Serial Murderers Their Victims 4th:

Serial Murderers and Their Victims Eric W. Hickey, 2006 The author examines the lives of over 400 serial murderers analyzing the cultural historical and religious factors that influence our myths and stereotypes of these individuals He then describes the biological psychological and sociological reasons for serial murder offering his own Trauma Control model for explaining serial murder behaviour This new edition includes new case profiles of Canada's two most prolific serial killers Robert Willy Picton and Clifford Olsen

Serial and Mass Murder Elizabeth A. Gurian, 2021-09-30 This book reframes the study of multicide that is serial and mass murder to use objective measures and aims to expand our understanding of multicide offending through descriptive and inferential statistical analyses of different homicide patterns of the offenders Criminal homicide and multiple murders are rare occurrences that typically account for a very small percentage of all violent crimes in most countries Despite this low occurrence homicide continues to be an area of intense study with a focus on subjective measures and classifications The research and analysis based on a database of over 1 300 cases contributes to the criminological study of violence and draws distinctions between the types of offenders partnered and solo serial and mass male and female etc from a range of different countries and across decades Traditionally studies of homicide focus on male offenders and theories of offending are then applied to females and co offenders The research presented in this book reveals that women and partnered offenders have very different homicide patterns from men Looking at the history of multicide offending this book uses descriptive and inferential statistical analyses to directly compare differences in offending and outcome patterns across multicide offender types This exploration of the multidimensionality of homicide at an international level is useful for scholars and students interested in criminal justice criminology psychology sociology or law

Female Serial Killers in Social Context Elizabeth Yardley, David Wilson, 2015-08-26 To date approaches to understanding serial murder have focused on individual cases rather than the social context in which they occurred Written by leading criminologists and world experts on serial murder this book marks a departure by situating nineteenth century serial killer Mary Ann Cotton within the broader social structure Using archival records of her court appearances local histories and newspaper articles it uniquely explores how institutions such as the family economy and religion shaped the environment she inhabited and her social integration through the roles of wife mother worker and criminal Acknowledging that it takes a particular type of individual to commit serial murder the book shows that it also takes a particular type of society to enable that murderer to go unseen As the first work to analyse serial murder through the theoretical framework of institutional criminology and institutional anomie theory it will equip criminologists with a methodological toolkit for performing institutional analysis
