means of deciphering reality and language in the widest sense as a medium for self and cultural transformation Contributors include Jan Assman Sara Sviri Michael Stone M Finkelberg Yigal Bronner Martin Kern Brouria Bitton Ashkelony Dan Martin Jonathan Garb Tom Hunter David Shulman and Sergio La Porta *Adam's Ancestors* David N. to transform current critical paradigms in contrast to approaches that emphasize primarily the political and the ethical. By critically engaging with and developing the insights of scholars and thinkers from both Anglo American and Continental traditions the book makes a significant meta critical contribution to a rethinking of comparative intercultural studies and literary theory. It will be of interest to students and scholars in comparative literature, English world literature and global and translation studies.

The Francis Daniel Pastorius Reader Patrick Erben, Alfred Brophy, Margo Lambert, 2020-02-26

Francis Daniel Pastorius was one of the first German settlers to Pennsylvania and a touchstone figure of German American cultural heritage. This monumental anthology presents a selection of his many writings in one volume. Pastorius sailed to North America as a Pietist but found a unique home among the Quakers in Pennsylvania. Within this early modern religious context he was a lawyer, educator and community leader, a polymath and a prolific writer and collector of knowledge. At the turn of the eighteenth century Pastorius held one of the largest manuscript collections in North America and wrote voluminously in multiple languages. His collecting, curation and dissemination represents a unique look at the ways information was stored, processed and utilized during the seventeenth and eighteenth centuries in both North America and Europe. This rich selection of Pastorius's writings on religion, education, gardening, law and community and the colony of Pennsylvania as well as letters, poems and numerous encyclopedic and bibliographic works shows the mind of a true humanist in action. Pastorius's works have long been important to the archival study of early German settlement and the Atlantic world. Now available together, transcribed, translated and annotated, his writings will have widespread significance to the study of early American literature and history.

Linguistic Purism in Action Nils Langer, 2013-02-18

The auxiliary *do tun* is one of the most discussed constructions in West Germanic. In German there is a striking opposition between modern standard German where the construction is virtually ungrammatical and considered to be sub standard by most speakers whilst, as this book shows, the construction is attested in all modern dialects as well as historic stages since 1350. In answering why auxiliary *tun* is ungrammatical in modern standard German it is shown that the stigmatization of *tun* was caused by prescriptive grammarians in the 16th-18th century. Furthermore it is shown that the stigmatization of *tun* as bad German occurred in clearly discernible stages from bad poetry 1550-1680 to bad written German 1680-1740 and finally to bad German in general after 1740, thus providing evidence that the history of the standardization of German needs to take into account direct metalinguistic comments from prescriptive grammarians. The effectiveness of linguistic purism is also shown by evidence from two other constructions, namely *polynegation* and *double perfect*.
