Navies In The Nuclear Age Warships Since 1945:

Navies in the Nuclear Age Robert Gardiner, Norman Friedman, 1993 *Navies in the Nuclear Age* Norman Friedman, 2001-08 By 1945 the threat to warships from above and below the water's surface had come to dominate naval strategic and tactical planning. Although many of the traditional ship designations like cruisers, destroyers, and frigates continue to be used, they no longer imply a specific role. This volume therefore emphasizes such broader themes as anti-submarine warfare or electronics which involve many ship types. *The Oxford Illustrated History of the Royal Navy* J. R. Hill, Bryan Ranft, 2002 Throughout its history the Royal Navy has been of great importance for the defense of Britain and has over the centuries entrenched itself in the national psyche making itself manifest not only through the hero worship of its principal characters such as Horatio Nelson and Sir Francis Drake but also finding expression through art, music, and literature. The Oxford Illustrated History of the Royal Navy is the definitive one-volume history of the Royal Navy. The text has now been updated for this paperback edition to cover more recent events and developments covering every aspect of naval history from the Anglo-Saxon period to the dawn of the new millennium including terrorist attacks on New York and Washington and the subsequent retaliation on terrorist bases in Afghanistan. With a full chronology which has been brought up to date to the end of 2001 and an extensive list of further reading, this highly illustrated reference book gives an authoritative and highly readable account of a unique fighting service and its people. **US Navy Gun Destroyers 1945-88** Mark Stille, 2023-10-26 An illustrated history of the long Cold War careers of the US Navy's last gun destroyers from the modernized World War II era Fletcher class to the Forrest Sherman class. The finest American destroyers of World War II had surprisingly long careers into the Cold War and the missile age. The 175 strong Fletcher class was the largest class of US Navy destroyers ever built and most received some modernization after World War II. A handful were converted into ASW (Anti-Submarine Warfare) escorts and one was even converted into the US Navy's first guided missile destroyer. Many Sumner class destroyers were also kept in service with the last decommissioned in 1973. The Gearing class was the classic US Navy wartime destroyer to have a second Cold War career, some being modified into picket ships and others into ASW escorts. Ninety-five were extensively modernized under the Fleet Modernization and Rehabilitation (FRAM) program which allowed them to serve until 1980. The majority of these ships then saw service with foreign navies. However, the story of Cold War gun destroyers is not just one of World War II relics. Commissioned in the 1950s, the 18 ships of the Forrest Sherman class were the US Navy's last all-gun destroyers and were considered to be the pinnacle of US Navy gun destroyer design. Later in their careers, most were modernized for ASW and anti-air warfare. The virtually unknown Norfolk class was originally built as a destroyer leader and maximized for ASW but only two were modernized and the other three retired early. Many of these ships such as USS Edson, Cassin Young, and Turner Joy still survive as museum ships today. Using battlescene artwork, detailed illustrations, and photos, this book explores the careers, modernizations, and roles of all these unsung Cold War stalwarts, the last gun destroyers of the
