Nature Of Dwellings The Architecture Of David Hovey

Cheryl Kent

Nature Of Dwellings The Architecture Of David Hovey:

The Nature of Dwellings Cheryl Kent, 2004 This monograph documents the extraordinary single family houses of David Hovey a maverick architect It focuses almost exclusively on his well regarded house designs especially the Arizona houses

Notable Americans of Czechoslovak Ancestry in Arts and Letters and in Education Miloslav Rechcigl Jr., 2021-11-02 As pointed out in my last two publications no comprehensive study has been undertaken about the American Learned Men and Women with Czechoslovak roots The aim of this work is to correct this glaring deficiency with the focus on immigration from the period of mass migration and beyond irrespective whether they were born in their European ancestral homes or whether they have descended from them Whereas in the two mentioned monographs the emphasis has been on scholars and social and natural scientists and men and women in medicine applied sciences and engineering respectively the present compendium deals with notable Americans of Czechoslovak ancestry in arts and letters and in education With respect to women although most professional fields were closed to them through much of the nineteenth century the area of arts and letters was opened to them as noted earlier and as this compendium authenticates Encyclopedia of Bohemian and Czech-American Biography Miloslav Rechcigl Jr., 2016-11-10 As the Czech ambassador to the United States H E Petr Gandalovic noted in his foreword to this book that Mla Rechcigl has written a monumental work representing a culmination of his life achievement as a historian of Czech America The Encyclopedia of Bohemian and Czech American Biography is a unique and unparalleled publication The enormity of this undertaking is reflected in the fact that it covers a universe starting a few decades after the discovery of the New World through the escapades and significant contributions of Bohemian Jesuits and Moravian brethren in the seventeenth and eighteenth centuries the mass migration of the Czechs after the revolutionary year of 1848 and up to the early years of the twentieth century and the influx of refugees from Nazism and communism The encyclopedia has been planned as a representative a comprehensive and authoritative reference tool encompassing over 7 500 biographies This prodigious and unparalleled encyclopedic vade mecum reflecting enduring contributions of notable Americans with Czech roots is not only an invaluable tool for all researchers and students of Czech American history but is also a carte blanche for the Czech Republic which considers Czech Americans as their own and as a part of its magnificent cultural history *American Learned Men and Women with Czechoslovak Roots* Mila Rechcigl, 2020-11-18 Apart from a few articles no comprehensive study has been written about the learned men and women in America with Czechoslovak roots That s what this compendium is all about with the focus on immigration from the period of mass migration and beyond irrespective whether they were born in their European ancestral homes or whether they have descended from them Czech and Slovak immigrants including Bohemian Jews have brought to the New World their talents their ingenuity their technical skills their scientific knowhow and their humanistic and spiritual upbringing reflecting upon the richness of their culture and traditions developed throughout centuries in their ancestral home This accounts for the remarkable success and

achievements of these settlers in their new home transcending through their descendants as this monograph demonstrates. The monograph has been organized into sections by subject areas i.e. Scholars, Social Scientists, Biological Scientists, and Physical Scientists. Each individual entry is usually accompanied with literature and additional biographical sources for readers who wish to pursue a deeper study. The selection of individuals has been strictly based on geographical ground without regards to their native language or ethnic background. This was because under the Habsburg rule the official language was German and any nationalistic aspirations were not tolerated. Consequently it would be virtually impossible to determine their innate ethnic roots or how the respective individuals felt. Doing it in any other way would be a mere guessing and thus less objective.

Notable American Women with Czechoslovak Roots Miloslav Rechcigl Jr., 2019-09-16. Even though there exist only a few general studies on the subject of Czechoslovak American women, this is not at all a reflection of the paucity of work done by these women as this publication demonstrates. This monograph is a compendium of notable American women with Czechoslovak roots who distinguished themselves in a particular field or area from the time they first immigrated to America to date. Included are not only individuals born on the territory of former Czechoslovakia but also their descendants. This project has been approached strictly geographically irrespective of the language or ethnicity. Because of the lack of bibliographical information, most of the monograph comprises biobibliographical information in which area a plethora of information exists. As the reader will discover, these women have been involved practically in every field of human endeavor in numbers that surprise. On the whole, they have been noted for their independent spirit and nonconforming role.

Modern in the Middle Susan Benjamin, Michelangelo Sabatino, 2020-09-01. The first survey of the classic twentieth century houses that defined American Midwestern modernism. Famed as the birthplace of that icon of twentieth century architecture, the skyscraper, Chicago also cultivated a more humble but no less consequential form of modernism, the private residence. *Modern in the Middle: Chicago Houses 1929-75* explores the substantial yet overlooked role that Chicago and its suburbs played in the development of the modern single family house in the twentieth century. In a city often associated with the outsize reputations of Frank Lloyd Wright and Ludwig Mies van der Rohe, the examples discussed in this generously illustrated book expand and enrich the story of the region's built environment. Authors Susan Benjamin and Michelangelo Sabatino survey dozens of influential houses by architects whose contributions are ripe for reappraisal, such as Paul Schweikher, Harry Weese, Keck Keck, and William Pereira. From the bold early example of the Battledock House by Henry Dubin (1930) to John Vinci and Lawrence Kenny's gem, the Freeark House (1975), the generation-spanning residences discussed here reveal how these architects contended with climate and natural setting while negotiating the dominant influences of Wright and Mies. They also reveal how residential clients, typically middle class professionals, progressive in their thinking, helped to trailblaze modern architecture in America. Though reflecting different approaches to site, space, structure, and materials, the examples in *Modern in the Middle* reveal an abundance of astonishing houses that have never been collected.

into one study until now *Santiago Calatrava* Cheryl Kent, 2005-07-26 Spanish born architect Santiago Calatrava has achieved considerable international acclaim in recent years with his breathtaking feats of engineering in the service of elegant and humanistic modern forms While his most recent success was the much lauded and much televised stadium velodrome and other structures of the Athens Olympics Calatrava first established his reputation as the preeminent engineer of our time with a stunning series of bridges designed for cities around the globe Barcelona Bilbao Buenos Aires Orlans Seville Venice and Jerusalem Recent years have witnessed the introduction of Calatrava's elegant forms to the American cityscape with designs for an innovative apartment tower and the much anticipated World Trade Center Transportation Hub both planned for lower Manhattan But before these designs were unveiled Calatrava completed the Quadracci Pavilion at the Milwaukee Art Museum which Time named the best new design project of 2001 This beautifully illustrated monograph is a detailed exploration of a celebrated American architectural masterpiece Calatrava's spectacular cultural and civic projects have secured his place in the pantheon of world class twenty first century architects In addition to the Milwaukee Art Museum he's celebrated for train stations in Zurich Lyons Lisbon and Liège the Sondica Airport in Bilbao the Tenerife Concert Hall in the Spanish Canary Islands and the Valencia Science Museum Planetarium and Opera House **Stephen Case 1966-2004** Stephen Thomas Case, 2006 Houses for All Regions American Institute of Architecture, 2014-06-25 Houses for all Regions CRAN Residential Collection is the first in a series on international residential architecture produced by The IMAGES Publishing Group in partnership with the American Institute of Architects AIA The projects are divided into four climate zones arid semi arid temperate arctic cold climate and tropical sub tropical and each illustrates how architects adapt their designs to accommodate the challenges posed by the local topography and variations in climate Containing cutting edge residential designs by leading architects from across the world including North America the Caribbean Asia and Europe and featuring rarely seen images Houses for all Regions CRAN Residential Collection underlines the sensitivity of today's architects to the natural environment as well as the care and attention paid to interior design and everyday living
Architectural Record , 2005
