Nature Of Learning In Its Relation To The Living System:

The Nature of Learning George Humphrey, 2013-11-05 This is Volume IV in a series of twenty one in a collection on Cognitive Psychology Originally published in 1933 this looks at the nature of learning in its relation to the living system In order to discover the mechanism of the living system it is necessary to investigate which among its effects are connected with well established laws of chemistry and physics and to distinguish them carefully from the effects which have no immediate or at least known relation with these laws and of which the cause is concealed for us

The Nature of Learning George Humphrey, 1999-06-24 First Published in 1999 Routledge is an imprint of Taylor Francis an informa company The Structure of Learning Processes Jaan Valsiner, Hans-Georg Voss, 1996 This book brings together a variety of contemporary approaches to learning that by and large follow the structuralist path to understand learning a path both ecological and dynamic The book views the learning processes as they take place in the course of personenvironment relationships

Theories of Learning Ernest Ropiequet Hilgard, 1948 Learning is a central topic within American psychology and its problems have provided the occasion for hundreds of experimental studies The science of learning remains in a state of flux in part because we have not yet reached agreement upon the most appropriate concepts to use in stating our problems and in interpreting our data This book represents an attempt to provide in one place an introduction to the major theories of learning which are current among psychologists doing research in this important field of study The aim is to see theory in relation to experiment Each of the several theories is therefore illustrated by a selected topic within the field of experimentation The topic chosen is in each case one actively studied by adherents to the theory The theory can be judged both by its provocativeness in suggesting experiments and by its success in dealing systematically with the data which emerge from such experiments PsycINFO Database Record c 2005 APA all rights reserved

Sensory Affect, Learning Spaces, and Design Education Lorraine Marshalsey, 2023-03-10 Through the lens of sensory affect this book offers a new way of thinking about day to day teaching and student engagement within learning spaces in design education The book examines the definitions concepts ideas and overlaps of a repertoire of learning spaces prevalent in higher education and addresses the pedagogical gap that exists between broader learning structures and spaces and the requirements of specialist design education Recognising that mainstream teaching environments impact upon design studio learning and student engagement the book positions creative learning spaces at the heart of practice based learning It defines the underlying pedagogical philosophy of a creative learning space in design education and reports on how practical strategies incorporating sensory affect may be implemented by educators to foster better student engagement in these spaces within higher education Bringing much needed attention to specialist design teaching and learning spaces in higher education this book will be of interest to educators researchers and post graduate students immersed in design education pedagogy and learning spaces more broadly
