Lord Fife and His Factor: Being the Correspondence of James, Second Lord Fife, 1729-1809 j. d. 2nd earl Fife, 1925 **Lord Fife and His Factor** Alistair Tayler, Henrietta Tayler, 2001-08 Selections from over 20 000 letters written from London by Lord Fife to his Factor doeror agent in Scotland William Rose who carefully preserved all the letters Although Lord Fife s eighty years 1729 1809 were all lived under two sovereigns B thirty one years in the reign of George II and forty nine in that of George III yet he linked up three distinct political and literary ages When he was born Steele Sterne Defoe Gay Swift Pope and Bolingbroke were still living Johnson was only twenty years Chatham twenty one and Horace Walpole twelve years older than he Among his contemporaries and friends were Burke Reynolds Goldsmith Garrick the younger Pitt Henry Dundas Clive Warren Hastings Lord North and Charles Lord Stanhope Nelson Napoleon and Wellington were all born while he was in middle life When he was becoming an old man Carlyle and Maccaulay were born and Wordsworth Coleridge Southey Scott and Byron rose to fame while 1809 the year of his death was that of the births of Alfred Tennyson Edward FitzGerald and Gladstone He wrote much more naturally and in less stilted language than most men of his time **Lord Fife and His Factor** James Duff Earl of Fife, 1925 **Cool Britannia** Adam Watson, Iain Cameron, 2010 Cool Britannia Snowier times in 1580 1930 than since Global warming and climate change have become headline news in recent years Climate however has always changed Thick ice covered most of Britain in the last Ice Age and prehistoric man thrived during a warm climate after the ice melted In a later warm period the Vikings farmed in Greenland but then came the cold of the Little Ice Age for several centuries up to the mid 1800s Climatologists in the 1900s noted some old writings that told of more snow in northern Europe then including Britain For this authoritative new book the most experienced observer of British snow patches has combined forces with the keenest recent enthusiast who has stimulated many new voluntary observers A factual review it gives more evidence of a colder snowier Britain in the 1580s to early 1900s than since 1930 The most comprehensive historical account yet published for snow patches on British hills it also collates for the lowlands much evidence that was previously unpublished or in obscure little known sources The authors recount a few past extraordinary cases of severe snow affecting British folk even in lowland southern England Their verbatim quotations from early writers give a remarkably live impression so that readers feel they are out in the cold with these pioneers of long ago The modern scientific evidence is clear that the cool centuries described by the authors for Britain also affected the rest of Europe and indeed all other continents across the globe Hence this book will be of interest to many readers far beyond Britannia Authors Adam Watson BSc PhD DSc DUniv raised in lowland Aberdeenshire is a retired research ecologist aged 80 He began lifelong interests on winter snow in 1937 snow patches in
