Naval Radar:

New Eye for the Navy David Kite Allison, 1981 This study narrates the origin of radar at the Naval Research Laboratory Radar should be seen as the product not simply of one man or even a group of men but rather as the result of individuals working within the structure of a mission oriented research and development facility To comprehend how radar was developed when it was developed and why one must follow not just the evolution of technical progress but also the administrative and political decisions that shaped it One must understand how the talents and motivations of the people who created this new device were related to the particular institutional situation and historical context in which they labored The account is the story of a modern research and development laboratory in action It discusses one major accomplishment of one institution But it is also written to contribute to a broader understanding of the history of research and development laboratories in general and of the influence they have had on the course of modern American history The work of the Naval Research Laboratory on radar is a significant episode in that story

The Development of Radar Equipments for the Royal Navy, 1935-45 F.A. Kingsley, 2016-07-27 This book presents authoritative accounts of the evolution development and application of Royal Naval radar from its inception in 1935 until the end of World War 2 The accounts are based on the individual authors contemporary experiences extensive archival research and discussions with surviving wartime colleagues An overview is presented of the pioneering work at HM Signal School later the Admiralty Signal Establishment followed by descriptions of the main programmes of radar development associated research and the problems of installation of the equipment in ships as well as its operation and maintenance at sea Tabulations of the characteristics and installations of all wartime Royal Naval radars are provided in the Appendices

Target Detection by Marine Radar John N. Briggs, 2004-12-03 Radar is a legal necessity for the safe navigation of merchant ships and within vessel traffic services is indispensable to the operation of major ports and harbours Target Detection by Marine Radar concentrates solely on civil marine operations and explains how marine surveillance radars detect their targets The book is fully illustrated and contains worked examples to help the reader understand the principles underlying radar operation and to quantify the importance of factors such as the technical features of specific equipment the weather target reflection properties and the ability of the operator The precision with which targets are positioned on the radar screen and with which their progress is tracked or predicted depends on how definitely they have been detected therefore a whole chapter has been devoted to the issue of accuracy The various international regulations governing marine radar are examined a brief historical background is given to modern day practice and the book does with a discussion of the ways in which marine radar may develop to meet future challenges

The Applications of Radar and Other Electronic Systems in the Royal Navy in World War 2 F.A. Kingsley, 2016-07-27 This book presents a collection of authoritative accounts of the evolution and application of Royal Naval shipborne radars during World War 2 in the fields of weapon control weapon direction action information and fighter direction Accounts are also presented

of the successful pioneering activities at the Admiralty Signal Establishment in the fields of counter measures against various enemy electronic systems in active operations and also of high frequency direction finding ashore and afloat which in conjunction with radar contributed substantially to winning the Battle of the Atlantic

Innovating Victory Vincent O'Hara, Leonard R Heinz, 2022-04-15 *Innovating Victory* Naval Technology in Three Wars studies how the world's navies incorporated new technologies into their ships their practices and their doctrine It does this

by examining six core technologies fundamental to twentieth century naval warfare including new platforms submarines and aircraft new weapons torpedoes and mines and new tools radar and radio Each chapter considers the state of a subject technology when it was first used in war and what navies expected of it It then looks at the way navies discovered and developed the technology s best use in many cases overcoming disappointed expectations It considers how a new technology threatened its opponents not to mention its users and how those threats were managed *Innovating Victory* shows that the use of technology is more than introducing and mastering a new weapon or system Differences in national resources force mixtures priorities perceptions and missions forced nations to approach the problems presented by new technologies in different ways Navies that specialized in specific technologies often held advantages over enemies in some areas but found themselves disadvantaged in others Vincent P O Hara and Leonard R Heinz present new perspectives and explore the process of technological introduction and innovation in a way that is relevant to today s navies which face challenges and questions even greater than those of 1904 1914 and 1939
