DNA Profiling Isabelle Denervaud, Olivier Chatin, 2011. This book explores an organic vision of company innovation through an analogy with DNA and its four nitrogenous bases. Like all living organisms, a company has the fundamental genetic bases of its ability to innovate. This DNA mutates under both environmental influences and evolutionary factors, allowing a company to develop new patterns of behaviour. At the dawn of the 21st century, the result of this process is the emergence of what we could call the hyperconnected company. Through this ongoing metaphor, the book provides decision makers with several paths along which to increase their ability to innovate, taking advantage of genetic bases such as their own factors of change. The study is based on observations made of large companies for whom innovation is an absolute imperative. It alternates theoretical analyses with concrete illustrations and spotlights innovation leaders such as Louis Vuitton, 3M, Bouygues, Telecom, BNP Paribas, Siemens, Danone, Air Liquide, to name but a few.

Infrastructure Health in Civil Engineering (Two-Volume Set) Mohammed M. Ettouney, 2022-01-18. It examines the process of addressing and maintaining structural health, including measurements, structural identification and damage identification, and discusses the theoretical and practical issues involved for each aspect. Emphasizing state-of-the-art practice as well as future directions, this text also features numerous practical case studies and covers the latest techniques in sensing and sensor utilization.
