Natural Regulations Of Animal Numbers:

The Natural Regulation of Animal Numbers David Lack, 1967 *Natural Regulation of Animal Populations* McLaren, Gordon Greenwood, 1954 *The Natural Regulation of Animal Numbers* David Lambert Lack, 1974 The Natural Regulation of Animal Numbers Ian A. McLaren, 2017-07-05

Surveying an area dense with conflicting observations and ideas this volume vividly depicts the current state of knowledge as well as the great diversity of opinion in the field of population ecology Ten papers by outstanding authorities focus on three main issues the effects of environment and population density on population dynamics the influence of animal behavior on population growth and the possibilities of genetic feedback or short term evolutionary change on control of animal populations An incisive introduction by the editor establishes a frame of reference and supplies succinct resolutions of some of the important controversies dealt with in these pages

The ^ALife of David Lack Ted R. Anderson, 2013-06-01 The first biography of David Lack the father of evolutionary ecology and an acclaimed ornithologist

Theory of Wildlife Population Ecology Bruce D. Leopold, 2018-10-25 Understanding wildlife population ecology is vital for all wildlife managers and conservation biologists Leopold draws on 30 years of research and teaching experience to give students and natural resource professionals the foundation they need to effectively manage wildlife populations He begins with the key statistical concepts and research approaches necessary to gain insight into various models of population dynamics The many factors that influence wildlife populations are thoroughly explored and their consequences are investigated In addition the author presents techniques for analyzing wildlife harvest data and a lucid discussion of valuable wildlife census methods Frequent examples of foundational literature supplement each chapter with applications of the theories and provide a concise compendium of fundamental concepts of population ecology Abundant statistical exercises reinforce students learning throughout the text

The Natural Regulation of Animal Numbers. 343pp D. Lack, 1954 , Ecology and Behavior of Chickadees and Titmice Ken A. Otter, 2007-02-01 Chickadees and titmice are among the most popular birds in North America due in large part to their readiness to use bird feeders to nest in urban gardens and even to be trained to take food from people s hands These attributes have also made them and their Eurasian tit counterparts perhaps the most intensively studied bird family in the world Long term research in Europe has yielded some of the most comprehensive data on the impact of global warming on the breeding ecology of birds Chickadees have amongst the best studied and most complex vocal behaviour of any bird species displaying one of the closest analogies to human sentence structure in the animal kingdom in their familiar chick a dee call The social dominance hierarchies commonly witnessed in the form of squabbling at winter feeders are some of most stable and closely studied and have huge impacts on controlling the lives of these small birds Their food storing behavior and the brain and physiological mechanisms controlling this has contributed significantly to our wider understanding of spatial orientation In recent years these birds have also been used as model species for investigating topics as diverse as inter

species hybridization the impacts of forest fragmentation and complex systems of communication In short chickadees and titmice have contributed enormously to our understanding of a myriad of topics in ecology behavior and psychology This book brings together a range of experts from across North America who utilise chickadees or titmice as study organisms Each chapter reviews the latest advances in evolution and behavioral research that have been accomplished through the study of North American Parids and compares and contrasts this literature with research on their Eurasian counterparts as well as other avian families This research level text is aimed at professional avian biologists and ornithologists as well as graduate students of avian behavioral ecology and evolution It will also appeal to a more general audience of behavioural ecologists neuroethologists and experimental psychologists

The Postcolonial Animal Evan Mwangi, 2019-09-06 Despite the central role that animals play in African writing and daily life African literature and African thinkers remain conspicuously absent from the field of animal studies The Postcolonial Animal African Literature and Posthuman Ethics demonstrates the importance of African writing to animal studies by analyzing how postcolonial African writing including folktales religion philosophy and anticolonial movements has been mobilized to call for humane treatment of nonhuman others Mwangi illustrates how African authors grapple with the possibility of an alternative to eating meat and how they present postcolonial animal consuming cultures as shifting toward an embrace of cultural and political practices that avoid the use of animals and minimize animal suffering The Postcolonial Animal analyzes texts that imagine a world where animals are not abused or used as a source of food clothing or labor and that offer instruction in how we might act responsibly and how we should relate to others both human and nonhuman in order to ensure a world free of oppression The result is an equitable world where even those who are utterly foreign to us are accorded respect and where we recognize the rights of all marginalized groups

Essays in Animal Behaviour Jeffrey R. Lucas, Leigh W. Simmons, 2005-11-07 Recently the 50th anniversary of the publication of Animal Behaviour has passed To mark the occasion a group of prominent behaviourists have written essays relevant to their fields These essays provide a glimpse of the study of behaviour looking in all directions History and future aside it is imperative to broadcast this information from the perspective of the behaviourists who have helped shape both the past and the future It is important for any field to be both retrospective and prospective where have we been where are we going where are we now These essays provide a unique personal reflection on the history of animal behaviour from John Alcock Stuart and Jeanne Altmann Steve Arnold Geoff Parker and Felicity Huntingford Six topics are reflected on and include The History of Animal Behavioural Research Proximate Mechanisms Development Adaptation and Animal Welfare Broad range of essays on animal behaviour Written by leaders in the field Offers a history of the study of behaviour plus essays on the future of behavioural studies Contains over 30 full color illustrations Includes essays on development mechanisms and adaptive significance of behaviour

An Analysis of the Population Dynamics of Selected Avian Species Charles J. Henny, Douglas H. Johnson, Michael A. Bogan, Sandra L. Husar, Alan B. Sargeant, 1972 The Evolution of Darwinism Timothy

Shanahan,2004-03-15 No other scientific theory has had as tremendous an impact on our understanding of the world as Darwin's theory as outlined in his Origin of Species yet from the very beginning the theory has been subject to controversy The Evolution of Darwinism first published in 2004 focuses on three issues of debate the nature of selection the nature and scope of adaptation and the question of evolutionary progress It traces the varying interpretations to which these issues were subjected from the beginning and the fierce contemporary debates that still rage on and explores their implications for the greatest questions of all Where we come from who we are and where we might be heading Written in a clear and non technical style this book will be of use as a textbook for students in the philosophy of science who need to become familiar with the background to the debates about evolution *Dictionary of Zoo Biology and Animal Management* Paul A.

Rees,2013-07-03 This dictionary is intended as a guide to the terminology used in a wide range of animal related programmes of study including agriculture animal care animal management animal production animal welfare veterinary nursing wildlife conservation and zoo biology In total it contains over 5 300 entries It contains a wide range of terms used in the fields of veterinary science physiology and zoology as students whose primary interests are animal welfare or zoo biology also need to have some understanding of disease how animal bodies function and how animals are classified It also contains some legal terms and reference to some legal cases to help students understand how the protection use and conservation of animals is regulated by the law Some people famous animals literature and films have influenced the way we think about and behave towards animals For this reason the book includes references to important books about animals famous animals who have starred in films or been the subject of scientific studies along with short biographies of famous scientists and others who have studied animals or established conservation or animal welfare organisations Monitoring Bird Populations by Point Counts C. John Ralph,John R. Sauer,Sam Droege,1998-05

Point counts of birds are the most widely used quantitative method and involve an observer recording birds from a single point for a standardized time period In response to the need for standardization of methods to monitor bird populations by census researchers met to present data from various investigations working under a wide variety of conditions and to examine various aspects of point count methodology Statistical aspects of sampling and analysis were discussed and applied to the objectives of point counts The final chapter presents these standards and their applications to point count methodology **Wildlife Research Report** ,1972
