**Studies in Natural Products Chemistry** Atta-ur-Rahman, 2012-07-13 Natural Product Chemistry continues to expand to exciting new frontiers of great importance in medicine Written by international authorities in various fields of natural product chemistry this latest volume in the well established series Studies in Natural Products Chemistry contains 23 chapters covering topics ranging from immunosuppressant and antimalarial compounds to bioactive substances useful in cancer and neural diseases This present volume will again be of great interest to research scientists and scholars working in the exciting field of new drug discovery Written by international authorities in the various fields of natural product chemistry Contains 23 comprehensive articles covering topics ranging from immunosuppressant and antimalarial compounds to bioactive substances useful in cancer and neural diseases Valuable source of information for research scientists and scholars in the field of new drug discovery

Technological Processes for Marine Foods, From Water to Fork Megh R. Goyal, Hafiz Ansar Rasul Suleria, Shanmugam Kirubanandan, 2019-06-07 The importance and value of foods from marine sources is ever increasing especially as the availability of arable land decreases due to climate change increasing populations and urbanization and other factors This book looks at the importance of marine foods and their secondary metabolites for human health along with a number of novel processing techniques and applications for marine foods It also provides some recent studies on microbiology and genomics of marine food products The volume first looks at several pharmacological properties of marine derived compounds and their applications The volume goes on to present a number of scientific reports on new and effective processing technologies and applications for marine foods These include various methods of freezing fish for later consumption and fermentation processes for fish products Other industrial applications and issues are explored as well such as waste management and utilization of fish byproducts The issue of maintaining probiotic and nutritional value from fish products during industrial processing is also addressed and the role of microbiology and genomics of marine food products is explored as well

**The Alkaloids**, 2020-05-14 The Alkaloids Volume 84 is the newest release in a series that has covered the topic for more than 60 years As the esteemed leading reference in the field of alkaloid chemistry this series covers all

aspects of alkaloids including their chemistry biology and pharmacology Sections are presented as high quality timeless reviews written by renowned experts in the field Provides the latest information on the study of alkaloids Covers their chemistry biology pharmacology and medical applications Contains more than 70 published volumes in this interesting field of study *Labile Organic Matter* Zhongqi He, Fengchang Wu, 2020-01-22 Because of its dynamic nature labile organic matter is a key player in terrestrial and aquatic ecosystems Editors Zhongqi He and Fengchang Wu include contributions from more than 30 senior researchers and innovative junior investigators from six countries With issue oriented comprehensive reviews and problem solving case studies this collection brings together soil and aquatic scientists to provide a comprehensive understanding for managing the sources and fates of labile organic matter A timely synthesis of recent research this collection illustrates the remarkable range of advanced techniques and approaches for labile organic matter research This book will serve as a valuable reference for university faculty graduate students soil scientists ecologists limnologists marine scientists environmental scientists agricultural engineers and any who work with various aspects of labile organic matter in the environment **Platform Chemical Biorefinery** Satinder Kaur Brar, Saurabh Jyoti Sarma, Kannan Pakshirajan, 2016-06-02 Platform Chemical Biorefinery Future Green Chemistry provides information on three different aspects of platform chemical biorefinery The book first presents a basic introduction to the industry beneficial for university students then provides engineering details of existing or potential platform chemical biorefinery processes helpful to technical staff of biorefineries Finally the book presents a critical review of the entire platform chemical biorefinery process including extensive global biorefinery practices and their potential environmental and market related consequences Platform chemicals are building blocks of different valuable chemicals The book evaluates the possibility of renewable feedstock based platform chemical production and the fundamental challenges associated with this objective Thus the book is a useful reference for both academic readers and industry technical workers The book guides the research community working in the field of platform chemical biorefinery to develop new pathways and technologies in combination with their market value and desirability Offers comprehensive coverage of platform chemicals biorefineries recent advances and technology developments potential issues for preventing commercialization and solutions Discusses existing technologies for platform chemicals production highlighting benefits as well their possible adverse effects on the environment and food security Includes a global market analysis of platform chemicals and outlines industry opportunities Serves as a useful reference for both academic readers and industry technical workers **Bioactive Phytochemicals in By-products from Leaf, Stem, Root and Tuber Vegetables** Mohamed Fawzy Ramadan, 2025-03-21 This book offers a comprehensive overview of bioactive phytochemicals within by products from leaf stem root and tuber vegetables and it explores the valorisation of these vegetable cultivation and processing by products not only as a source of valuable bioenergy but also for health purposes Divided into 16 chapters the book begins with an introduction to the economic significance of biowaste

generated from vegetable cultivation and processing setting the stage for subsequent chapters that cover the phytochemical nutritional biochemical and physicochemical properties of vegetable processing wastes and their multifaceted applications Readers will find valuable insights into the valorisation of process by products from diverse vegetables like cabbage spinach watercress asparagus celery kohlrabi beetroot carrot celeriac turnip sweet potato potato and taro In each chapter readers will find an economic perspective for each biowaste the chemical analysis of the bioactive compounds their biological and functional properties and relevant food and non food applications of extracts and bioactive compounds from vegetable by products This book coupled with its companion volume Bioactive Phytochemicals in By products from Bulb Flower and Fruit Vegetables serves as an indispensable tool for students scholars and researchers seeking to expand their knowledge within this field in agricultural and nutritional sciences It also extends its relevance to professionals within the food industry offering the latest insights and findings from cutting edge research

### **Chemistry, Biology and Pharmacology of Lichen**

Ashoke Kumar Das, Ajay Sharma, Deepika Kathuria, Mohammad Javed Ansari, Garima Bhardwaj, 2024-06-04 Understand the properties and applications of one of the world's most ubiquitous flora Lichen is a single entity comprising two or more organisms most typically algae and fungus in a symbiotic relationship It is one of the planet's most abundant categories of flora with over 25 000 known species across all regions of the globe Lichens status as a rich source of bioactive metabolites and phytochemicals as well as their potential as bio indicators has given them an increasingly prominent role in modern research into medicine cosmetics food and more Chemistry Biology and Pharmacology of Lichen provides a comprehensive overview of these bountiful flora and their properties It provides not only in depth analysis of lichen physiology and ecology but also a thorough survey of their modern and growing applications It provides all the tools readers need to domesticate lichen and bring their properties to bear on some of humanity's most intractable scientific problems Chemistry Biology and Pharmacology of Lichen readers will also find Applications of lichen in fields ranging from food to cosmetics to nanoscience and beyond Detailed discussion of topics including lichen as habitats for other organisms lichens as anticancer drugs antimicrobial properties of lichen and many more Detailed discussion on key bioactive compounds from lichens Chemistry Biology and Pharmacology of Lichen is ideal for scientists and researchers in ethnobotany pharmacology chemistry and biology as well as teachers and students with an interest in biologically important lichens It is gratifying to see the enthusiasm of Indian mycologists for lichens grow over the last 25 years especially in their possible exploitation That this book has a staggering 63 contributors of which all but seven are from India or Pakistan is a testament to that enthusiasm Following a series of nine chapters on general aspects of lichen biology conservation and ecology are ten on different aspects of actual or prospected applications These cover traditional uses therapeutic potential of bioactive compounds antioxidant properties antimicrobial activities anticancer drugs food value perfumery and cosmetics bioindication and nanoparticles One contribution compiles ethnobotanical and pharmacological properties of four particular genera Cetraria Cladonia Parmelia s

lat and Usnea The compilations of pertinent very scattered publications and reports will be of value for anyone wishing to explore particular activities further especially as starting points for fresh research However it has to be recognized that many of the studies commented on especially in relation to potential medical applications are based on individual rather small scale studies and not always on precisely identified material Further in many chapters published reports are carefully compiled but generally accepted without indications of their limitations I was concerned to see that in the chapter on taxonomy lichens were not presented from the standpoint of the phylogenetic placements of the fungal partners to which the lichen name applies Instead it is Zahlbruckner s system that is used treating them as a separate group divided into Ascolichens Basidiolichens and categories such as Gymnocarpeae In justification they say this has been widely adopted by all British lichenologists and give a reference to a 1959 publication It is sad to see such obsolete treatments being perpetuated as in addition to misleading readers it may inhibit them from looking into what is known of the activities and properties of related non lichen fungi and their products There are also inconsistencies in the scientific names used and erratic use of author citations which in any case have no place in nontaxonomic works It is unfortunate that a work on a subject of such potentially wide interest was evidently not as critically reviewed and edited to the standard I would have expected from such a prestigious and respected publisher David L Hawksworth 2024 Mycological book news Fungal Biology Reviews Volume 50 2024 100399 <https://doi.org/10.1016/j.fbr.2024.100399>
