The Holographic Universe Explained Dr. Julian M. Raithe, 2025-09-30 What if your reality isn t solid separate or even real but a holographic projection shaped by consciousness itself *The Holographic Universe Explained* is your definitive guide to decoding the hidden architecture of reality Drawing on groundbreaking insights from quantum physics neuroscience spiritual wisdom and metaphysical science this book reveals how the universe and your life is far more mysterious interconnected and malleable than you ve ever imagined Whether you re a curious beginner or a seasoned seeker this transformational guide will take you beyond the veil of ordinary perception and show you how to reshape your world from the inside out Inside this book you ll explore The shocking implications of quantum entanglement wave function collapse and non local consciousness How physicist David Bohm and neuroscientist Karl Pribram uncovered the holographic nature of the universe and the brain Why time may be an illusion and how you can access the timeless now to shift your reality Dreams d j vu remote viewing and near death experiences through the lens of holography The bridge between ancient metaphysics and modern science How energy vibration and frequency shape your health mindset and physical world The role of trauma belief systems and ancestral programming in your life hologram Powerful techniques for aligning with the quantum field scripting holographic anchoring and coherence practices Why collective consciousness may hold the key to humanity s next evolutionary leap This is not just theory it s a call to awaken You ll walk away with a radically expanded view

of who you are why you re here and what you re truly capable of

THOUGHT FORMS AND HALLUCINATIONS

Chidambaram Ramesh,2014-02-27 In recent times the subject of consciousness has emerged as an important paradigm of scientific investigation and research despite most of its concerns having roots in philosophy religion and occultism What is consciousness What is the substance of consciousness Is it material or immaterial mortal or immortal How is it connected with a body Has it a particular seat in any particular body as the brain does Is consciousness synonymous with mind Is it eternal and non local These questions have interested thinkers for many centuries It is the object of this book to demonstrate through a series of cases reported across the world at various times relating to many curious mind related phenomena like the creation of mental entities the imprints of indelible images on the human body stigmata birthmarks and bodily deformities corresponding to the injuries sustained in the previous life thought photography materialization experiments etc that Human mind can bring into being thought forms and can exteriorize them giving them some objective consistency There can be continuity of thoughts even after the destruction of the physical brain These psychic entities are sometimes given a kind of autonomy so that they may act and seemingly think without the consent or even knowledge of their creator The book does not stop with the mere reproduction of recorded cases and just messaging the dimension of the problem but extends over to solve it by suggesting a bio holographic theory of body and mind The book is alike novel fun filled profound and useful thus affording the blend of interest and instruction which cannot fail to render it interesting to the inquisitive and candid mind

Deathing Anya Foos-Graber,1989-01-15 Everyone who is born is someday going to die Some of us will die peacefully in our sleep some will die in accidents and some as the result of diseases cancer or AIDS Because we do not usually know when we are going to die most of us are frightened of death We do not want to talk about it do not want to face it and we run from it as long as we can And some of us die a lonely death in a hospital surrounded by strangers and white sheets while family and loved ones are kept out of the room at the final moment Anya Foos Graber believes that death like birth should be a shining light filled conscious moment Death is not a disease It is the most natural passage we will make since birth Looking at death before the time comes is like learning about natural childbirth before having a baby Just as women are choosing to be conscious participants in the birth process Foos Graber feels that all of us should be conscious as well of our eventual death that we should prepare for it the way the Tibetan Buddhists and American Indians used to do The author calls this process of conscious preparation and practice deathing The book presents two teaching stories illustrating both a conscious death and an unconscious one The second half of the book is a step by step manual containing complete instruction and simple exercises such as breathing visualization and the all important 6th technique or your chosen Name and form of God to which you direct your attention in life and the death transition You can use the formless LIGHT itself as referent an absence of any belief structure A support person rather like the father s presence in natural childbirth can assist in the event of coma or accident death Other books have been written about grief about wills about taking care of your affairs This is a book about

taking care of yourself and how to be helpful to someone you care for Deathing has two aims to make sure that the dying are comfortable and comforted as they die and to help all of us prepare for the greatest adventure we will face since birth

Holographic Universe Michael Talbot, 1992-05-06 Examines a new theory of reality based on holography that explains the paranormal abilities of the mind the latest frontiers of physics and the unsolved riddles of the brain and body

Death and Dying John F. Szabo, 2009-11-02 While it can be traced to the 1700s the term thanatology has gained traction in recent decades to refer to the study of death Because of the breadth of the published material and the challenges of discovery in large bibliographic databases and catalogs finding and identifying monographic material on death dying grief and bereavement can be extremely challenging Although there have been several bibliographical resources published on thanatology those titles were incomplete limited in scope or leaned heavily toward one area of the field In *Death and Dying An Annotated Bibliography of the Thanatological Literature* John F Szabo provides more than 2 200 citations of monographs on the science and study of death and dying Among the areas this volume addresses are the psychological philosophical and attitudinal aspects coping and dealing with the burdens of caregiving and working in the helping professions instructional and educational topics for practitioners primarily health care providers cultural differences in bereavement rituals and grief mourning and loss In addition notable titles on or relating to death and dying in popular culture death themes in literature methods of death or specific ethical policy or public issues are also included when they contribute important information to subject areas on which the book focuses This book will be helpful to students researchers academics caregivers health care professionals psychologists social workers and anyone with an interest in death dying bereavement or the care of the terminally ill

The Mysteries of Consciousness Ingrid Fredriksson, 2015-10-09 For hundreds of years the Western world has believed that humans indeed all living things consist of more than pure biology Not mere physical bodies humans possess something else that helps to define them In this collection of new essays scientists psychologists theoretical physicists and other experts in the mind body connection explore the nature of consciousness and its future as a new paradigm in science With contributions covering near death experiences the concept of free will conscious spacetime DNA consciousness the role of consciousness in the evolution of life quantum theory and the non local universe the scientific basis of love and the principles and applications of self hypnosis this volume clarifies the meaning of consciousness and establishes a model for further exploration into a burgeoning realm of scientific study

Human Self Athar Saeed Naqvi, PhD, 2018-02-20 Unlike most theories of the human self that are generally based on conjecture this book describes a new scientific theory of the human self and its states of consciousness This theory is formulated using the revealed knowledge found in the Holy Scriptures along with the principles of physics In a quest for the ultimate truth the book attempts to understand the relationship between man and his Creator Dr Naqvi describes the universal principle of complementarity of creation that shows that the world of matter is not mutually exclusive to the spirit world but both are complementary to each other The

three major holy scriptures of monotheistic faith describe the human spirit as a breath from the spirit of God. It is termed divine spark in man. The book explains that the divine spark is a seed of divine attributes of truth, goodness, compassion, and justice. A major outcome of this notion is that all humans are equal members of the family of God, irrespective of race, color, or creed, and deserving mutual respect and compassion. Questions are answered about the origin of human spirit, purpose of human creation, spirit-matter interaction, and the basis of ethics. Findings of prominent neurosurgeons show that the spirit/soul is an autonomous entity that can exist without a physical vehicle, which takes the inquisitive reader into a mind-blowing conclusion. This book is a response to the growing need among academics and thinking masses for scientific explanations of spirituality, psychology, philosophy, mysticism, religion, and paranormal phenomena. Over the past twenty-five years, the author has presented the theory in various universities in psychology and theology departments globally. This book may serve as course material for university-level psychology, philosophy, and theology departments. In brief, the unique theory presented in this book can be described as the science of spirituality.
