Climate Change and Indigenous Peoples Randall Abate, Elizabeth Ann Kronk, 2013-01-01 Climate Change and Indigenous Peoples offers the most comprehensive resource for advancing our understanding of one of the least coherently developed of climate change policy realms legal protection of vulnerable indigenous populations The first part of the book provides a tremendously useful background on the cultural policy and legal context of indigenous peoples with special emphasis on developing general principles for climate change mitigation and adaptation solutions The remainder of the volume then carefully and thoroughly works through how those general principles play out for different regional indigenous populations around the globe All of the contributions to the volume are by leading experts who bring their insights and innovative thinking to bear on a truly complex subject Whether as a novice s starting point or expert s desktop reference I cannot think of a more useful resource for anyone interested in climate policy for indigenous peoples J B Ruhl Vanderbilt University Law School US In Climate Change and Indigenous Peoples editors Randy Abate and Elizabeth Kronk have assembled a truly comprehensive and informative look at the special issues that indigenous peoples face as a result of climate impacts and an overview of the law international and domestic climate change and human rights substantive and procedural that applies to those issues One of the great strengths of the book is that no group of indigenous people is made to stand proxy for all the others instead after exploring the general issues facing all indigenous peoples and the general legal strategies they use the book focuses most of its attention on the specific climate change issues that confront particular groups South American indigenous peoples the various tribes of Native Americans in the US the indigenous peoples of the Arctic collectively as well as in respect to particular Arctic countries Pacific Islanders indigenous peoples in Asia the various groups of Aborigines and Torres Islanders in Australia the Maori on New Zealand and several tribes in Kenya Africa For people interested in climate change and climate change adaptation this book provides a unique overview of the special vulnerabilities and plights of indigenous peoples issues that must be considered as the world works to formulate effective and protective climate change adaptation policies For people interested in indigenous peoples and international human rights this book paints a grim picture of the various ways in which climate change threatens this very diverse group of cultural entities and the deep knowledge of place that they usually possess while at the same time offering hope that the law can find ways to keep them from disappearing and indeed that indigenous peoples might just help the rest

of us to survive as well Robin Kundis Craig University of Utah S J Quinney College of Law US It is one of the world's cruelest ironies that some of the earliest effects of climate change are being felt by indigenous populations around the world even though they contributed no more than trivial amounts of the greenhouse gases that are at the root of much of the problem and they are so politically and economically powerless that they played no role in the decisions that have led to their plight At the same time many of these populations are victimized by certain actions designed to reduce emissions such as land clearing for biofuels cultivation and restrictions on forest use Professors Abate and Kronk have assembled a formidable collection of experts from around the world who demonstrate the diversity of challenges facing these indigenous peoples and the opportunities and challenges in using various international and domestic legal tools to seek redress This book will be an invaluable resource for all those examining the legal remedies that may be available either now or as the law develops in the years to come Michael B Gerrard Columbia Law School US This timely volume explores the ways in which indigenous peoples across the world are challenged by climate change impacts and discusses the legal resources available to confront those challenges Indigenous peoples occupy a unique niche within the climate justice movement as many indigenous communities live subsistence lifestyles that are severely disrupted by the effects of climate change Additionally in many parts of the world domestic law is applied differently to indigenous peoples than it is to their non indigenous peers further complicating the quest for legal remedies The contributors to this book bring a range of expert legal perspectives to this complex discussion offering both a comprehensive explanation of climate change related problems faced by indigenous communities and a breakdown of various real world attempts to devise workable legal solutions Regions covered include North and South America Brazil Canada the US and the Arctic the Pacific Islands Fiji Tuvalu and the Federated States of Micronesia Australia and New Zealand Asia China and Nepal and Africa Kenya This comprehensive volume will appeal to professors and students of environmental law indigenous law and international law as well as practitioners and policymakers with an interest in indigenous legal issues and environmental justice Asian American Studies After Critical Mass Kent A. Ono, 2008-04-15 Asian American Studies After Critical Mass is a dynamic collection that showcases the most exciting scholarship in the field from a critical and cultural studies perspective Comprised of ten original essays written by a group of scholars at the vanguard of the discipline this collection takes on a range of topics and concerns including Asian American film and popular culture Asian Americans at the dawn of the twenty first century globalization and transnational citizenship and queer Asian America Addressing some of the most exciting issues and ideas in Asian American studies this book strikes a bold new path for the field This book can be used in conjunction with the Blackwell Companion to Asian American Studies **American Pacificism** Paul Lyons, 2006-09-27 This powerful critique of American Islander relations draws upon extensive resources including literary works and government documents to explore the ways in which conceptions of Oceania have been entwined in the American imagination **Violent Waters: Literary Border Crossings in a Global Age** Alexandra Campana, 2020-08-10

The experience of witnessing and undertaking border crossings has become a pillar of the contemporary human condition. In order to respond to our global multidimensional social reality, writers need to generate innovative forms of narration that expand the confines of literary tradition. This study discusses four types of border crossing: migration, intercultural dialogue, multicultural identities, military invasion, and presents literary aesthetics that unfold in Algeria, China, France, Germany, Romania, Switzerland, Trinidad and Tobago, the UK, and the USA. These analyses move from the fall of the Iron Curtain to the rise of the internet and from the turn of the millennium to the terrorist attacks of 9/11 and the wars in Afghanistan and Iraq. Positioned in the field of comparative literature, this book draws upon an extensive background of theoretical thought, e.g., Adorno, Horkheimer, Arendt, Dawkins, Fanon, Freud, Kristeva, and reaches into other academic disciplines such as religious studies. Border crossings thus serve as both theme and methodology, which not only leads to a new definition of postmodern writing but also underlines literature's relevance in a global society driven by public discourse.

Trespases Masao Miyoshi, 2010-04-07 *Trespases* presents key writings of the cultural critic Misao Miyoshi, including eleven previously published selections and a major new essay in which he calls for a global environmental protection studies.

Postcolonial Tourism Anthony Carrigan, 2011-02-01 This book is the first literary study of postcolonial tourism. Looking at the cultural and ecological effects of mass tourism development in highly exoticized island states that are still grappling with the legacies of western colonialism, Carrigan contends that postcolonial writers not only dramatize the industry's most exploitative operations but also provide blueprints toward sustainable tourism futures. By locating this argument in the context of interdisciplinary tourism research, the study shows how imaginative literature can extend some of this field's key theoretical concepts while making an important contribution to the interface between postcolonial studies and ecocriticism. The book also presents a framework for analyzing how an industry that is subject to constant media attention and involves a huge proportion of the global population shapes the cultural, social, and environmental milieus of postcolonial texts.

Re-Placing America Ruth Hsu, Cynthia G. Franklin, Suzanne Kosanke, 2000-01-01 This collection of essays and poems examines various recent literary texts and cultural arenas in North America and the Asia and Pacific regions for what they reveal of the ongoing struggles of indigenous people and people of colour for justice and autonomy.
