Soni, 2016-09-19 Himalaya the world s most prominent mountain system of the world is a source of sustenance for the social cultural and economic development of population across different countries Unscientific small scale mining for harnessing resources including minerals has caused ecosystem damage Therefore an integrated and holistic approach to deal with the resource management is required This book makes a focussed effort to explain how mining in the Himalaya is practiced with discussions pertaining to critiques and lacunas of mining and environmental practices Status of mining practices in Himalaya is included along with the legal environmental repercussions of mining *Community Forestry in Western Indian Himalaya* Nagendra Prasad

Todaria, Dhanpal Singh Chauhan, 2025-03-03 The Van Panchayat in Uttarakhand India is a unique community forest management system the only one incorporated into the Indian Forest Act of 1927 Originating from local resistance against British colonial control of forest resources in the early 19th century this system has evolved over the last 93 years The book offers a comprehensive view of the Van Panchayat Institution covering the British colonial policies on forest control and the subsequent developments It compiles all published work on Van Panchayat making it the first book dedicated to this system The chapters explore various aspects like forestry policy management environment ecology economics and social and institutional dimensions providing a holistic understanding of the subject *Conflict, Negotiations and Natural Resource Management* Maarten Bavinck, Amalendu Jyotishi, 2014-10-17 Conflicts over natural resources abound in India where much of the population is dependent on these resources for their livelihoods Issues of governance and management are complicated by the competing claims of parallel legal systems including state customary religious project and local laws Whereas much has been written about property rights this unique collection takes a legal anthropological perspective to explore how the coexistence and interaction between multiple legal orders provide bases for claiming property rights It examines how hybrid legal institutions have developed over time in India and how these impact on justice in the governance and distribution of natural resources The book brings together original case studies that offer fresh perspectives on the governance of forests water fisheries and agricultural land in a diverse range of social and spatial contexts This brand new research provides a timely and persuasive overview of the fundamental role of parallel legal systems in shaping how people manage natural resources It will be of interest to scholars and practitioners of environmental law property law environmental politics anthropology sociology and geography Sustainable Management of Headwater Resources Libor Jansky, Martin J. Haigh, Haushila Prasad, 2005 Headwaters are the source of freshwater resources the margins of drainage basins and the first and zero order basins that surround every catchment The challenge is to define appropriate self sustainable management strategies and structures for these lands which meet the needs of the headwater habitat including its human inhabitants and the needs of habitats downstream The contributors to this book strive to anticipate emerging and future problems to discover integrated solutions to the problems already caused by land degradation natural hazards and development processes and to help develop better land management environmental protection and landscape regeneration practices and policies They also address the many challenges that remain the concern for effective sharing of local experience in science and technology community participation the role of education effectiveness and limits of current technology the selection of appropriate policies and goals modes of effective management and the sustainability of current activities Sustainable Management of Headwater Resources provides an understanding of current and prior situations and provides scientific analyses of local and regional headwater issues in India and Africa The authors analyse the current situation through field experiments that provide reliable information on the status of headwater resources in these regions This book originates from the conference

on Sustainable Management of Headwater Resources at the 5th International Conference on Headwaters in Nairobi Kenya

Development Stuart Corbridge, 2000 Brings together more than one hundred articles dealing with the discipline of development in all its diversity Key topics include the transformation of peasant economies agribusiness rural urban relations markets industrialization workers trade aid and structural adjustment A unique set in its comprehensiveness and diversity it also considers four key challenges for development theory and practice relating to capabilities ethics sustainability and regulation

The Resilience of Traditional Knowledge Systems for a Sustainable Future Anwasha Borthakur, Pardeep Singh, 2024-11-29 This book is an effort to draw attention to the resilience of traditional knowledge systems for a sustainable future in the Himalayas with a particular focus on agriculture and food practices Through examples from the region it underscores the importance of these practices in navigating contemporary global environmental challenges The Himalayan region known for its socio cultural diversity and unique agricultural ecology emerges as a major hotspot of climate change Therefore acknowledging and recognizing the lived experiences of the locals along with their traditional knowledge associated with agriculture and food systems becomes imperative for devising adaptation and mitigation strategies amidst the unfolding environmental and climate crisis Drawing upon insights from local communities and experts deeply rooted in the Himalayan context this book not only documents traditional agricultural and food systems but also sheds light on the pressing anthropogenic challenges threatening their sustainability We believe that research and documentation of traditional knowledge practices of the local and indigenous communities are essential for tackling the current and projected global environmental challenges This book advocates for a holistic approach to addressing both current and future global environmental challenges It serves as a timely call to action for researchers policymakers and practitioners alike
