Naturalistic Hermeneutics:

Naturalistic Hermeneutics C. Mantzavinos, 2005-03-14 Naturalistic Hermeneutics first published in 2005 proposes the position of the unity of the scientific method and defends it against the claim to autonomy of the human sciences Mantzavinos shows how materials that are meaningful more specifically human actions and texts can be adequately dealt with by the hypothetico deductive method the standard method used in the natural sciences The hermeneutic method is not an alternative method aimed at the understanding and the interpretation of human actions and texts but it is the same as the hypothetico deductive method applied to meaningful materials The central thesis advocated by Mantzavinos is thus that there is no fundamental methodological difference between natural sciences social sciences and humanities Advanced students and professionals across philosophy social and political theory and the humanities will find this a compelling and controversial book

Hermeneutics and the Natural Sciences Robert P. Crease, 2012-12-06 This remarkable volume attests to the world wide development of a hermeneutical approach to the natural sciences Questions raised by the essays include What is a phenomenology of scientific perception How does meaning arise out of laboratory situations How do individuals or groups come to terms with the particular problem situations in which they find themselves by drawing on the available conceptual and practical resources which structure these situations The essays are organized around three central themes One group of authors Heelan Kockelmans and Gremmen Jacobs recalls and applies existing historical resources of hermeneutical phenomenology to current scientific and social issues A second group Kisiel Eger considers the differences between a specifically hermeneutical approach to science and related approaches such as cultural studies and social constructivism A third group Ihde Gendlin seeks to forge new directions and tools for understanding natural scientific practice As Crease's introductory essay makes plain the authors share the commitment of hermeneutical philosophy to the priority of meaning over technique the primacy of the practical over the theoretical and the priority of situation over abstract formulation In the process the authors revive and transform the ancient Greek idea that the key to living well to being fully and authentically human resides primarily in the exercise of the practical not the theoretical virtues in the art of doing well in the workworld and acting well in the polis

Reading between the lines - Leo Strauss and the history of early modern philosophy Winfried Schröder,2015-11-13 Since its publication in 1952 Leo Strauss s Persecution and the Art of Writing has stirred considerable controversy particularly among historians concerned with early modern philosophy On the one hand several scholars share his view that it would be inadequate to generally take at face value the explicit message of texts which were composed in an era in which severe sanctions were imposed on those who entertained deviating views Reading between the lines therefore seems to be the appropriate hermeneutical approach On the other hand the risks of such an interpretative maxim are more than obvious as it might come up to an unlimited license to ascribe heterodox doctrines to early modern philosophers whose manifest teachings were in harmony with the orthodox positions of their time The contributions to this volume both address these methodological issues and discuss paradigmatic cases of authors who might indeed be candidates for a Straussian reading between the lines Hobbes Spinoza and Bayle

Hermeneutic Philosophies of Social Science Babette Babich,2017-10-23 Hermeneutic philosophies of social science offer an approach to the philosophy of social science foregrounding the human subject and including attention to history as well as a methodological reflection on the notion of reflection including the intrusions of distortions and prejudice Hermeneutic philosophies of social science offer an explicit orientation to and concern with the subject of the human and social sciences Hermeneutic philosophies of the social science represented in the present collection of essays draw inspiration from Gadamer s work as well as from Paul Ricoeur in addition to Michel de Certeau and Michel Foucault among others Special attention is given to Wilhelm Dilthey in addition to the broader phenomenological traditions of Edmund Husserl and Martin Heidegger as well as the history of philosophy in Plato and Descartes The volume is indispensable reading for students and scholars interested in epistemology philosophy of science social social studies of knowledge as well as social studies of technology

Intentionality, Desire, Responsibility A.W.M. Mooij,2010-09-14 Recently the predominance of natural sciences

seems to have cast doubt on the legitimacy of the human sciences Adopting a phenomenological and hermeneutical point of view this book is intended to contribute towards a justification of the human sciences taking account of quintessentially human characteristics The basic assumption is that man interprets his own experience and the world around him yielding to the limitations imposed by language Central themes are intentionality and causality desire and lack responsibility and loss of responsibility Relevant domains are psychopathology and psychoanalysis following Lacan's interpretation and law The rich phenomenological traditions in these domains will be drawn from throughout this book
