Natures Keepers The New Science Of Nature Management:

Nature's Keepers Stephen Budiansky, 1995 Argues that man's intervention in nature is often necessary to maintain the balance

American Wilderness Michael Lewis, 2007-03-08 This collected volume of original essays proposes to address the state of scholarship on the political cultural and intellectual history of Americans responses to wilderness from first contact to the present While not bringing a synthetic narrative to wilderness the volume will gather competing interpretations of wilderness in historical context

Toward a Literary Ecology Karen E. Waldron, Rob Friedman, 2013-07-29 Scholarship of literature and the environment demonstrates myriad understandings of nature and culture While some work in the field results in approaches that belong in the realm of cultural studies other scholars have expanded the boundaries of ecocriticism to connect the practice more explicitly to disciplines such as the biological sciences human geography or philosophy Even so the field of ecocriticism has yet to clearly articulate its interdisciplinary and transdisciplinary nature In **Toward a Literary Ecology** Places and Spaces in American Literature editors Karen E Waldron and Robert Friedman have assembled a collection of essays that study the interconnections between literature and the environment to theorize literary ecology The disciplinary perspectives in these essays allow readers to comprehend places and environments and to represent express or strive for that comprehension through literature Contributors to this volume explore the works of several authors including Gary Snyder Karen Tei Yamashita Rachel Carson Terry Tempest Williams Chip Ward and Mary Oliver Other essays discuss such topics as urban fiction as a model of literary ecology the geographies of belonging in the work of Native American poets and the literary ecology of place in new nature writing Investigating texts for the complex interconnections they represent **Toward a Literary Ecology** suggests what such texts might teach us about the interconnections of our own world This volume also offers a means of analyzing representations of people in places within the realm of an historical cultural and geographically bounded yet diverse American literature Intended for students of literature and ecology this collection will also appeal to scholars of geography cultural studies philosophy biology history anthropology and other related disciplines

Fundamentals of Biogeography Richard J. Huggett, 1998 Fundamentals of Biogeography offers a fresh up to date introduction to biogeography explaining the ecology geography and history of animals and plants The book defines and examines populations communities and ecosystems examining where different animals and plants live and how they came to be living there investigating how populations grow interact and survive Stressing the role of ecological geographical historical and human factors in fashioning animal and plant distributions Huggett reveals how life has and is adapting to its biological and physical surroundings The book includes several sections on human attitudes to Nature differ and how biogeography can affect conservation practice As well as explaining key concepts and interactions Huggett tackles many topical and controversial environmental and ethical concerns including animal rights species exploitation habitat fragmentation biodiversity metapopulations patchy landscapes and chaos Illustrated throughout with informative diagrams

and photos and including chapter summaries guides to further reading and an extensive glossary of key terms *Fundamentals of Biogeography* presents an engaging introduction for students

A Storied Wilderness James W. Feldman, 2011-07-01 The Apostle Islands are a solitary place of natural beauty with red sandstone cliffs secluded beaches and a rich and unique forest surrounded by the cold blue waters of Lake Superior But this seemingly pristine wilderness has been shaped and reshaped by humans The people who lived and worked in the Apostles built homes cleared fields and cut timber in the island forests The consequences of human choices made more than a century ago can still be read in today's wild landscapes *A Storied Wilderness* traces the complex history of human interaction with the Apostle Islands In the 1930s resource extraction made it seem like the islands natural beauty had been lost forever But as the island forests regenerated the ways that people used and valued the islands changed human and natural processes together led to the rewilding of the Apostles In 1970 the Apostles were included in the national park system and ultimately designated as the Gaylord Nelson Wilderness How should we understand and value wild places with human pasts James Feldman argues convincingly that such places provide the opportunity to rethink the human place in nature The Apostle Islands are an ideal setting for telling the national story of how we came to equate human activity with the loss of wilderness characteristics when in reality all of our cherished wild places are the products of the complicated interactions between human and natural history Watch the book trailer <https://www.youtube.com/watch?v=fREcwKA6oHs>

Habitat of Grace Carolyn M. King, 2002 In 1990 the Worldwatch Institute in Washington estimated that humankind had forty years to make the transition to an environmentally stable society If we have not succeeded by then it concluded environmental deterioration and economic decline are likely to be feeding on each other pulling us into a downward spiral of social disintegration Worldwatch is no millenarian cult but a sober and careful organisation whose annual summaries of world affairs have become the planet's unofficial environmental health reports Its pronouncements are cautiously worded influential and worth attending to even if the timing is hard to predict This book uses the issues raised in these reports to look at biology the environmental crisis and theological response to it all by developing a new theology of creation Based on her scientific background in the biological sciences King brings together biology and theology It covers science religion and environment human nature and develops a theology of creation The author teaches at the University of Waikato in New Zealand

Navigating Social-Ecological Systems Fikret Berkes, Johan Colding, Carl Folke, 2008-04-24 In the effort towards sustainability it has become increasingly important to develop conceptual frames to understand the dynamics of social and ecological systems Drawing on complex systems theory this book investigates how human societies deal with change in linked social ecological systems and build capacity to adapt to change The concept of resilience is central in this context Resilient social ecological systems have the potential to sustain development by responding to and shaping change in a manner that does not lead to loss of future options Resilient systems also provide capacity for renewal and innovation in the face of rapid transformation and crisis The term navigating in the title

is meant to capture this dynamic process Case studies and examples from several geographic areas cultures and resource types are included merging forefront research from natural sciences social sciences and the humanities into a common framework for new insights on sustainability

Rethinking Wilderness Mark Woods, 2017-07-30 The concept and values of wilderness along with the practice of wilderness preservation have been under attack for the past several decades In *Rethinking Wilderness* Mark Woods responds to seven prominent anti wilderness arguments Woods offers a rethinking of the received concept of wilderness developing a positive account of wilderness as a significant location for the other than human value adding properties of naturalness wildness and freedom Interdisciplinary in approach the book combines environmental philosophy environmental history environmental social sciences the science of ecology and the science of conservation biology

Sex and Death Kim Sterelny, Paul E. Griffiths, 2024-05-31 Is the history of life a series of accidents or a drama scripted by selfish genes Is there an essential human nature determined at birth or in a distant evolutionary past What should we conserve species ecosystems or something else Informed answers to questions like these critical to our understanding of ourselves and the world around us require both a knowledge of biology and a philosophical framework within which to make sense of its findings In this accessible introduction to philosophy of biology Kim Sterelny and Paul E Griffiths present both the science and the philosophical context necessary for a critical understanding of the most exciting debates shaping biology today The authors both of whom have published extensively in this field describe the range of competing views including their own on these fascinating topics With its clear explanations of both biological and philosophical concepts *Sex and Death* will appeal not only to undergraduates but also to the many general readers eager to think critically about the science of life

Introduction to Green Chemistry John Andraos, Albert S. Matlack, 2022-03-09 Interest in green chemistry and clean processes has grown so much in recent years that topics such as fluorous biphasic catalysis metal organic frameworks and process intensification which were barely mentioned in the First Edition have become major areas of research In addition government funding has ramped up the development of fuel cells and biofuels This reflects the evolving focus from pollution remediation to pollution prevention Copiously illustrated with more than 800 figures the Third Edition provides an update from the frontiers of the field It features supplementary exercises at the end of each chapter relevant to the chemical examples introduced in each chapter Particular attention is paid to a new concluding chapter on the use of green metrics as an objective tool to demonstrate proof of synthesis plan efficiency and to identify where further improvements can be made through fully worked examples relevant to the chemical industry

NEW AND EXPANDED RESEARCH TOPICS Metal organic frameworks Metrics Solid acids for alkylation of isobutene by butanes Carbon molecular sieves Mixed micro and mesoporous solids Organocatalysis Process intensification and gas phase enzymatic reactions Hydrogen storage for fuel cells Reactive distillation Catalysts in action on an atomic scale

UPDATED AND EXPANDED CURRENT EVENTS TOPICS Industry resistance to inherently safer chemistry Nuclear power Removal of mercury from vaccines Removal of mercury and lead from

primary explosives Biofuels Uses for surplus glycerol New hard materials to reduce wear Electronic waste Smart growth The book covers traditional green chemistry topics including catalysis benign solvents and alternative feedstocks It also discusses relevant but less frequently covered topics with chapters such as Chemistry of Long Wear and Population and the Environment This coverage highlights the importance of chemistry to everyday life and demonstrates the benefits the expanded exploitation of green chemistry can have for society
