Neale Pottery And Porcelain Its Predecessors And Successors 1763 18:

Mocha and Related Dipped Wares, 1770-1939 Jonathan Rickard, 2006 An authoritative guide to the history and craft of this rare and much sought after ceramic ware *Neale Pottery and Porcelain* Diana Edwards, 1987-01-01 **English Dry-bodied Stoneware** Diana Edwards, Rodney Hampson, 1998 English dry bodied stoneware was the ultimate ceramic expression of the neoclassical wave which erupted in England and on the Continent in the mid eighteenth century Initially basalt commanded the scene with its imposing black stoneware forms imitating Greek vases However it was Wedgwood s invention of the jasper body which was to be the tour de force associated with his name Wedgwood s jasper vases purchased by gentry and nobility alike were soon imitated by a myriad of potters This book is the first to explore the vast subject of English dry bodied stoneware with discussions on the antecedents of the eighteenth century neoclassical wares the red stonewares of the seventeenth century as well as the other bodies produced by Wedgwood and his contemporaries caneware white felspathic stoneware and of course the flagship of the Wedgwood name jasper The authors have for the first time utilised Wedgwood s surviving sales records from 1774 1794 and these have made it possible to allow for more specific dating of body types and forms as they correspond to the Wedgwood Shapes Books Three hundred and fifty black and white illustrations with seventy five color plates many shown here for the first time provide an invaluable guide to the identification of these wares Detailed research into the more than sixty other potteries concerned with the production of these handsome ornamental and useful stonewares makes this the most comprehensive reference book ever produced on the subject

English Porcelain 1745-95 Hilary Young, 1999 The central focus of this text on 18th century English porcelain is the design processes that were followed in the industry These are studied and discussed in relation to manufacturing techniques and the appearance of the figures and tablewares themselves Other explorations of 18th century porcelain trade include plagiarism and industrial espionage importation and exportation raw materials and factory siting and terms and conditions of employment The text also examines the sales and marketing of English porcelain and pieces together the evidence for its consumption and use linking these to the spread of polite culture and other changes in the social fabric of 18th century England Appendices give brief factory histories and a chronology of events English Pottery 1620-1840 Robin Hildyard, 2005-08 Based around the matchless collections of British ceramics in the Victoria and Albert Museum which curators began to assemble as early as the 1840s this book charts the story of their development from the simple slipware drinking vessel of the seventeenth century to the sophisticated enamelled and transfer printed tableware of the early 1800s The narrative takes us through successive changes of taste and manners as British potters assimilated and adapted new and often disparate influences from Europe and the Far East Ceramics ubiquitous disposable and quintessentially domestic tended to reflect social changes quicker than other branches of the applied arts for example new fashions in dining and the taking of tea were responsible for major aspects of design and decoration while the rapid rise of the Staffordshire figure

enabled it to become a vehicle for satire religion or the commemoration of wildly popular but ephemeral events such as boxing matches and visits from touring menageries Keeping carefully chosen pieces illustrated at the forefront of his discussion Robin Hildyard treats the subject variously by material form decoration or by broader theme sometimes cutting across traditional boundaries in order to look behind established myths and the often misleading evidence of what has survived The methods and history of manufacture are fully explored from the workshop of the independent village potter to the industrialized nineteenth century factory struggling with the stormy beginnings of trade unionism The complex trade in ceramics both at home and abroad and the transition from utilitarian household object to cherished item in collector s cabinet is also examined along with the symbiotic relationship between collector and museum This volume filling the gap in current ceramic literature between narrower scholarly studies and the opulent catalogues of private collections presents an expert and yet highly accessible view of a particularly rich seam of British material culture guiding us from familiar ground into wider and sometimes uncharted territory
