Nivola, 2003-07-29 More powerful and affluent today than ever the United States has promising opportunities to influence the course of history Yet these prospects are shadowed by significant perils and burdens In this visionary book leading scholars from the Brookings Institution and other prominent research organizations and universities analyze the major domestic and foreign policy problems facing the nation over the next five to ten years The challenges on the domestic front are formidable assuring fair but affordable access to health care shoring up retirement income for an aging population encouraging long term economic growth easing the growing pains of an increasingly diverse society and reconciling energy policies with environmental concerns In international affairs the central task is to use America's unprecedented power wisely and to protect a homeland that has been revealed as surprisingly vulnerable Yet efforts must also focus on improving the economic fortunes of poorer countries expanding trade and reforming the rules that regulate the flows of capital across national borders Is the United States government capable of rising to these vast and varied challenges The concluding chapters of this book offer cautious optimism While it is often criticized the American political system is fundamentally resilient and flexible Ambitious in scope Agenda for the Nation provides thoughtful constructive answers to questions of how the U S government can effectively serve its citizens and meet its global responsibilities in a world of opportunity and uncertainty Regional Missile Defense from a Global Perspective Catherine McArdle Kelleher, Peter

Dombrowski, 2015-09-23 Regional Missile Defense from a Global Perspective explains the origins evolution and implications of the regional approach to missile defense that has emerged since the presidency of George H W Bush and has culminated with the missile defense decisions of President Barack Obama The Obama administration s overarching concept for American missile defense focuses on developing both a national system of limited ground based defenses located in Alaska and California intended to counter limited intercontinental threats and regionally based missile defenses consisting of mobile ground based technologies like the Patriot PAC 3 system and sea based Aegis equipped destroyer and cruisers The volume is intended to stimulate renewed debates in strategic studies and public policy circles over the contribution of regional and national missile defense to global security Written from a range of perspectives by practitioners and academics the book provides a rich source for understanding the technologies history diplomacy and strategic implications of the gradual evolution of American missile defense plans Experts and non experts alike whether needing to examine the offense defense tradeoffs anew to engage with a policy update or to better understand the debate as it relates to a country or region will find this book invaluable While it opens the door to the debates however it does not find or offer easy solutions because they do not exist
