

THE
NAVAL HISTORY
OF
GREAT BRITAIN.

From the earliest Account of Time, to the
Beginning of the Reign of Queen Elizabeth.

THOUGH the navy of England has, as it were, by imperceptible degrees, advanced to its present power and grandeur; yet Great-Britain, even before the time that Cæsar invaded it, was not destitute of a naval force, which, in Mr. Selden's opinion, had been weakened, if not totally destroyed, when the Venetii, their allies, were defeated.

The Romans were too wise a people, not to be convinced of the necessity of maintaining a fleet to defend this island from being invaded by the nations on the continent, and therefore were careful to put the navy on a respectable footing; tho' we hear of few expeditions undertaken at this early period. Caius Carausius, commander of the British fleet in the year 288, cleared the coast of pirates, who had taken advantage of the distractions of the Roman empire to enrich themselves, at the expence of their country. Carausius, after destroying those pests of society, made himself master of Bouloigne, and several other adjacent places on the coast of France, having received information that Maximian, emperor of Rome, had given orders for taking away his life privately; a sufficient reason for him to provide for his own safety. Nor was this a task of any great difficulty; his prudent conduct, and engaging behaviour, had acquired the love of his sailors, and the Roman

Naval History Of Britain:

The Price of Victory N A M Rodger, 2024-10-24 The final instalment of N A M Rodger's definitive authoritative trilogy on Britain's naval history At the end of the French and Napoleonic wars British sea power was at its apogee But by 1840 as one contemporary commentator put it the Admiralty was full of intellectuals becalmed in the smoke of Trafalgar How the Royal Navy reformed and reinvigorated itself in the course of the nineteenth century is just one thread in this magnificent book which refuses to accept standard assumptions and analyses All the great actions are here from Navarino in 1827 won by a daringly disobedient Admiral Codrington to Jutland D Day the Battle of the Atlantic and the battles in the Pacific in 1944-45 in concert with the US Navy The development and strategic significance of submarine and navy air forces is superbly described as are the rapid evolution of ships from classic Nelsonic type to hybrid steam sail ships then armour clad and the fully armoured Dreadnoughts and beyond and weapons The social history of officers and men and sometimes women always a key part of the author's work is not neglected Rodger sets all this in the essential context of politics and geo strategy The character and importance of leading admirals Beatty Fisher Cunningham is assessed together with the roles of other less famous but no less consequential figures Based on a lifetime's learning it is the culmination of one of the most significant British historical works in recent decades Naval specialists will find much that is new here and will be invigorated by the originality of Rodger's judgements but everyone who is interested in the one of the central threads in British history will find it rewarding

The Command of the Ocean N. A. M. Rodger, 2005 N A M Rodger provides reassessments of such famous figures as Pepys Hawke Howe and St Vincent The particular and distinct qualities of Nelson and Collingwood are contrasted and the world of the officers and men who made up the originals of Jack Aubrey and Horatio Hornblower is brought to life Rodger's comparative view of other navies French Dutch Spanish and American allows him to make a fresh assessment of the qualities of the British
