Navajo Silversmithing:

A Brief History of Navajo Silversmithing Arthur Woodward, 1946 Navajo Silversmiths Washington Matthews, 1973

Among the Navajo Indians there are many smiths who sometimes forge iron and brass but who work chiefly in silver. When and how the art of working metals was introduced among them I have not been able to determine but there are many reasons for supposing that they have long possessed it. Many believe that they are not indebted to the Europeans for it. Doubtless the tools obtained from American and Mexican traders have influenced their art. Old white residents of the Navajo country tell me that the art has improved greatly within their recollection that the ornaments made fifteen years ago do not compare favorably with those made at the present time and they attribute this change largely to the recent introduction of fine files and emery paper. At the time of the Conquest the so-called civilized tribes of Mexico had attained considerable skill in the working of metal and it has been inferred that in the same period the sedentary tribes of New Mexico also wrought at the forge. From either of these sources the first smiths among the Navajos may have learned their trade but those who have seen the beautiful gold ornaments made by the rude Indians of British Columbia and Alaska many of whom are allied in language to the Navajos may doubt that the latter derived their art from a people higher in culture than themselves.

In Navajo Silversmiths Washington Matthews meticulously chronicles the artistry and cultural significance of Navajo silverwork detailing the intricate techniques and tools employed in crafting these remarkable pieces. Through a blend of descriptive narrative and analytical discourse Matthews situates the silversmiths within the broader tapestry of Southwestern culture highlighting how their work reflects both tradition and innovation. The text serves not only as an artistic commentary but as an anthropological study capturing the spiritual and communal dimensions inherent in the art of silversmithing. Matthews adopts a clear accessible literary style while maintaining an authoritative voice yielding a book that resonates with both lay readers and scholars alike. Washington Matthews primarily known for his contributions to ethnology and anthropology brought a deeply empathetic perspective to the study of Navajo culture. His extensive fieldwork among the Navajo people and their crafts provides him with an authenticity that enriches his analysis. Matthews was not just an observer his dedication to understanding and preserving Native American traditions allowed him to illuminate the nuances of Navajo craftsmanship in a way that few contemporaries achieved. This work is highly recommended for those intrigued by Native American culture art history or anthropology. Navajo Silversmiths not only offers insights into the technical expertise of silversmithing but also reveals the profound cultural narratives woven into each piece. Readers will gain a greater appreciation for the artistry of the Navajo people and the enduring significance of their traditions. pieces made for trade among the Indians themselves and of the newer cheaper types of jewelry produced for sale to tourists. He discusses standards and qualities of Indian silver and describes the work of the Indian schools in helping preserve traditional design in the fine silver of today. His excellent photographs of some of the most notable pieces old and new provide examples for evaluation. This volume therefore will serve the layman, the ethnologist, and the dealer alike as a guide to proper values in Indian silver jewelry and will provide the basis for authoritative knowledge and appreciation of a highly skilled creative art.
