Burian, 1986-10-31 The Greater Philadelphia Philosophy Consortium was launched in the early eighties It began during a particularly lean period in the American economy But its success is linked as much to the need to be in touch with the rapidly changing currents of the philosophical climate as with the need to insure an adequately stocked professional community in the Philadelphia area faced perhaps permanently with the threat of increasing attrition The member schools of the Consortium now include Bryn Mawr College the University of Pennsylvania Temple University and Villanova University that is the schools of the area that offer advanced degrees in philosophy The philosophy faculties of these schools form the core of the Consortium which offers graduate students the instructional and library facilities of each member school The Consortium is also supported by the associated faculties of other regional schools that do not offer advanced degrees notably those at Drexel University Haverford College La Salle University and Swarthmore College both philosophers and members of other departments as well as interested and professionally qualified persons from the entire region The affiliated and core professionals now number several hundreds and the Consortium's various ventures have been received most enthusiastically by the academic community At this moment the Consortium is planning its fifth year of what it calls the Conferences on the Philosophy of the Human Studies **The Origins of Natural Science** Rudolf Steiner, 1985 9 lectures Dornach December 24 1922 January 6 1923 CW 326 Modern science and the scientism based on it so far from being the only possible reality principle is merely one way of conceiving the nature of reality a way moreover that has arisen only recently and that there is no reason to suppose will last forever Owen Barfield from the introduction These talks outline the subtle changes in our ideas and feelings in relation to the development of natural science Through this Steiner shows the significance of scientific research and the mode of thinking that goes with it As we look at what technology has brought us we may have a feeling like the pain we feel over the death of a loved one According to Steiner this feeling of loss will eventually become our most important stimulation to seek the spirit This book is a translation from German of *Der Entstehungsmoment der Naturwissenschaft in der Weltgeschichte und ihre seitherige Entwicklung* GA 326 **Bulletin** United States. Office of Education, 1960 *Science and Theology* James K.
