Geometries and mechanisms of thrusting, with special reference to the Appalachians Gautam Mitra, Steven F. Wojtal, 1988 **Geological History of Britain and Ireland** Nigel H. Woodcock, R. A. Strachan, 2012-05-21 Britain and Ireland have a remarkably varied geology for so small a fragment of continental crust with a fine rock record back through three billion years of geological time This history would have been interesting enough if it had been played out on relatively stable continental crust However Britain and Ireland have developed at a tectonic crossroads on crust once traversed by subduction zones and volcanic arcs continental rifts and mountain belts The resulting complexity is instructive fascinating and perplexing Geological History of Britain and Ireland tells the region's story at a level accessible to undergraduate geologists as well as to postgraduates professionals or informed amateurs This second edition is fully revised and updated reflecting our continually developing knowledge of the region's geology Full coverage is again given to the rich Precambrian and Early Palaeozoic history as well as to later events more relevant to hydrocarbon exploration The book is an essential starting point for more detailed studies of the regional geology Additional resources for this book can be found at <http://www.wiley.com/go/woodcock/geologicalhistory> *Geology of the Innuitian Orogen and Arctic Platform of Canada and Greenland* H.P. Trettin, 1991 Fourteen chapters discuss regional stratigraphy by time intervals from Precambrian to Quaternary while other chapters describe the geography geomorphology tectonics geophysical characteristics and resources of the region A summary chapter includes geologic maps structural cross sections a geotectonic correlation chart a gravity map and a location map for exploration wells in the Arctic Islands and northern Greenland A wealth of additional information is contained on the nine accompanying plates *A Revised Correlation of Precambrian Rocks in the British Isles* Wes Gibbons, Anthony Leonard Harris, Geological Society of London, 1994 *Pre-Mesozoic Geology in France and Related Areas* J. Chantaine, J. Duncan Keppie, J. Rolet, D.S. Santallier, A. Pique, 2012-12-06 This book provides an up to date synthesis of the Pre Mesozoic Geology in France Armorican and Central Massifs and Related Areas Aquitaine Basin Vosges Provence Pyrenees Western Alps Corsica and Sardinia The geological record is systematically presented covering seismic reflection gravity and magnetic data stratigraphy paleontology structure metamorphism igneous activity and metallogeny It is the most up to date English summary by French scientists providing access to the vast literature on the topic mainly written in French As such it should be of great interest to an international audience **Later Proterozoic Stratigraphy of the Northern Atlantic Regions** J. A. Winchester, 2012-12-06 Later Proterozoic Stratigraphy of the Northern Atlantic stimulating and their prompt submission of text and illustrative material has enabled rapid production of Regions aims to produce a concise and up to date synthesis of the later Proterozoic geology of those lands the book Funding for this research has come from many bordering the North Atlantic that were once situated sources including the Natural Environment Research north of the Iapetus Suture and the Tornquist Line Council the British Geological Survey the Geological Proterozoic rocks deposited

W. Dyfed Cardigan Ceridgian Snowdonia Anglesey the English Lake District and the Southern Uplands and Highlands of Scotland Thus the fifty or so participants in the ASI studied the geological history and major structures of rocks exposed on either side of the supposed Lower Palaeozoic Iapetus Ocean the British sector of which closed to the south of the present Southern Uplands Wales 1 5 afforded insight into the nature of the late Precambrian basement of England and Wales and the relationship of sedimentary and volcanic cover sequences to this basement The Ordovician sequence in Wales is a sample of the volcanic rocks typical of a marginal basin and were examined in Pembrokeshire and Snowdonia The English Lake District 6 displays rocks from an island arc also of Ordovician age
