Naturalization Of The Soul Self And Personal Identity In The Birth Of Modern Psychology:

Naturalization of the Soul John Barresi, Raymond Martin, 2012-10-12 Naturalization of the Soul charts the development of the concepts of soul and self in Western thought from Plato to the present. It fills an important gap in intellectual history by being the first book to emphasize the enormous intellectual transformation in the eighteenth century when the religious soul was replaced first by a philosophical self and then by a scientific mind. The authors show that many supposedly contemporary theories of the self were actually discussed in the eighteenth century and recognize the status of William Hazlitt as one of the most important Personal Identity theorists of the British Enlightenment for his direct relevance to contemporary thinking. Now available in paperback, Naturalization of the Soul is essential reading for anyone interested in the issues at the core of the Western philosophical tradition.

Constructing the Self Valerie Gray Hardcastle, 2008 Constructing the Self analyzes the narrative conception of self, filling a serious gap in philosophy and grounding discussion in other disciplines. It answers the questions: What are the connections between our interpretations, selfhood, and conscious phenomenal experience? Why do we believe that our interpretations of our life-defining events are narrative in nature? From the myriad of thoughts, actions, and emotions which constitute our experiences, how do we choose what is interpretively important, the tiny subset that composes the self? By synthesizing the different approaches to understanding the self from philosophy of mind, developmental psychology, psychopathology, and cognitive science, this monograph gives us deeper insight into what being minded, being a person, and having a self are, as well as clarifies the difference and relation between conscious and unconscious mental states and normal and abnormal minds. The explication also affords new perspectives on human development and human emotion.

Series A

Naturalization of the Soul Raymond Martin, John Barresi, 2004 Annotation: This book makes a major contribution to our understanding of one of the most radical transformations in the history of intellectual thinking.

The Rise and Fall of Soul and Self Raymond Martin, John Barresi, 2006 This book traces the development of theories of the self and personal identity from the ancient Greeks to the present day. From Plato and Aristotle to Freud and Foucault, Raymond Martin and John Barresi explore the works of a wide range of thinkers and reveal the larger intellectual trends, controversies, and ideas that have revolutionized the way we think about ourselves. The authors open with ancient Greece, where the ideas of Plato, Aristotle, and the materialistic atomists laid the groundwork for future theories. They then discuss the ideas of the church fathers and medieval and Renaissance philosophers, including St. Paul, Philo, Augustine, Aquinas, and Montaigne. In their coverage of the emergence of a new mechanistic conception of nature in the seventeenth century, Martin and Barresi note a shift away from religious and purely philosophical notions of self and personal identity to more scientific and social conceptions, a trend that has continued to the present day. They explore modern philosophy and psychology, including the origins of different traditions within each discipline, and explain both the theoretical relevance of feminism and gender and ethnic studies and also the ways that Derrida and other recent thinkers have challenged the very idea that a unified self or

personal identity even exists Martin and Barresi cover a number of issues broached by philosophers and psychologists such as the existence of a fixed and unchanging self and whether the concept of the soul has a use outside of religious contexts They address the question of whether notions of the soul and the self are still viable in today's world Together they reveal the fascinating ways in which great thinkers have grappled with these and other questions and the astounding impact their ideas have had on the development of self understanding in the west

Textual Intimacy Wesley A. Kort, 2012-05-23 Given its affinity with questions of identity autobiography offers a way into the interior space between author and reader especially when writers define themselves in terms of religion In his exploration of this textual intimacy Wesley Kort begins with a theorization of what it means to say who one is and how one's self account as a religious person stands in relation to other forms of self identification He then provides a critical analysis of autobiographical texts by nine contemporary American writers including Maya Angelou Philip Roth and Anne Lamott who give religion a positive place in their accounts of who they are Finally in disclosing his own religious identity Kort concludes with a meditation on several meanings of the word assumption

The Politics and Ethics of Identity Richard Ned Lebow, 2012-08-30 Challenges the notion of consistent unitary identities arguing that we are multiple changing selves shaped by social contexts and processes

[Yearnings of the Soul](#) Jonathan Garb, 2015-11-23 In Yearnings of the Soul Jonathan Garb uncovers a crucial thread in the story of modern Kabbalah and

modern mysticism more generally psychology Returning psychology to its roots as an attempt to understand the soul he traces the manifold interactions between psychology and spirituality that have arisen over five centuries of Kabbalistic writing from sixteenth century Galilee to twenty first century New York In doing so he shows just how rich Kabbalah s psychological tradition is and how much it can offer to the corpus of modern psychological knowledge Garb follows the gradual disappearance of the soul from modern philosophy while drawing attention to its continued persistence as a topic in literature and popular culture He pays close attention to James Hillman s archetypal psychology using it to engage critically with the psychoanalytic tradition and reflect anew on the cultural and political implications of the return of the soul to contemporary psychology Comparing Kabbalistic thought to adjacent developments in Catholic Protestant and other popular expressions of mysticism Garb ultimately offers a thought provoking argument for the continued relevance of religion to the study of psychology
